The Language of Physics
The Calculus and the Development of Theoretical Physics in Europe, 1750–1914
## Contents

Preface ix  
Serials: List of Abbreviations xiii  

### I: Introduction 1  
- Mathematics and Modern Physics 2  
- Modern Physics 9  
- Earlier Historical Approaches to Modern Physics 12  
- Mathematics as Language 20  
- Organization of the Text 25  

### Part I: Eighteenth-Century Science 31  

#### II: Vibrating Strings and Eighteenth-Century Mechanics 31  
- Mathematics from Physics 31  
- Ignoring Physics 35  
- Eighteenth-Century Mechanics and the History of Physics 53  

#### III: Eighteenth-Century Physics and Mathematics: A Reassessment 63  
- Physics as Experimental Philosophy 63  
- The Practice of Mathematics 72  
- The Intellectual Geography of Physics and Mathematics 78  
- The Social Geography of Physics and Mathematics 87
vi Contents

Part II: Transitions, 1790–1830

IV: “Empirical Literalism”: Mathematical Versus Experimental Physics in France, 1790–1830 95
  Changes in Social Geography, 1790–1830 96
  Experimental Physics 100
  Electricity and Magnetism 102
  Heat 111
  Light and Elasticity 119
  French Mathematics and Physics c. 1830: Some Conclusions 131

V: On the Margins: Experimental Physics and Mathematics in the German States, 1790–1830 137
  Prologue 137
  Physics and Mathematics in the German States, 1790–1830 139
  University Reform and Career Opportunities 148
  Changes in Physics in the 1820s 155
  Changes in Mathematics in the 1820s 161

VI: On the Margins: Experimental Philosophy and Mathematics in Britain, 1790–1830 169
  Social Institutions 170
  Natural Philosophy and the Universities 175
  Intellectual Organization of Research, 1800–1820 180
  Mathematics in Britain, 1790–1820 188
  Natural Philosophy and Mathematics in the 1820s 193

Part III: Transformations, 1830–1870

VII: From Natural Philosophy and “Mixed Mathematics” to Theoretical and Experimental Physics: Britain, 1830–1870 209
  Keywords 210
  The Crucial Turn: the 1830s 212
  Cambridge University, the Cambridge Mathematical Journal, and Theoretical Physics 222
  William Thomson 233
  George Gabriel Stokes 243
  James Clerk Maxwell 248
### VIII: Physics and Mathematics in the German States, 1830–1870

- Mathematical Physics as Mathematics 263
- The Transformation of Physics: The First Generation 271
- Franz Neumann 274
- Wilhelm Weber 282
- Clausius and Helmholtz 290

### Part IV: Conclusions and Epilogue

**IX: Physics About 1870 and the “Decline” of French Physics** 307
- The “Decline” of French Physics 312
- Some Conclusions 317

- The Limitations of Autonomy 323
- Mathematics in Physics 330
- Beyond the Calculus 338
- Physicists Versus Mathematicians 348

**Bibliography** 363

**Index** 367
