## PREFACE

## 1 HYPERBOLIC FIXED POINTS OF DIFFEOMORPHISMS AND THEIR STABLE AND UNSTABLE MANIFOLDS

1.1 Examples of Diffeomorphisms

1.2 Definition and Examples of Hyperbolic Fixed Points

1.3 Definition of Stable and Unstable Manifolds

1.4 The Saddle-Point Property

1.5 Smoothness of the Local Stable Manifold

1.6 Diffeomorphisms depending on a Parameter

## 2 HYPERBOLIC SETS OF DIFFEOMORPHISMS

2.1 Definition of Hyperbolic Set

2.2 Boundedness of the Projection

2.3 Continuity of the Projection

2.4 Exponential Dichotomies for Difference Equations

2.5 Expansivity Property of Hyperbolic Sets

2.6 Roughness of Hyperbolic Sets

## 3 TRANSVERSAL HOMOCLINIC POINTS OF DIFFEOMORPHISMS AND HYPERBOLIC SETS

3.1 The Hyperbolic Set associated with a Transversal Homoclinic Point

3.2 The Construction of Diffeomorphisms with Transversal Homoclinic Points

3.3 An Example from Differential Equations
9 SHADOWING THEOREMS FOR HYPERBOLIC SETS OF DIFFERENTIAL EQUATIONS 187

9.1 The Discrete Shadowing Theorem 187
9.2 The Continuous Shadowing Theorem 198
9.3 More on the Roughness of Hyperbolic Sets 206
9.4 Asymptotic Phase for Hyperbolic Sets 218

10 SYMBOLIC DYNAMICS NEAR A TRANSVERSAL HOMOCLINIC ORBIT OF A SYSTEM OF ORDINARY DIFFERENTIAL EQUATIONS 225

11 NUMERICAL SHADOWING 241

11.1 Finite Time Shadowing for Maps 241
11.2 Periodic Shadowing for Maps 248
11.3 Finite Time Shadowing for Differential Equations 255
11.4 Periodic Shadowing for Differential Equations 263
11.5 Rigorous Verification of Chaotic Behaviour 270
