## Contents

*P. Allongue*
Scanning Tunneling Microscopy of Semiconductor Electrodes .......................... 1

*P. C. Searson*
The Surface Chemistry of Silicon in Fluoride Electrolytes .......................... 67

*T. Iwasita and F. C. Nart*
In-Situ Infrared Fourier Transform Spectroscopy: A Tool to Characterize the Metal-Electrolyte Interface at a Molecular Level .......................... 123

*Z. Galus*
Electrochemical Reactions in Nonaqueous and Mixed Solvents ...................... 217

*Z. Samec and T. Kakiuchi*
Charge Transfer Kinetics at Water-Organic Solvent Phase Boundaries .......... 297

*P. Tatapudi and J. M. Fenton*
Electrolytic Processes for Pollution Treatment and Pollution Prevention .... 363

Index .................................................................................................................. 419
