Geometric Constraint Solving and Applications

With 127 Figures

Springer
# Contents

Chapter 1  
The Semantics of Geometric Constraints  

- The Role of Constraints in Geometric Modelling ........................................ 3
- Progress and Problems in Extending the STEP Standard .......................... 24

Chapter 2  
Constraints for Conceptual and Collaborative Design  

- Constraint Propagation Using an Active Semantic Network .................. 43
- Analyzing and Optimizing Constraint Structures in Complex Parametric CAD Models ................................................................. 58
- Design Support Using Constraint-Driven Design Spaces ....................... 82
- Solving Over- and Underconstrained Geometric Models ....................... 107
- A Constraint-Based Shape Modeling System ....................................... 127

Chapter 3  
Constraint Representation and Solving Methods  

- Modelling of Geometric Constraints in CAD-Applications .................. 151
- Geometric Constraint Decomposition .................................................. 170
- Desargues: A Constraint-Based System for 3D Projective Geometry ........ 196
- YAMS: A Multi Agent for 2D Constraint Solving ................................ 211
- Qualitative Study of Geometric Constraints ....................................... 234
- Geometric Relaxation for Solving Constraint-Based Models ............... 259
Chapter 4
Constraints for Freeform Surfaces 271

Variational Design and Surface Reconstruction .................. 273
Computer Aided Spectacle Lens Design ............................. 290

Index 301
