Chapter 1

Introduction to Mobile Agents 1

1.1 What's a Software Agent? 1
1.2 What's a Mobile Agent? 2
1.3 Seven Good Reasons for Using Mobile Agents 3
1.4 Network Computing Paradigms 5
  1.4.1 Client-Server Paradigm 6
  1.4.2 Code-on-Demand Paradigm 6
  1.4.3 Mobile Agent Paradigm 6
1.5 Mobile Agent Applications 8
1.6 Application Example: Tabican 9
1.7 Contemporary Mobile Agent Systems 11
1.8 Mobile Agent Standardization: MASIF 13
1.9 Summary 14
Chapter 2  Elements of a Mobile Agent System  17
2.1  Agent and Place  17
   2.1.1  Agent  17
   2.1.2  Place  19
2.2  Agent Behavior: Creation and Disposal  21
2.3  Agent Behavior: Transfer  22
   2.3.1  Dispatching an Agent  23
   2.3.2  Receiving an Agent  24
   2.3.3  Agent Class Transfer  24
2.4  Communication  25
2.5  MASIF: MAFAgentSystem and MAFFinder  26
   2.5.1  The MAFAgentSystem Interface  27
   2.5.2  The MAFFinder Interface  29
2.6  Summary  30

Chapter 3  Mobile Agents with Java  33
3.1  Agent Characteristics of Java: Benefits  33
   3.1.1  Platform Independence  34
   3.1.2  Secure Execution  34
   3.1.3  Dynamic Class Loading  34
   3.1.4  Multithread Programming  34
   3.1.5  Object Serialization  35
   3.1.6  Reflection  35
3.2  Agent Characteristics of Java: Drawbacks  35
   3.2.1  Inadequate Support for Resource Control  35
   3.2.2  No Protection of References  36
   3.2.3  No Object Ownership of References  36
   3.2.4  No Support for Preservation and Resumption of the Execution State  36
3.3  Mobile Java Agent: The Aglet Model  36
   3.3.1  Basic Elements  37
   3.3.2  The Aglet Event Model  40
   3.3.3  The Aglet Communication Model  41
3.4  Aglet Package  42
   3.4.1  Aglet Class  42
   3.4.2  AgletProxy Interface  44
   3.4.3  AgletContext Interface  45
   3.4.4  Message Class  46
   3.4.5  FutureReply Class  47
   3.4.6  AgletID Class  47
3.5  Aglet Example: Remote File Update  47
3.6  Summary  50
Chapter 4  Anatomy of an Aglet  51

4.1 Creation  52
4.2 Aglet Disposal  54
4.3 Delegation-Based Event Model  56
4.4 Cloning  57
4.5 Aglet Mobility  59
  4.5.1 Dispatching  60
  4.5.2 Retracting  62
4.6 Persistence  65
4.7 Events  68
  4.7.1 CloneEvent  68
  4.7.2 MobilityEvent  69
  4.7.3 PersistencyEvent  69
4.8 Aglet Example: Directory Listing  70
4.9 Summary  71

Chapter 5  Aglet Context  73

5.1 Aglet Creation  74
  5.1.1 Code and Code Base  75
  5.1.2 Code Base and Class Mobility  77
  5.1.3 Initialization Argument  78
5.2 Proxy Retrieval  79
  5.2.1 Proxy Iterator  79
  5.2.2 Getting a Local Proxy  80
  5.2.3 Getting Remote Proxy  82
5.3 Aglet Retraction  83
5.4 Context Properties  86
5.5 Aglet Example: Directory Listing  87
5.6 Summary  89

Chapter 6  Aglet Messaging  91

6.1 Simple Messaging  91
6.2 The Message Class  93
  6.2.1 Message Creation  94
  6.2.2 Receiving Messages  96
  6.2.3 Replying to Messages  97
6.3 Getting the Reply  100
  6.3.1 Synchronous Messaging  100
  6.3.2 Asynchronous Messaging  101
6.4 Message Management  103
  6.4.1 Serialized Message Handling  104
  6.4.2 Message Priorities  105
Chapter 9  Inside Aglets  153
9.1 Architectural Overview  153
  9.1.1 Core Framework  154
  9.1.2 Management Components  155
  9.1.3 Communication Layer  155
9.2 Aglet Object Structure  156
9.3 Initialization and Serialization of Aglets  158
  9.3.1 Initialization of Aglets  158
  9.3.2 Serialization and Object Mobility  159
9.4 Class Loading and Transfer  161
  9.4.1 Class Loading  161
  9.4.2 Class Transfer  162
  9.4.3 Class Resumption and Evolution  164
  9.4.4 Other Considerations of Class Mobility  165
9.5 Communication Layer  166
  9.5.1 Communication API  166
  9.5.2 Agent Transfer Protocol  167
9.6 Summary  168

Chapter 10  Aglet Security  171
10.1 What Can Go Wrong?  171
10.2 Taxonomy of Attacks  172
  10.2.1 Passive Attacks  173
  10.2.2 Active Attacks  174
10.3 Security Services  176
10.4 When You Cannot Protect Your Agents: What Is Possible and What Is Not  177
  10.4.1 Agent Execution  178
  10.4.2 Information That Is Secret to Servers  179
  10.4.3 Information Secret from Other Agents  180
10.5 When You Cannot Trust Incoming Agents  180
  10.5.1 Agent Masquerading as a Trusted User  180
  10.5.2 Agent Is Tampered With  181
  10.5.3 Agent Exceeds Its Authority and Harms the Server  181
10.6 Security Model 181
  10.6.1 Principals 182
  10.6.2 Permissions 183
  10.6.3 Protections 184
  10.6.4 Policy and Authority 184
10.7 Summary 185

Appendix The Aglet API Documentation 187
  A.1 com.ibm.aglet Package 187
  A.2 com.ibm.aglet.event Package 203
