Proceedings of the Eighteenth Annual ACM Symposium on Principles of Distributed Computing

Atlanta, Georgia, USA
May 3–6, 1999

Sponsored by:
ACM Special Interest Group for Algorithms and Computation Theory
ACM Special Interest Group for Operating System Principles
# TABLE OF CONTENTS

## Regular Presentations

### Session 1

- Optimal and Efficient Clock Synchronization Under Drifting Clocks  
  Rafail Ostrovsky and Boaz Patt-Shamir .............................................. 3
- Analysis of Timing-Based Mutual Exclusion with Random Times  
  Eli Gafni and Michael Mitzenmacher ................................................. 13
- A Simple Local-Spin Group Mutual Exclusion Algorithm  
  Patrick Keane and Mark Moir .......................................................... 23

### Session 2

- Rollback-Dependency Trackability: Visible Characterizations  
  Roberto Baldoni, Jean-Michel Hélary and Michel Raynal ......................... 33
- Optional Locking Integrated with Operational Transformation in Distributed Real-Time Group Editors  
  Chengzheng Sun and Rok Socič .......................................................... 43
- Matching Events in a Content-based Subscription System  
  Marcos K. Aguilera, Robert E. Strom, Daniel C. Sturman, Mark Astley and Tushar D. Chandra ................................................................. 53

### Session 3

- Liveness-preserving Simulation Relations  
  Paul C. Attie ....................................................................................... 63
- A Knowledge-Theoretic Analysis of Uniform Distributed Coordination and Failure Detectors  
  Joseph Y. Halpern and Aleta Ricciardi ............................................... 73
- Flash Mixing  
  Markus Jakobsson ................................................................................ 83

### Session 4

- Long-Lived Renaming Made Adaptive  
  Yehuda Afek, Hagit Attiya, Arie Fouren, Gideon Stupp and Dan Touitou ........ 91
- Fast, Wait-Free $(2k - 1)$-Renaming  
  Yehuda Afek and Michael Merritt ......................................................... 105
Session 5

Scalable Concurrent Priority Queue Algorithms
Nir Shavit and Asaph Zemach ....................................................... 113

Wait-Free Synchronization in Multiprogrammed Systems: Integrating Priority-Based and
Quantum-Based Scheduling
James H. Anderson and Mark Moir ............................................. 123

Sequentially Consistent versus Linearizable Counting Networks
Marios Mavronicolas, Michael Merritt and Gadi Taubenfeld .................. 133

Session 6

Decentralized Replicated-Object Protocols
Peter J. Keleher ................................................................. 143

LOTEC: A Simple DSM Consistency Protocol for Nested Object Transactions
Peter Graham and Yahong Sui ..................................................... 153

Timed Consistency for Shared Distributed Objects
Francisco J. Torres-Rojas, Mustaque Ahamad and Michel Raynal .............. 163

Session 7

Comparison of Initial Conditions for Distributed Algorithms in Anonymous Networks
Naoshi Sakamoto ................................................................. 173

Computing Anonymously with Arbitrary Knowledge
Paolo Boldi and Sebastiano Vigna ............................................. 181

Backward Consistency and Sense of Direction in Advanced Distributed Systems
Paola Flocchini, Alessandro Roncato and Nicola Santoro ...................... 189

Session 8

Memory Space Requirements for Self-Stabilizing Leader Election Protocols
Joffroy Beauquier, Maria Gradinariu and Colette Johnen ..................... 199

Optimal Reactive k-Stabilization: The Case of Mutual Exclusion
Joffroy Beauquier, Christophe Genolini and Shay Kutten .................... 209

Session 9

A Faster Distributed Algorithm for Computing Maximal Matchings Deterministically
Michal Hańćkowiak, Michal Karoński and Alessandro Panconesi ............... 219

Resource Discovery in Distributed Networks
Mor Harchol-Balter, Tom Leighton and Daniel Lewin ........................ 229

The Complexity of End-to-End Communication in Memoryless Networks
Micah Adler and Faith Fich ...................................................... 239
Session 10

Fast Set Agreement in the Presence of Timing Uncertainty
Dimitris Michailidis .......................................................... 249

On k-set Consensus Problems in Asynchronous Systems
Roberto DePrisco, Dahlia Malkhi and Michael K. Reiter .................. 257

Brief Announcements

Poster Session

Brief Announcement: A Design of a Protocol for Detecting an Agent clone in Mobile
Agent Systems and its Correctness Proof
Jusung Baek, R. S. Ramakrishna and Donk-Ik Lee ............................ 269

Brief Announcement: Mutable Checkpoints: A New Checkpointing approach for Mobile
Computing Systems
Guohong Cao and Mukesh Singhal ........................................... 270

Brief Announcement: Delay-Optimal Quorum-Based Mutual Exclusion for Distributed Systems
Guohong Cao, Mukesh Singhal and Naphtali Rishe .......................... 271

Brief Announcement: The HiMAT Model for Mobile Agent Applications
Marco Cremonini, Andrea Omicini and Franco Zambonelli ................... 272

Brief Announcement: The Sound of Silence — Guessing Games for Saving Energy in
Mobile Environment
Shlomi Dolev, Ephraim Korach and Dmitry Yukelson ........................ 273

Brief Announcement: Fundamental Distributed Protocols in Mobile Networks
Kostas P. Hatzis, George P. Pentaris, Paul G. Spirakis, Vasilis T. Tampakis and
Richard B. Tan ................................................................. 274

Brief Announcement: External Logging on a Logical Ring
Jerry James and Ambuj K. Singh ............................................... 275

Brief Announcement: A Dynamic Self-Stabilizing Algorithm for Finding Strongly
Connected Components
Mehmet Hakan Karaata and Fawaz Al-Anzi .................................... 276

Brief Announcement: Two Classes of Communication Patterns
Ajay D. Kshemkalyani and Mukesh Singhal ................................... 277

Brief Announcement: Dynamically Configurable Distributed Objects
Michael J. Lewis and Andrew S. Grimshaw .................................... 278
Brief Announcement: Optimal, Distributed Decision-Making: The Case of No Communication
Marios Mavronicolas and Paul Spirakis ..................................................279

Brief Announcement: Using CSP to Derive a Sequentially Consistent DSM System
E. Pérez Cortés, G. Roman Alonso and H. Ruíz Barradas .............................. 280

Brief Announcement: Properties of a Family of Booster Types
Gary L. Peterson  ................................................................................ 281

Brief Announcement: Maintenance of a Spanning Tree in Dynamic Network
Avner Porat ................................................................. 282

Brief Announcement: Lower and Upper Bounds for Attacks on Authentication Protocols
Scott D. Stoller ................................................................. 283

Brief Announcement: A Design Methodology for Mobile Distributed Applications
Based on UNITY Formalism and Communication-Closed Layering
Camelia Zlatea and Tzilla Elrad ............................................................ 284

Author Index ............................................................................. 285
