DECISION MAKING for LEADERS

THE ANALYTIC HIERARCHY PROCESS FOR DECISIONS IN A COMPLEX WORLD

NEW EDITION

THOMAS L. SAATY

Contents

Preface ix
Introduction 1

1. Making Decisions in a Complex World 3
   Coping with Complexity 3
   Rationale for a New Framework 4
   Organizing Knowledge for Decisions 5
   Ethical Considerations 10
   Perspective 12
   Key Concepts 13

2. The Analytic Hierarchy Process 14
   What it is and How it Works 15
   Principles of Analytic Thinking 17
   Measurement 18
   AHP: A Flexible Model for Decision Making 23
   Perspective 24
   Key Concepts 28

3. Analyzing and Structuring Hierarchies 29
   Hierarchies: A Tool of the Mind 30
   Classifying Hierarchies 30
   Constructing Hierarchies 31
How to Structure a Hierarchy 34
Perspective 35
Key Concepts 36

4. **Practical Examples of Hierarchies** 37
   An Approach to Hierarchies 38
   Business Decisions 40
   Personal and Domestic Decisions 48
   Public Policy Decisions 53
   Planning Economic Policies 59
   Estimating and Predicting 61
   Measuring Influences 64
   Representing Systems Networks 65
   Perspective 67

5. **Establishing Priorities** 70
   The Need for Priorities 71
   Making Judgments 71
   Deriving Priorities 74
   Consistency 80
   Two Concrete Examples 84
   Extending the Process 86
   Perspective 91
   Key Concepts 91

6. **Step-by-Step Examples of the Process** 93
   An Outline of the Steps 94
   Analyzing the Hostage Rescue Operation 95
   Determining Consumer Preference 102
   Estimating the Economy’s Impact on Sales 106
   Selecting a Portfolio 108
   How Valid is the Process? 117
   Perspective 118

7. **Details of the AHP in a Nutshell** 119
   How to Structure a Hierarchy 120
   The Hospice Problem 120
   Approaching the Problem 121
   Judgements and Comparisons 125
   The Distributive and Ideal Modes 130
   A Sustainable Metropolitan Growth Problem 133
CONTENTS

Criteria and Subcriteria Matrices 133
Absolute Measurement 136
Combining Absolute and Relative Measurement 140
Observation on Subsequent Examples 140
Sensitivity Analysis 140
Homogeneity and Clustering 142
What to do When Known Scales are Involved 143
Transforming Scale Readings to Priorities 145
Problems with Analytic Decision Making 145
An Example of Rank Reversal 146
How Close are Two Ratio Scales 147
Perspective 149
Key Concepts 149

8. Planning 152
Charting the Future 153
Approaches to Planning 153
Scenarios 155
Perspective 156
Key Concepts 157

9. Practical Examples of Planning 158
Five Glimpses into the Future 159
Forward Planning: The Future of Higher Education 159
Forward Planning: Projecting Oil Prices 166
Backward Planning: The Sudan Transport Study 172
Forward-Backward Planning: The Future of the Steel Industry 177
Forward-Backward Planning: Dealing with Traffic Congestion 186
Perspective 200

10. Resolving Conflict 202
Working Forward and Backward 203
First Forward Process 203
First Backward Process 204
Second Forward Process 205
Second Backward Process 205
Perspective 205
Key Concepts 206
11. Practical Examples of Conflict Resolution 207
   Seeking a Better Way Out 208
   Forward-Backward Conflict Resolution: Conflict in Northern Ireland 208
   Forward-Backward Conflict Resolution: Logan Airport and the East Boston Community 218
   Perspective 220

   How the Process Can Help 223
   Problems of Benefit/Cost Analysis 224
   Structuring Benefit/Cost Hierarchies 227
   Resource Allocation 229
   Perspective 230
   Key Concepts 231

   Short-Term and Long-Term Decisions 233
   Allocating Resources for an R&D Program 233
   Deciding on a Home Computer 237
   Selecting a Portfolio for a Corporation 241
   Resource Allocation of Projects for a Multinational Corporation 253
   Manpower Allocation 256
   Perspective 260

14. Making Group Decisions 262
   Group Sessions: The Promise and the Problems 263
   Conducting Group Sessions 263
   Getting the Best Results 268
   Using Questionnaires 269
   Introducing the AHP in Your Organization 271
   Perspective 271
   Key Concepts 272

15. A Practical Example of Group Decision Making 274
   Working Toward Consensus 275
   Setting Priorities for Health Care Research Projects 275
   Perspective 289

Appendix - Decision Making, Scaling and Number Crunching 290
Abstract 290
Introduction 290
CONTENTS

Expectations, Scales, and Manipulations 291
A General Approach to Ratio Scale Measurement 295
Summary 296
References 296
Some Observations on Scales and Consistency 297

References 301

Index 311
