A WILEY-INTERSCIENCE PUBLICATION
JOHN WILEY & SONS, INC.
New York / Chichester / Weinheim / Brisbane / Singapore / Toronto
Chapter 1  Gallium Nitride (GaN)

1.1. Basic Parameters at 300 K / 1

1.2. Band Structure and Carrier Concentration / 3
   1.2.1. Temperature Dependences / 4
   1.2.2. Dependence on Hydrostatic Pressure / 6
   1.2.3. Band Discontinuities at Heterointerfaces / 7
   1.2.4. Effective Masses / 7
   1.2.5. Donors and Acceptors / 8

1.3. Electrical Properties / 9
   1.3.1. Mobility and Hall Effect / 9
   1.3.2. Two-Dimensional Electron Gas Mobility at AlGaN/GaN Interface / 12
   1.3.3. Transport Properties in High Electric Field / 13
   1.3.4. Impact Ionization / 15
   1.3.5. Recombination Parameters / 15

1.4. Optical Properties / 16
Chapter 2 Aluminum Nitride (AlN)
Yu. Goldberg

2.1. Basic Parameters at 300 K / 31
2.2. Band Structure and Carrier Concentration / 33
   2.2.1. Temperature Dependences / 33
   2.2.2. Dependences on Hydrostatic Pressure / 34
   2.2.3. Band Discontinuities at Heterointerfaces / 35
   2.2.4. Effective Masses / 35
   2.2.5. Donors and Acceptors / 36
2.3. Electrical Properties / 37
   2.3.1. Mobility and Hall Effect / 37
   2.3.2. Recombination Parameters / 38
2.4. Optical Properties / 39
2.5. Thermal Properties / 41
2.6. Mechanical Properties, Elastic Constants, Lattice Vibrations, Other Properties / 44
References / 46

Chapter 3 Indium Nitride (InN)
A. Zubrilov

3.1. Basic Parameters at 300 K / 49
3.2. Band Structure and Carrier Concentration / 51
   3.2.1. Temperature Dependences / 51
   3.2.2. Dependence on Hydrostatic Pressure / 53
   3.2.3. Band Discontinuities at Heterointerfaces / 53
   3.2.4. Effective Masses / 53
   3.2.5. Donors and Acceptors / 54
3.3. Electrical Properties / 54
   3.3.1. Mobility and Hall Effect / 54
Chapter 4 Boron Nitride (BN)  
S. Rumyantsev, M. Levinshtein, A.D. Jackson, S.N. Mohammad, G.L. Harris, M.G. Spencer, and M.S. Shur  
4.1. Basic Parameters at 300 K / 68  
4.2. Band Structure and Carrier Concentration / 70  
  4.2.1. Dependence on Hydrostatic Pressure / 72  
  4.2.2. Effective Masses / 73  
  4.2.3. Donors and Acceptors / 75  
4.3. Electrical Properties / 75  
4.4. Optical Properties / 76  
4.5. Thermal Properties / 80  
4.6. Mechanical Properties, Elastic Constants, Lattice Vibrations, Other Properties / 86  
References / 91

Chapter 5 Silicon Carbide (SiC)  
Yu. Goldberg, M. Levinshtein, and S. Rumyantsev  
5.1. Basic Parameters at 300 K / 93  
5.2. Band Structure and Carrier Concentration / 96  
  5.2.1. Temperature Dependences / 97  
  5.2.2. Dependence on Hydrostatic Pressure / 100  
  5.2.3. Energy Gap Narrowing at High Doping Levels / 101  
  5.2.4. Effective Masses / 102  
  5.2.5. Donors and Acceptors / 104
5.3. Electrical Properties / 106
   5.3.1. Mobility and Hall Effect / 106
   5.3.2. Transport Properties in High Electric Field / 111
   5.3.3. Impact Ionization / 114
   5.3.4. Recombination Parameters / 119

5.4. Optical Properties / 122

5.5. Thermal Properties / 132

5.6. Mechanical Properties, Elastic Constants, Lattice Vibrations, Other Properties / 138

References / 143

Chapter 6 Silicon-Germanium (Si\textsubscript{1-x}Ge\textsubscript{x})

6.1. Basic Parameters in Unstrained Bulk Material at 300 K / 151

6.2. Band Structure and Carrier Concentration / 154
   6.2.1. Temperature Dependences / 157
   6.2.2. Dependence of Energy Gap on Hydrostatic Pressure / 160
   6.2.3. Strain-Dependent Band Discontinuity / 160
   6.2.4. Effective Masses / 164

6.3. Electrical Properties / 168
   6.3.1. Mobility and Hall Effect / 168
   6.3.2. Two-Dimensional Electron Gas / 169
   6.3.3. Two-Dimensional Hole Gas / 171

6.4. Optical Properties / 173

6.5. Thermal Properties / 176

6.6. Mechanical Properties, Elastic Constants, Lattice Vibrations, Other Properties / 179

References / 186

Appendixes

1. Basic Physical Constants / 189

2. Periodic Table of the Elements / 190
3. Rectangular Coordinates for Hexagonal Crystal / 191

4. The First Brillouin Zone for Wurtzite Crystal / 191

5. Zinc Blende Structure / 192

6. The First Brillouin Zone for Zinc Blende Crystal / 192
