Electrostatics 1999

Edited by D M Taylor, University of Wales, Bangor, UK

Institute of Physics Conference Series Number 163
Institute of Physics Publishing, Bristol and Philadelphia
Contents

Preface xiii

Bill Bright Memorial Lecture 1
Electrostatics—then, now and maybe
D K Davies 3

Section A. Fundamental physics 11
Spectroscopy and calorimetry of the spark discharge
Z Kucerovsky, W D Greason and M Wm Flatley 13

Surface-wave mechanism for the phenomenon of passive insulator charge elimination
T S Lee 17

Distortion of a water surface stressed by a perpendicular, alternating electric field
J A Robinson, M A Bergougnou, G S P Castle and I I Inculet 23

Evidence of bipolar corona emission from a DC point
T S Lee and G Touchard 27

Charge density of a high-velocity electrified jet of diesel oil
A Sélenou Ngomsi, H Romat and K Baudry 33

Pulsed streamer discharge in water through a pin hole of insulating plate
M Sato, Y Yamada and B Sun 37

Modelling the electrical conductivity of two-phase composite materials
N Harfield, J R Bowler and G C Stevens 41

About a thermodynamical approach for capacitor relaxation current
L C Bassani and L D Di Lillo 45

Streamer properties in air and in the presence of insulators
N L Allen and P N Mikropoulos 49

Corona discharge from a metal filamentary particle and its motion within parallel plate electrodes
K Asano, T Yamaki and K Yatsuzuka 53

Discussion 57
Section B. Bioelectrostatics

Positioning, levitation and separation of biological cells
WM Arnold

Single Cryptosporidium oocyst isolation and capture using a travelling-wave dielectrophoresis device
A D Goater, R Pethig, C A Paton and H V Smith

Characterization of the dielectrophoretic movement of DNA in micro-fabricated structures
D Bakewell, H Morgan and J J Milner

Electrostatic properties of metered dose inhalers
J Peart and P R Byron

Dielectrophoretic measurements of sub-micrometre latex particles following surface modification
M P Hughes, M F Flynn and H Morgan

Electrorotation of oocysts of Cyclospora cayetanensis
C Dalton, R Pethig, C A Paton and H V Smith

Sub-micrometre AC electrokinetics: particle dynamics under the influence of dielectrophoresis and electrohydrodynamics
N G Green, A Ramos, H Morgan and A Castellanos

Discussion

Section C. Atomization and EHD

Electrostatic atomization—questions and challenges
A J Kelly

Viscosity effect on electrohydrodynamic (EHD) spraying of liquids
A Jaworek, W Machowski, A Krupa and W Balachandran

Scaling laws for droplet size and current produced in the cone-jet mode
R P A Hartman, D J Brunner, K B Geerse, J C M Marijnissen and B Scarlett

Electrostatic atomization of an ultra-fine spray of ceramic solution
P Miao, Z A Huneiti, W Machowski, W Balachandran, P Xiao and J R G Evans

Analysis of charged plumes with Coulomb repulsion
P A Vázquez, A T Pérez and A Castellanos

Enhancement of heat transfer and mass transport in thermal equipment with electrohydrodynamics
J Seyed-Yagoobi and J E Bryan

Flow electrification in high-power transformers
G Touchard, G Artana and O Moreau
Fluid flow driven by AC electric fields in microelectrodes
A Ramos, A González, A Castellanos, H Morgan and N G Green
137

Global instabilities in an electrified jet
G Artana and B Seguin
141

Study of the changes in the flow around a cylinder caused by electroconvection
G Artana, G Desimone and G Touchard
147

A new method of analysing electro-osmosis
S Watanabe, Y Hobo, N Hayashi, T Sumi, D Dykes and G Touchard
153

Transient electrohydrodynamic stability of dielectric liquids subjected to unipolar injection
R Chicón, A Castellanos and A T Pérez
157

Effect of an electric field on the response of a liquid jet to a pulse-type perturbation
G Artana and B Seguin
161

Drop charging during liquid dispersion
Y Wang and A G Bailey
167

Nonlinear stability of an electrified liquid jet
K Baudry, H Romat and A Sélémou Ngomsi
171

Asymptotic variation of radius of a viscous polymer jet in the electrospinning process
A F Spivak and Y A Dzenis
175

Experimental study of a jet of conducting liquid subjected to a radial DC field
H González, P Atten and K Chouman
179

Discussion
183

Hot topic discussion
187

MECA electrometer: initial calibration experiments
M Buehler, L-J Cheng, O Orient, M Thelen, R Gompf, J Bayliss and J Rauwerdink
189

Section D. Hazards
197

Electrostatic ignition hazards associated with flammable substances in the form of gases, vapours, mists and dusts
M Glor
199

Large-scale chemical plants: eliminating the electrostatic hazards
G R Astbury and A J Harper
207

Modelling the electrostatic ignition hazards associated with the cleaning of tanks containing flammable atmospheres
T J Williams and R T Jones
211
Fuzzy logic in electrostatics—hazard assessment
_E Balog and I Berta_ 215

Dust cloud ignition by electrostatic discharges and the mythology of minimum ignition energy—do we know enough?
_J M Smallwood_ 221

The high-resolution microcomputer system for recording of electrostatic discharges
_L Ptasiński, T Žegleńi and J Gajda_ 225

Flow electrification through porous media
_T Paillat, E Moreau and G Touchard_ 229

Incendivity of electrostatic discharges in dust clouds: the minimum ignition energy problem
_M Bailey, P Hooker, P Caine and N Gibson_ 233

Discussion 239

Section E. Applications and processing 241

Bipolar spray charging for enhanced deposition onto nonconductive and electrically isolated targets
_S E Law, S C Cooper and W B Law_ 243

Marking with electrostatics
_D A Hays_ 249

Enhancement of transfer efficiency and appearance in automotive powder coating
_M K Mazumder, R A Sims, D L Wankum, T Chasser, N Grable, W Chok, S Robbins, W Gao and G Tebbetts_ 253

Factors influencing operational efficiency of an electrostatic solvent extraction system
_M J Reeves, A G Bailey, A G Howard and C J Broan_ 257

Electric field interaction with debris generated by laser ablation of polyimide films
_C J Hayden, R Pethig and J P H Burt_ 261

An experimental study on the possible use of the corona discharge in water treatment
_J Winkler, N Karpel Vel Leitner and H Romat_ 265

Physico-dynamics in electro-atomizer modelling
_S Viswanathan, H C Loy, K K Loh, N V Ananthanaryanan and W Balachandran_ 269

Cleaning of dusty gases by pulse corona in the laboratory
_M Nifuku, E Kiss, I Jenei, M Horváth and H Katoh_ 275

Streaming current charge versus tribo charge
_R Baur, H-T Macholdt and E Michel_ 285
Neutralization of static surface charges by an AC ionizer in a nitrogen environment
J S Chang, K G Harasym, P C Looy, A A Berezin and C G Noll 289

The influence of flow regime on electrostatic destabilisation of water-in-oil emulsions: a theoretical and experimental assessment
N J Wayth, T J Williams, A G Bailey, M T Thew and O Urdahl 295

New results in ESP modelling
I Kiss, J Suda, N Szedenik and I Berta 299

Electric field and space charge density analysis in an AC charger for small particles
K Adamiak and X Deng 305

Discussion 309

Section F. Materials evaluation and applications 311

Inherently conductive polymers as antistatic agents for textiles
T Derrick, P Kathirgamanathan, M J Toohey and J N Chubb 313

Static electricity dissipation mechanism in carpets containing conductive fibres
W K Fisher 321

Evaluation of charge retention properties of powder paints by thermally stimulated current spectroscopy
T Ogiwara and K Ikezaki 325

The assessment of materials by tribo and corona charging and charge decay measurements
J N Chubb 329

Real-time particle size and electrostatic charge distribution analysis and its applications to electrostatic processes
M K Mazumder, N Grable, Y Tang, S O’Connor and R A Sims 335

Visualization of distribution of electron traps on polymer surface by means of scanning micro laser probe
Y Murata and K Kubota 341

Discussion 345

Section G. ESD/EOS 349

The effect of resistance to ground on human body ESD
D E Swenson 351

Environmental tests of silicon microstrip detector devices for high-energy space applications
P Azzarello and D Vitiè 357
Simple passive transmission line probes for electrostatic discharge measurements
J M Smallwood 363

Multichannel measurement of ESD in silos
L Ptasiński, T Żegleń and A Gajewski 367

Discussion 371

Section H. Scanning probe microscopy 375

Measuring static charges by scanning probe microscopy
D M Taylor and P W C Sayers 377

Quantitative methods for noncontact electrostatic force microscopy
P J S Baird, J R Bowler and G C Stevens 381

Electrostatic effects in mesoscopic quantum systems
S Cunningham, J G Williamson, M Rahman and J M R Weaver 387

Vibrational response of cantilevered beams to piezoelectric drive
N Nenadic and T B Jones 391

Electrostatic Green’s function for corrugated interfaces
K W Yu, H Sun and J T K Wan 395

Multiple degree of freedom model for driven cantilevered beam
N Nenadic and T B Jones 399

The interpretation of tapping mode images of polymer surfaces in atomic force microscopy
J P Llewellyn and P Sayers 403

Discussion 407

Section I. Atmospheric electrostatics and environmental aspects 409

The interaction between air ions and aerosol particles in the atmosphere
K L Aplin and R G Harrison 411

On the effects of wind on the space charge formation in the atmospheric surface layer
S Israelsson 415

Study of indoor aerosol removal with electrospray
V Smorodin, W Balachandran and C Hudson 421

Studies of aerosol deposition on a charged spherical collector
A Jaworek, K Adamiak, A Krupa and G S P Castle 425

Discussion 429
Section J. Instrumentation

Using the electrostatic super corona gun and electrostatic powder coating diagnostic instrument (EPCDI) to measure the thickness and adhesion of powder coated substrate
*B Makin and K Dastoori*

Surface charge distribution mapping of insulating materials
*J L Davidson and A G Bailey*

Experience with electrostatic fieldmeter instruments with no earthing of the rotating chopper
*J N Chubb*

Second generation of electrostatic powder coating diagnostic instrument
*B Makin and K Dastoori*

A system for obtaining high-resolution macroscopic surface charge density distributions on contoured axisymmetric insulator specimens
*D C Faircloth and N L Allen*

Electrostatic mass air flow meter
*W Balachandran, W Machowski and W Horner*

In-line continuous flow measurement of pneumatically conveyed solids using electrostatic sensors
*Y Yan and J Ma*
