Materials Research Society Symposium Proceedings .................. xviii

CARBON NANOTUBES: GROWTH

"Mechanisms of Single-Wall Carbon Nanotube Growth by the Laser Vaporization Technique: In Situ Imaging and Spectroscopy .............. 3

Synthesis of Multiwalled Carbon Nanotubes .............................. 15
David Jacques, Stephane Villain, Apparao M. Rao, Rodney Andrews, Frank Derbyshire, Elizabeth C. Dickey, and Dali Qian

Synthesis of C60 Chains Contained Within Carbon Nanotubes .......... 21
Brian W. Smith and David E. Luzzi

Multi- and Single-Walled Boron Nitride Nanotubes Produced From Carbon Nanotubes by a Substitution Reaction .......................... 27
D. Golberg, Y. Bando, W. Han, L. Bourgeois, K. Kurashima, and T. Sato

Twisting of Single-Walled Carbon Nanotube Bundles .................... 33
Lu-Chang Qin and Sumio Iijima

Aligned Carbon Nanotubes Via Microwave Plasma Enhanced Chemical Vapor Deposition ......................................................... 39

Effect of Catalyst Supports in the Synthesis of Graphite Nanostructures ................................................................. 45
P.E. Anderson and N.M. Rodriguez

Diameter Control in the Formation of Single-Wall Carbon Nanotubes .......... 51
Rahul Sen, Y. Ohtsuka, T. Ishigaki, D. Kasuya, S. Suzuki, H. Kataura, and Y. Achiba

*Invited Paper
Coalescence of $C_{60}$ Molecules in Fullerite by Intense Femtosecond Laser Pulses: An Ab Initio Simulation ...................................................... 57
A. Gambirasio, M. Bernasconi, G. Benedek, and P.L. Silvestrelli

Film Formation Behavior of the Endohedral Metallofullerene Dy@$C_{82}$ ................. 63
Houjin Huang and Shihe Yang

A Surface Diffusion Model for Nanotube Growth .............................................. 69
Oleg A. Louchev and Yoichiro Sato

*Synthesis and Characterization of Cluster-Assembled Carbon Films ..................... 75
P. Milani, P. Piseri, E. Barborini, and A. Podestà

Bulk Synthesis of Nanotube-Like Carbon Material ............................................. 87
Michael Jacob, Ulrik Palmqvist, Peter Alberius-Henning,
and Thommy Ekström

Novel Silica-Sol Mediated Synthesis of Nanoporous Carbons ............................... 93
Taeghwan Hyeon, Sangjin Han, and Kwonnam Sohn

NANOTUBES: STRUCTURE AND CHARACTERIZATION

The Vibrational Density-of-States of Nanobundles of Single Wall Carbon Nanotubes: An Inelastic Neutron Scattering Study .......................... 101
S. Rols, Z. Benes, J.L. Sauvajol, P. Papanek, E. Anglaret,
G. Coddens, A.J. Dianoux, and J.E. Fischer

On the Raman Spectrum of Nanobundles of Single Wall Carbon Nanotubes ................ 107
L. Alvarez, A. Righi, S. Rols, E. Anglaret, and J.L. Sauvajol

Resonance Raman Scattering of Multi-Walled Carbon Nanotubes .......................... 113
H. Kataura, Y. Achiba, X. Zhao, and Y. Ando

Cutting Single Wall Carbon Nanotubes ............................................................ 119
I. Stepanek, G. Maurin, P. Bernier, J. Gavillet, and A. Loiseau

Purification and Characterization of Single-Walled Carbon Nanotubes .................... 123
H.Y. Kim, W.B. Choi, N.S. Lee, D.S. Chung, J.H. Kang,
I.T. Han, J.M. Kim, M.H. Moon, and J.S. Kim

*Invited Paper
Direct Observation of Intercalant and Catalyst Particle in Single
Wall Carbon Nanotubes ................................................. 129
X. Fan, E.C. Dickey, P. Eklund, K. Williams, L. Grigorian,
A. Puretzky, D. Geohegan, R. Buczko, S.T. Pantelides, and
S.J. Pennycook

Isomeric Higher and Smaller Fullerenes: A Profound Enthalpy/
Entropy Interplay ......................................................... 135
X. Zhao, Z. Slanina, and E. Osawa

NANOTUBES: ELECTRONIC AND
MECHANICAL PROPERTIES

Electronic Structures of Single-Walled Carbon Nanotubes Studied
by NMR ................................................................. 143
X-P. Tang, A. Kleinhammes, H. Shimoda, L. Fleming,
K.Y. Bennoune, C. Bower, O. Zhou, and Y. Wu

Formation of Nanotube-Based Quantum Dots With Strain and
Addimers ............................................................... 149
D. Orlikowski, M. Buongiorno Nardelli, J. Bernholc, and
C. Roland

Inelastic Deformations in Multi-Walled Carbon Nanotubes .................... 155
D. Tekleab, R. Czerw, A. Rubio, P.M. Ajayan, and D.L. Carroll

Electronic Properties of Potassium-Doped Carbon Nanotube Lattice .......... 161
Susumu Saito

Alkali-Metal Containing Amorphous Carbon: Reactivity and
Electronic Structure .................................................... 167
M. Töwe, P. Reinke, and P. Oelhafen

Effect of Gas Adsorption on the Electrical Properties of
Single-Walled Carbon Nanotubes Mats .................................. 173
C. Marliere, P. Poncharal, L. Vaccarini, and A. Zahab

Study of Carbon Nanotubes Under High Pressure ............................. 179
J. Tang, L.C. Qin, A. Matsushita, T. Kikegawa, M. Yudasaka,
S. Bandow, and S. Iijima
NANOTUBES: APPLICATIONS

Hydrogen Storage in Single-Walled and Multi-Walled Carbon Nanotubes .................................................. 187
Seung Mi Lee, Thomas Frauenheim, Marcus Elstner, Yong Gyoo Hwang, and Young Hee Lee

Synthesis of Novel Mesoporous Carbons and Their Applications to Electrochemical Double-Layer Capacitors .................. 193
Taeghwan Hyeon, Seung M. Oh, Jinwoo Lee, and Songhun Yoon

Molecular Dynamics Simulations of Polymer-Nanotube Composites .................. 199
S.J.V. Frankland and D.W. Brenner

FIELD EMISSION

*Low Threshold Field Emission From Nanocluster Carbon Films .................. 207
W.I. Milne, B.S. Satyanarayana, and J. Robertson

Fabrication and Field Emission Properties of Carbon Nanotube Cathodes ........... 215

Field Emission and Nanostructure of Carbon Films .................. 221
V.I. Merkulov, D.H. Lowndes, and L.R. Baylor

Electron Field Emission Characterization of Nanocrystalline Diamond Thin Film Cold Cathode Devices .................. 227
B.L. Weiss, A. Badzian, L. Pilione, T. Badzian, W. Drawl, and G. Morell

Low Temperature Growth of Ultra-Nanocrystalline Diamond on Glass Substrates for Field Emission Applications .................. 233

AMORPHOUS CARBON: GROWTH

*Hydrogenated Amorphous Carbon Deposition by Saddle-Field Glow Discharge .................................................. 239
S. Zukotynski, F. Gaspari, D. Manage, V. Pletnev, and E. Sagnes

*Invited Paper
Filtered Cathodic Arc Deposited Diamond-Like Carbon: Electron Spin Resonance (ESR) and Raman Spectroscopy ................................................................. 249
  B. Druz, I. Zaritskiy, Y. Yevtukhov, A. Konchits, M. Valakh,
  S. Kolesnik, B. Shanina, and V. Visotski

Plasma Diagnostics During Pulsed Laser Deposition of Diamond-Like Carbon Using Single Crystal Graphite and Amorphous Carbon ........................ 255

Electrostatic Measurement of Plasma Plume Characteristics in Pulse Laser Ablated Carbon .......................................................... 261

Deposition and Annealing Studies of Diamond-Like Carbon Grown by Molecular Beam Deposition .................................................. 267
  Oliver Goetzberger, Nobuaki Kojima, Aurangzeb Khan, and Masafumi Yamaguchi

Direct Ion Beam Deposition of Diamond-Like Films From RF Inductively Coupled (IC) Plasma Source: Mechanical, Electrical, and Optical Properties ..................................................... 273
  B. Druz, I. Zaritskiy, K. Williams, A. Hayes, V.I. Polyakov, A.V. Kchomich, Xiodung Li, and Bharat Bhushan

Rapid Photo-Thermal Chemical Vapor Deposition of Amorphous Carbon From Diiodomethane .......................................................... 279
  M. Lindstam, M. Boman, and K. Piglmayer

Fluorinated Diamond-Like Carbon Films Produced by Plasma Immersion Ion Processing Technique .................................................. 285
  M. Hakovirta, D.H. Lee, X.M. He, and M. Nastasi

AMORPHOUS CARBON: PROPERTIES

Density and sp$^3$ Content in Diamond-Like Carbon Films by X-ray Reflectivity and Electron Energy Loss Spectroscopy ........................................ 293
  A. Libassi, A.C. Ferrari, V. Stolojan, B.K. Tanner, J. Robertson, and L.M. Brown
Raman Signature of Bonding and Disorder in Carbons ................................. 299
A.C. Ferrari and J. Robertson

Oriented Graphitic Carbon Film Grown by Mass-Selected Ion
Beam Deposition at Elevated Temperatures ................................. 305
J. Kulik, G. Lempert, E. Grossman, and Y. Lifshitz

Elastic Constants of Diamond-Like Carbon Films by Surface
Brillouin Scattering ......................................................... 311
A.C. Ferrari, J. Robertson, R. Pastorelli, M.G. Beghi,
and C.E. Bottani

Computing Thin Film Mechanical Properties With the Oliver
and Pharr Method ......................................................... 317
P.J. Wolff, B.N. Lucas, and E.G. Herbert

Fabrication and Characterization of Functionally Gradient
Diamond-Like Carbon Coatings ........................................... 323

Study of Chromium-Doped Diamond-Like Carbon by Z-Contrast
Imaging and Electron Energy Loss Spectroscopy ......................... 329
X. Fan, E.C. Dickey, and S.J. Pennycook

Properties of Ion Beam Deposited Tetrahedral Fluorinated
Amorphous Carbon Films (ta-C:F) ........................................... 335
C. Ronning, R. Merk, H. Feldermann, F. Harbsmeier, and
H. Hofsäss

Characterization and Dielectric Properties of Fluorinated
Amorphous Carbon Measured by Capacitance-Voltage
Response and Spectroscopic Ellipsometry ................................... 341
A.D. Glew and M.A. Cappelli

Fluorine Incorporation Into Hard Amorphous Hydrogenated
Carbon Films Deposited by PECVD ........................................... 347
F.L. Freire, Jr., L.G. Jacobsohn, and D.F. Franceschini

Structure and Photoluminescence of Hydrogenated Amorphous
Carbon Films Produced by Using Aromatic Hydrocarbon Source ........... 353
Jun Xu, Tianfu Ma, Wei Li, Li Wang, Zhifeng Li, and
Kunji Chen
Structural and Mechanical Properties of Diamond-Like Carbon Films
Prepared by Pulsed Laser Deposition With Varying Laser Intensity ............ 359
M. Bonelli, A.C. Ferrari, A.P. Fioravanti, A. Miotello, and
P.M. Ossi

Interaction of Oxygen With Nanophase Carbons Investigated by
Electron Spin Resonance Spectroscopy ........................................... 365
A. Manivannan, A. Punnoose, and M.S. Seehra

Nanomechanical Properties of Amorphous Carbon and Carbon
Nitride Thin Films Prepared by Shielded Arc Ion Plating ......................... 371
N. Tajima, H. Saze, H. Sugimura, and O. Takai

Electrical Behavior of Pure and Cu Doped Diamondlike Carbon
Prepared by Pulsed Laser Deposition ............................................ 377

Voids Investigation of Amorphous Carbon Films Deposited by
DC-Magnetron Sputtering: A Small Angle X-ray Scattering
and Gas Thermal Effusion Study .................................................. 383
F.L. Freire, Jr., L.G. Jacobsohn, D.F. Franceschini, and
S.S. Camargo, Jr.

Partial Carbonization of Aromatic Polyimide Films .......................... 389
M. Doyama, A. Ichida, Y. Inoue, Y. Kogure, T. Nozaki, and
S. Yamada

AMORPHOUS CARBON: APPLICATIONS

*Tribochemistry of ZDOL Decomposition on Carbon Overcoats
in Ultra-High Vacuum (UHV) .................................................. 397
C.S. Bhatia, C-Y. Chen, W. Fong, and D.B. Bogy

Micro-Wear Scan Test on the Carbon Overcoats as Thin as
6 nm or Less .............................................................................. 409
T.W. Wu, Thomas W. Scharf, Hong Zhang, and John A. Barnard

Effects of O₂ Gas Addition on Diamond-Like Carbon Film Deposition .. 415
N. Nakamura, T. Itani, H. Chiba, K. Watanabe, and
K. Kurihara

*Invited Paper
