Characterisation of Porous Solids IV

Edited by

B. McEnaney, T. J. Mays
University of Bath, UK

J. Rouquérol
CTM du CNRS, Marseille, France

F. Rodríguez-Reinoso
University of Alicante, Spain

K.S.W. Sing
Universities of Bristol and Exeter, UK

K.K. Unger
Johannes Gutenberg University, Mainz, Germany
Contents

The Kelvin equation and adsorption hysteresis
AJ Brown, CGV Burgess, DH Everett, S Nuttall 1

Micropore size distribution in carbon molecular sieves by immersion calorimetry
JC González, A Sepúlveda-Escribano, M Molina-Sabio, F Rodríguez-Reinoso 9

Magic angle spinning NMR studies of adsorption onto activated carbons
RK Harris, TV Thompson, J Shaw, PR Norman 17

Analysis of HRADS adsorption
E Maglara, R Kaminsky, WC Conner 25

Neutron scattering investigations of adsorption in porous solids
JDF Ramsay, E Hoinkis 33

A pore width sensitive ordered structure of water molecules in a carbon micropore
T Iijama, K Nishikawa, T Otowa, T Suzuki, K Kaneko 41

Computer simulation study of sorption in cylindrical pores with varying pore wall heterogeneity
WA Steele, MJ Bojan 49

Transport diffusion of adsorbates in micropores: simulation in model systems
D Nicholson, RW Adams, RF Cracknell, GK Papadopoulos 57

Simulation studies of pore blocking phenomena in model porous networks
MW Maddox, N Quirke, KE Gubbins 65

Characterisation of microporous carbons by using molecular simulation to analyse the adsorption of molecules of different sizes
MV López-Ramón, J Jagiello, TJ Bandosz, NA Seaton 73

Ordered mesoporous MCM-41 adsorbents: novel routes in synthesis, product characterisation and specification
M Grün, KK Unger, A Matsumoto, K Tsutsumi 81

Characterisation of zirconia-based ordered mesoporous materials
U Ciesla, KK Unger, F Schüth 90

Physisorption of gases by MCM-41
PJ Branton, PG Hall, KSW Sing 98
Characterisation of porosity during thermal decomposition of nickel hydroxide
MML Ribeiro-Carrott, PJM Carrott, AJEG Candeias

A thermodynamic investigation of physisorbed phases within the model mesoporous material: MCM-41
PL Llewellyn, C Sauerland, C Martin, Y Grillet, J-P Coulomb, F Rouquérol, J Rouquérol

Helium adsorption on mesoporous solids at 4.2K - density of adsorbed helium in porous systems
N Setoyama, S Inoue, Y Hanzawa, PJ Branton, K Kaneko, RW Pekala, MS Dresselhaus, KSW Sing

Estimating the dimensions of ultramicropores using molecular probes
B McEnaney, TJ Mays, YF Yin, XS Chen, F Rodríguez-Reinoso

Off-lattice reconstructed biphasic media using Gaussian random fields: evaluation for different disordered porous solids
P Levitz, V Pasquier, I Cousin

Micropore size distributions from experimental isotherm data and grand canonical Monte Carlo simulations
S Samios, AK Stubos, NK Kanellopoulos, R Cracknell, G Papadopoulos, D Nicholson

Measuring and modelling the pore-level properties of meso- and macro-porous media - an overview
GP Matthews

Pore formation in carbons derived from phenol resin and their gas adsorption
M Inagaki, M Sunahara

Characterisation of porous solids: adsorption potential distribution and its thermodynamic implications
M Jaroniec, M Kruk, J Choma

Within the hysteresis: insight into the bi-modal pore size distribution of close-packed spheres
H Giesche

Properties of nanoengineered two-dimensional silica-based porous networks
PA Sermon, MSW Vong, D Grosso

The presence of "shadowed" macropores in the porous network of an activated alumina
MS Goldstein, JD Carruthers

Modelling of pore level properties
   CJ Ridgway, GP Matthews

Sorptive properties of cloverite
   W Schmidt, F Schüth

Comparison of the translational mobility $D_0$ of hydrogen, methane and neo-pentane molecules sorbed on AlPO$_4$-5
   C Martin, JP Coulomb, Y Grillet, R Kahn

Characterisation of the solid texture of porous particles by application of a non-catalytic gas-solid reaction in a thermobalance
   G Aichinger, G Staudinger

Retention mechanisms of phenol on activated carbon in a cement environment studied by high resolution argon adsorption and controlled transformation rate thermal analysis
   LJ Michot, F Didier, F Villiéras, JM Cases, Y Grillet, A Bouchelaghem

A model of mercury intrusion in an elliptical or rectangular parallel crack and its influence on porosity histograms of granite
   P Couchot, C Dubois, E Boeglin, A Chambaudet
Characterisation of single pores and porous solids
Z Sobotka

Polymeric materials with a novel type of porosity
MP Tsyurupa, AS Shabaeva, LA Pavlova, TA Mrachkovskaya, VA Davankov

Processing of microporous/mesoporous sub-micron size silica spheres by means of a template-supported synthesis
Ch Kaiser, G Büchel, S Lüdtke, I Lauer, KK Unger

Observation of interface curvature of capillary condensed phase in slit-shaped nanopore with a new MD simulation method
M Miyahara, T Yoshioka, M Okazaki

Textural adsorption characterisation according to the two-fold description of porous media
V Mayagoitia, F Rojas, I Kornhauser, J Salmones

Determination of the surface areas and pore sizes of organic matter in soils
MC Mittelmeijer-Hazeleger, H de Jonge, A Bleik

Pore structure and phenol adsorption characteristics of carbonaceous adsorbents prepared from coal reject
F Haghseresht, GQ Lu, HY Zhu, J Keller

Characterisation of silica obtained from the dissolution of olivine: a nitrogen physisorption and thermoporometric study
DJ Lieftink, P van Os, BG Dekker, H Talsma, JW Geus

Characterisation of the porosity of M41S silicate by adsorption and Xe NMR
MA Springuel-Huet, J Fraissard, R Schmidt, M Stöcker, WC Conner

Mercury porosimetry applied to low density xerogels
R Pirard, B Heinrichs, JP Pirard

Study of Kelex 100 (metallic ion extractant) impregnated in porous organic polymers using nitrogen adsorption at 77 K, water adsorption and 129-Xe NMR spectroscopy
S Esteban, JL Bonnardet, G Cote

An anomalous adsorption of ZSM-5 zeolites
ME Eleftheriou, CR Theocharis

Effect of thermal treatment on the porosity of silica gels: studies by thermal desorption of liquids
J Goworek, W Stefaniak, T Goworek
Generation of radially non-uniform porous particles - the influence of non-uniformity and of correlation properties on fluid-solid non-catalytic reactions
A Adrover, M Giona

Effects of carbon surface chemistry on adsorption of polar molecules
RH Bradley, A Cuesta

Effect of assumed pore shape and interaction parameters on obtaining pore size distributions from adsorption measurements
KL Boulton, MV López-Ramón, GM Davies, NA Seaton

Adsorbent applications for mesoporous silicate
A Yasutake, N Tomonaga, J Izumi, UM Setogushi, M Iwamoto

Characterisation by thermoporometry of the influence of additives on the porous structure of gels derived from tetraethoxysilane
A Julbe, JF Quinson, A El Mansouri, C Guizard

Reduction of octahedral Fe(III) in saponite: influence in the pillaring ability of the clay
MA Vincente, MA Bañares-Muñoz, M Suárez, JMM Pozas, RM Martin, ML Rojas

Texture of impregnated active carbon: effect of burn-off
B Buczek, A Swiatkowski, S Zietek

Pore volume and apparent density of fine porous particles
B Buczek, E Vogt, W Stefaniak

A simulation study of nitrogen adsorption in magnesium oxide pores
D Nicholson, NA Freeman, MA Day

Adsorption and thermogravimetric characterisation of selected M41S samples
A Sayari, C Danumah, P Liu, M Jaroniec

Analysis of pore structure of isotropic graphite using image processing
K Oshida, T Nakazawa, N Ekinaga, M Endo, M Inagaki

Adsorption studies of carbon dioxide on KF1500, X2MH6/8 and PX21 by means of a high-pressure volumetric device
A Guillot, S Follin, L Poujardieu

Comparison between different techniques to determine the porosity of aerogels
JF Quinson, B Chevalier, E Elaloui, R Begag
Multistep porosity development in clinochlore upon heating
F Villiéras, J Yvon, M François, G Gérard, JM Cases

Cohesive and swelling behaviour of charged interfaces: a (NVT) Monte-Carlo study
R J-M Pellenq, A Delville, H van Damme

Calculation of adsorption isotherms and thermodynamic quantities for argon adsorbed in carbon slit-like micropores with different pore widths using the density functional theory
N Neugebauer, M v Szombathely, P Bräuer

Characterisation of heterogeneous adsorbents using data from isotherms at two different temperatures
K Koch, M v Szombathely, N Neugebauer

Organised and confined fluids in a micropore
K Murata, K Kaneko

Surface characteristics and pore structure of activated char prepared from a mixture of coal tar pitch and a graphite-FeCl₃ intercalation compound
A Albinia, E Bronie, J Kaczmarczyk, A Jankowska, T Simieniewska, B McEnaney, XS Chen, G Furdin, D Bégin

Modelling of gas sorption processes in shallow, fixed bed adsorbers
EPJ Mallens, MPM Cnoops, JJGM van Bokhoven

Changes of surface area and porosity of carbon fibres during their activation
SF Grebennikov, AV Koulihchenko, JT Williams

Mesoporous silicas from mixed templates
S Ozeki, M Yamamoto, K Nobuhara

Boron distribution in MFI-type zeolites: interest of adsorption microcalorimetry at 77K
C Sauerl, PL LLewellyn, Y Grillet, J Rouquérol

A simple accelerated procedure for carbon tetrachloride activity and retentivity in active carbon
AM Zakareya,

Synthesis and mechanism of swollen MCM-41
