4th International Conference on

GAS DISCHARGES

7 - 10 September 1976

Organised by the
Science, Education and Management Division of
the Institution of Electrical Engineers

in association with the
Institute of Electrical and Electronics Engineers
(United Kingdom and Republic of Ireland Section)
Institute of Physics
Institution of Electronic and Radio Engineers
Welding Institute

Venue
University College of Swansea, Singleton Park, Swansea
          Formation of the HF point-discharge

8    D. R. Airey, P. H. Richards and J. D. Swift
          Anomalous electrical conductivity enhancement in very high current SF$_6$ arcs

63   D. R. Airey and R. J. Urwin
          Energy balance of a high current SF$_6$ interrupter arc

212  T. E. Allibone and D. Dring
          Impulse corona development in a rod/plane gap

264  R. B. Anderson, A. J. Eriksson and H. Kröninger
          Lightning and tall structures: some preliminary observations

352  D. Andersson
          The first derivative method—a probe method which seems to have been overlooked

372  E. I. Asinovsky, A. A. Afanasjev and E. P. Pakhomov
          Experimental investigation of instability of wall-stabilized high pressure arc column in magnetic field

376  E. I. Asinovsky, E. P. Pakhomov and I. M. Yartsev
          Argon plasma viscosity measurements

354  J. M. Baronnet, J. Rakowitz, P. Fauchais and J. F. Coudert
          Selective excitation of nitrogen by argon atomic metastable

303  G. J. Bauer and R. Holmes
          Ion energy distributions in high current vacuum arcs

279  E. M. Bazelyan, M. V. Burmistrov, V. I. Levitov and O. V. Volkova
          Electric discharge in long air gaps with slightly non-uniform electric field

268  G. Berger
          Electrode phenomena during the final jump of long sparks

105  G. Berger and M. Goldman
          Dielectrics degradation under corona discharges

98   S. Berger
          Breakdown field gradients in compressed air

Contents

Page No.  166  I. D. Chalmers and J. Thom
Conditioning effects in pressurized spark gaps

52  A. Chapman, G. R. Jones and D. C. Strachan
Current zero electric field measurements in gas blast circuit breaker arcs

366  G. Cicconi and C. Rosatelli
Ionization waves excited by microwaves in noble gas positive columns

404  P. F. Clancy, J. L. Clark and R. G. Earl
Electrodeless RF discharges in argon-hydrogen gas mixtures

133  R. Coates, J. Dutton and F. M. Harris
The electrical breakdown of high-pressure gases at high electric fields

117  B. H. Crichton, O. E. Ibrahim and O. Farish
The dependence of breakdown voltage in SF₆ mixtures on electrode-surface roughness

199  B. H. Crichton, D. I. Lee and D. J. Tedford
Prebreakdown in compressed SF₆ and SF₆/N₂ mixtures in projection perturbed uniform fields

295  S. J. Dale
Breakdown in sparkgaps containing an isolated metallic body

242  R. C. Davidson, B. R. Lynch and O. Farish
Corona and breakdown in N₂/SF₆ and N₂/O₂ mixtures in static and flowing gas

176  A. J. Davies, K. E. Donne and C. J. Hill
Edge breakdown in electro-negative gases between uniform-field electrodes

141  A. J. Davies, C. J. Evans, P. Townsend and P. M. Woodison
The numerical simulation of axially symmetric discharges between plane parallel electrodes

90  K. Dimoff, D. Souilhac, B. Jean and A. Sharah
Electrode ablation and the arc phase of the spark discharge

109  B. E. Djakov
Space charge dynamics and the reignition of low-current electric arcs near current zero

315  B. E. Djakov and V. Bakardjieva
Electric characteristics of a magnetically driven arc on circular electrodes
Page No. 216 S. El-Debeiky
On the formation mechanisms of positive and negative glow coronas

102 V. G. Endean
Cathode voltage of the stable cold cathode arc

191 M. Ermel
Electron emission currents in compressed SF$_6$ in the coaxial cylindrical field

311 W. G. Essers and G. Jelmorini
Electrode phenomena in a thermally ionized gas

5 M. T. C. Fang, S. K. Chan and R. D. Wright
Theoretical investigation of steady state nozzle arcs

319 J. Freisinger, W. Altenburg and H. W. Loeb
Investigation of the beam of the rf-ion thruster RIT 10

113 E. Gockenbach
Effect of the electrode surface on the breakdown performance of SF$_6$

271 B. N. Gorin, V. I. Levitov and A. V. Shkilev
Distinguishing features of lightning strokes to high construction

274 B. N. Gorin, V. I. Levitov and A. V. Shkilev
Some principles of leader discharge of air gaps with a strong non-uniform field

48 D. M. Grant, J. F. Perkins, L. C. Campbell, O. E. Ibrahim and O. Farish
Comparative interruption studies of gas-blasted arcs in SF$_6$-N$_2$ and SF$_6$-He mixtures

257 P. Greenwood
Infrared radiation from a laboratory discharge

440 A. H. Guenther and J. R. Bettis
Laser-triggered spark gap switches

209 R. Hackam, C. Raja Rao and G. R. Govinda Raju
Electrical breakdown of nitrous oxide

79 B. F. Hampton and H. Gregory
Effect of discharge energy on switching surge breakdown in SF$_6$

195 M. Hayashi
Monte Carlo simulation of electron avalanches
Contents

Page No. 184  S. C. Haydon and A. I. McIntosh
Spatial and temporal studies of pre-breakdown phenomena in gas laser media

386  S. C. Haydon and I. Plumb
Some influences of external circuit parameters on the development of rf discharges

37  A. Holi and Z. Tarocinski
Influence of different parameters on breakdown voltage of the cathode sheath

260  K. Horii
Determination of space charge and potential distributions of long gap discharge by dust figure

283  B. Hutzler and D. Hutzler-Barre
Dielectric breakdown of gaseous gaps—analytic expression of “S” curves

20  E. Z. Ibrahim and A. D. Stokes
Field gradient measurement in high current ac wall stabilised arcs

227  N. Ikuta and K. Kondo
A spectroscopic study of positive and negative coronas in N_2O_2 mixture

33  T. Inaba and Y. Kito
Voltage gradient-current characteristics of dc stabilized arcs in Ar-N_2 gas mixtures

411  P. C. Johnson and J. E. Allen
Populations in the 6^3P levels in an optically pumped mercury plasma at low pressure

291  B. Jones and J. N. Ross
Simultaneous measurement of current and light in long sparks

239  I. B. Jordan and R. Saint-Arnaud
Electrical corona at ice surface

129  M. M. Kekez and P. Savic
Further support for the hypersonic and Volterra models of spark channel development

24  R. E. Kinsinger and H. O. Noeske
Relative arc thermal recovery speeds in different gases

1  Y. Kito, I. Miyachi and T. Sakakibara
Influence of radiation loss on the stabilized air arc characteristics
Contents

299  D. Klapas, R. Hackam and F. A. Benson
     Power collection for high-speed trains by an electric arc

41  Z. Kolacinski
     Thermal reignition of a-c arc

83  J. Kopainsky and E. Schade
     Investigation of a rotating, magnetically driven SF$_6$ arc

162  A. Kurimoto, A. Aked and D. J. Tedford
     Pre-breakdown phenomena in long non-uniform-field gaps in SF$_6$

307  C. S. Lakshminarasimha, R. Oliver and M. R. Barrault
     The influence of fuse strip materials on dc overcurrent arcing phenomena in hrc cartridge fuses

121  R. Le Ny, J. Charrier and A. Boulloud
     Simple models in room air simulating the influence of conducting microrugosity of the electrodes on the breakdown voltage in compressed gases

246  R. Le Ny, A. M. Le Ny and A. Boulloud
     Positive point-to-plane corona discharge: oscillations in Hermstein's glow

425  L. A. Levskhuk and E. V. Chickin
     On rise of the electron beam current control efficiency in the gas discharge electron gun with a hollow anode

169  A. G. Liapin, V. I. Popkov and E. N. Shevtsov
     Positive dc point-to-plane dielectric strength of compressed gases

250  A. G. Liapin, V. I. Popkov and E. N. Shevtsov
     The range and criterion of similarity of dc corona on hyperboloids against plane in pressurized air and SF$_6$

429  F. Llewellyn-Jones
     Some problems of micro-arc discharges

419  E. D. Lozansky
     Theory of the self-sustained discharge of short breakdown time

172  T. Makabe, Y. Ogawa, T. Goto and T. Mori
     Experimental electron energy distributions in Townsend discharges in Neon

203  J. E. Matthews
     Ionisation phenomena in non-uniform field gaps

*Summary only.*
Contents

Page No. 224  E. C. Salthouse, J. Blackett and H. M. Ryan
Effect of humidity on positive glow corona characteristics

145  S. Sangkasaad
Breakdown characteristics of compressed SF$_6$ in concentric spheres field

335  H. Schneider
Stability-limit of a low density discharge in argon

397  J. M. S. Schofield
The physics of gas discharge cells within dc memory display panels

415  A. Shamim and E. R. Wooding
Radiative behaviour of an rf induction plasma torch in a pulsed magnetic field

94  J. C. Sherman, R. Webster, J. E. Jenkins and R. Holmes
The spontaneous formation of cathode spots in high-current triggered vacuum switches and an estimate of the cathode spot current density on copper

349  G. G. Shishkin
The radiation caused by the drift instability in the E-H discharge

287  C. Singarajah and D. J. Harris
The extent of connecting streamers in lightning discharges

346  P. R. Smy
Arc ignition in a low pressure argon plasma

157  G. Spence and H. M. Ryan
Breakdown characteristics in high pressure SF$_6$ for uniform and non-uniform fields

331  P. D. Stephens and J. E. Allen
Axial wall currents in cylindrical metal discharge vessels

75  A. D. Stokes
Post arc current measurements in a low pressure discharge and for gas blast arcs

444  L. Thomas
Plasmas in space

323  S. Torvén and M. Babić
Current limitation in low pressure mercury arcs

379  Y. Vitel, M. Skowronek and M. M. Popović
Spectroscopic study of dense plasmas of Argon and Xenon produced in flashtubes
Page No. 59 A. E. Vlastós and S. Rusck
The influence of a thin electrode coating on the ac breakdown of SF₆

29 B. von Rein and W. Rother
A simple model for calculating the dielectric breakdown in a decaying arc column

56 H. L. Walmsley, G. R. Jones, F. H. Haji and D. C. Strachan
Arc core variations in a circuit breaker test head

71 R. T. Waters and W. B. Stark
Suppression of corona on line conductors in air

153 W. L. Watson and H. M. Ryan
Breakdown and voltage-time characteristics in SF₆ for voltages in the range 0.6-2MV
