UNITECR '99

Unified International Technical Conference on Refractories

PROCEEDINGS

6th Biennial Worldwide Congress

in conjunction with the
42\textsuperscript{nd} International Colloquium on Refractories

Refractories 2000

BERLIN - Germany
6 - 9 September 1999
## Contents

**Preface**

XIII

**Our Mandate is Innovation**

Edelgard Bulmahn

XV

**Berlin Before the Turn of the Millennium – Linking Yesterday, Today and Tomorrow**

Dieter Ernst

XVII

**Chances and Challenges – Economic and Technical Trends in the Steel Industry**

Dr. Ruprecht Vondran

XXI

**Refractories at the Turn of the Millennium**

Dipl.-Ing. Jakob Aurel Mosser, Dr. Günter Karhut

XXV

**Unshaped Refractories I**

1

**Modern Solution of Refractory Problems with Unshaped Refractories**

Rudolf Krebs

1

**High Performance Rapid Installation Monolithics**

Isabelle Masson, P. Atkinson, F. Etienne

6

**Modelling and Design of an Anchored Refractory Lining**

Alain Gasser, C. Andrieux, P. Boisse, Y. Dutheillet, V. Gabis, J. Rousseau

10

**Experience with Alumina-MgO (Spinel Forming) Precast Shapes in Steel-Plant Applications**

Francis W. Henry, J. W. Stendera

13

**Unshaped Refractories II**

19

**An Approach to Formulate Spinel Forming Castables**

Christopher D. Parr, Thomas A. Bier, Michel Vialle, Catherine Reveis

19

**Influence of Microsilica Addition on the Properties of Alumina-Spinel Castables**

Yung-Chao Ko

22

**Microstructural Studies on Binding Systems of Self-Flowing Refractory Castables**

Florin Esanu, T. Troczynski, G. Oprea

26

**Effect of Pozzolanic Metakaolin on the Rheology and Properties of Advanced Refractory Castables**

Tomas Richter, Thomas Vezza

33

**Coke and Iron I**

37

**Alkali Attack on Materials for the Hearth of a Blast Furnace**

Marcel C. Franken, J. Trouw

37

**Blast Furnace Hearth Damage and Study on Resistance of Carbon Bricks to Molten Iron Permeation**

Dayan Peng, Yankui Bian, Qiuying Su, Hongjie Wen, Xueqing Yu

42

**First Industrial Results of Monolithic Stave-Cooler Linings in Blast Furnace**

Russell L. Avis, Marc Gondolf, Daniel Lao, Jean-Louis Eymond

45

**Refractory Selection for Blast Furnace Tap Hole at CSN (Brazil)**

48

**Coke and Iron II**

49

**Hybrid Tap-Hole Mix Material**

Jürgen Schütz, Thomas Dünnes, K. Shiraishi, F. Inoue, N. Honda

49
Application of High Density Tap Hole Mix to Blast Furnaces 52
Masakazu Iida, Fumihiko Samukawa, Kazuhiro Ogura, Yasunobu Toritani, Nobuaki Muroi, Seijirou Tanaka

Development of a New Binding System for Low Liquid, Environmentally Friendly Taphole Clay 55
Max Tondeur, Marc Gondolf, Jean-Pierre Radal

Development of High Durability Tap-Hole Mix for Blast Furnace 59
Masatsugu Kitamura, R. Nakamura, T. Kaneshige, H. Sumimura, T. Kageyama

Production I 62

Present Status of Refractories Technology and Industry in Ex-USSR 62
Nicolai Ilyoukha, Valentina Timofeeva

The State of Arts Refractories in Iran 67
Mohammad R. Nilforoushan, F. Saiedi

Mixing, Granulating, Drying and Cooling under Vacuum of Solvent Containing Press Bodies in One Single Process 68
Marcus Müller

Development of Pore Surface Areas in Synthetic Resin-Bonded Periclase Bricks 72
Josef Suren

Production II 73

Production of Magnesite-Chromite Brick by Regaining the Process Waste in the Basic Refractory Industry 73
Yasemen Kalpakli, Selahattin Gökmen, Serdar Özgen

Planning and Production of Moulds in Tungsten Carbides/MC and or Steel for the Pressing of Refractory Bricks 76
Roberto Bisio

Firing Technology for Refractory Products for the Next Century 78
Jürgen H. Mendheim

Benchmarking a Refractory Industry Quality System 79
Valmy A. G. Oliveira

Unshaped Refractories III 81

LC and ULC Refractory Castables: Reactions within the Fine Component Matrix 81
Ana M. Segadaes, Daniel A. Fumo

The Influence of Aluminas on the Behaviour of CA/CA₂ Cement During Hydration and Thermal Treatment 86
Steffen Möhmel, Wolfgang Gessner, D. Müller, Thomas Bier

Use of Microsilica in a Lightweight Self-Flowing Refractory Castable 90
Heidi Feldborg, B. Myhre

Permeability of High-Alumina Self-Flow Refractory Castables 93
Víctor C. Pandolfelli, M. D. M. Innocentini, A. R. F. Pardo

Unshaped Refractories IV 97

Properties of MgO Castables and Effect of Reaction in Microsilica-MgO Bond System 97
Nan Li, Yaowu Wei, Hongpeng Wu, B. Myhre, C. Odegard

Development of Accerelators for Refractory Gunning Mix 102
Yasuhiro Eguchi, Nobuyuki Takahashi, Makoto Ishikawa, Koji Watanabe

Effect of Chemical Admixtures on the Room Temperature Air Permeability of a Vibratable High Alumina Castable 105
José M. Soto, J. D. Smith, Robert E. Moore, Thomas J. Kirchoff

Modelling of the Thermal Behaviour of Refractory Castables During Dewatering 106
Mariano Velez, A. Erkal, T. P. Sander, J. D. Smith, R. E. Moore

Thermomechanical Computations of Refractory Structure. Improvement due to the Modelling of the Dehydration Process in High Alumina Castable 107
J. F. Hernandez, Nicolas Schmitt, P. Meunier, Jacques Poirier

Study of the Thermomechanical Properties of Fibre Reinforced Refractory Concrete in Plastic Range 110
Jaroslav Kutzendörfer, V. Nevyhosteny
