(Editors)

Mathematical methods in scattering theory and biomedical technology

Proceedings of a workshop dedicated to Professor Gary Roach
## Contents

Preface

Ralph Kleinman
Opening remarks

### SECTION A: Direct and inverse problems in scattering theory

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>David L Colton</td>
<td>A simple method for solving electromagnetic inverse scattering problems</td>
<td>3</td>
</tr>
<tr>
<td>A Charalambopoulos, G Dassios and G Kamvyssas</td>
<td>Reciprocity theorems for point source scalar scattering</td>
<td>12</td>
</tr>
<tr>
<td>A A Lacey, D E Tzanetis and P M Vlamos</td>
<td>Global existence and finite-time blow-up of a non-local hyperbolic problem modelling Ohmic heating of foods</td>
<td>20</td>
</tr>
<tr>
<td>P A Martin and J A DeSantos</td>
<td>Some negative results on the use of Helmholtz integral equations for rough-surface scattering</td>
<td>33</td>
</tr>
<tr>
<td>B D Sleeman</td>
<td>Wave and scattering problems for fractal domains</td>
<td>45</td>
</tr>
</tbody>
</table>

### SECTION B: Mathematical methods in biomedical technology

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>G Constantinides, D Gintides, S Kattis, K Kiriaki, C Paraskeva, A Payatakes, D Polyzos, S Tsinopoulos and S Yannopoulos</td>
<td>Particle shape and size analyzer</td>
<td>65</td>
</tr>
<tr>
<td>A Charalambopoulos, D I Fotiadis and C V Massalas</td>
<td>Biomechanics of the human cranial system</td>
<td>80</td>
</tr>
<tr>
<td>Dimitrios I Fotiadis, Georgia Foutsitzi and Christos V Massalas</td>
<td>Wave propagation in human long bones</td>
<td>91</td>
</tr>
</tbody>
</table>
I E Lagaris, A Likas, D I Fotiadis and C V Massalas
A hardware implementable non-linear method for the solution of ordinary, partial
and integrodifferential equations

T Miloh and P A Tyvand
Initial free convection about an isothermal sphere in a porous medium

Zdislaw Naniewicz and Panagiotis D Panagiotopoulos
Optimality conditions for some nonconvex problem related to liquid crystals with
variable degree of orientation

A C Payatakes, G N Constantinides and M S Valavanides
Hierarchical theoretical models: an informal introduction

SECTION C: Mathematical theory of multiple scattering

Christodoulos Athanasiadis and Ioannis G Stratis
On the scattering of electromagnetic waves by a piecewise homogeneous chiral
obstacle

A Charalambopoulos, G Dassios and M Hadjinicolaou
Bispherical geometry in multiple scattering

Drossos Gintides and Kiriakie Kiriaki
Multiple scattering of elastic waves by sphere configurations

Erdogan S Suhubi
Equivalence transformations for one-dimensional wave equations
