Perspectives of System Informatics

4th International
Andrei Ershov Memorial Conference, PSI 2001
Akademgorodok, Novosibirsk, Russia, July 2-6, 2001
Revised Papers
# Table of Contents

**Memorial Session**

A.P. Ershov — A Pioneer and a Leader of National Programming .......................... 1  
*Igor V. Pottosin*

A.A. Lyapunov and A.P. Ershov in the Theory of Program Schemes and the Development of Its Logic Concepts ................................. 8  
*Rimma I. Podlovchenko*

**Computing and Algorithms**

*Yuri Gurevich*

On Algorithmic Unsolvability ......................................................... 25  
*Svyatoslav S. Lavrov*

**Logical Methods**

Resolution and Binary Decision Diagrams Cannot Simulate Each Other Polynomially ................................................................. 33  
*Jan Friso Groote, Hans Zantema*

On Expressive and Model Checking Power of Propositional Program Logics .......................................................... 39  
*Nikolai V. Shilov, Kwang Yi*

An Extension of Dynamic Logic for Modelling OCL’s @pre Operator ............... 47  
*Thomas Baar, Bernhard Beckert, Peter H. Schmitt*

Optimal Algorithms of Event-Driven Re-evaluation of Boolean Functions ... 55  
*Valeriy Vyatkin*

**Verification**

A Transformation of SDL Specifications — A Step towards the Verification .................................................................................. 64  
*Natalia Ioustinova, Natalia Sidorova*

Accurate Widening and Boundedness Properties of Timed Systems ............... 79  
*Supratik Mukhopadhyay, Andreas Podelski*

Adaptive Saturation-Based Reasoning .................................................. 95  
*Alexandre Riazanov, Andrei Voronkov*
# Table of Contents

**A Verification Approach for Distributed Abstract State Machines**  
Robert Eschbach  

**Program Transformation and Synthesis**

Transformational Construction of Correct Pointer Algorithms  
Thorsten Ehm  

A Theoretical Foundation of Program Synthesis by Equivalent Transformation  
Kiyoshi Akama, Hidekatsu Koike, Hiroshi Mabuchi  

Equivalent Transformation by Safe Extension of Data Structures  
Kiyoshi Akama, Hidekatsu Koike, Hiroshi Mabuchi  

Semantics and Transformations in Formal Synthesis at System Level  
Viktor Sabelfeld, Christian Blumenrohr, Kai Kapp  

Automated Program Synthesis for Java Programming Language  
Mait Harf, Kristiina Kindel, Vahur Kootkas, Peep Küngas, Enn Tüugu  

**Semantics & Types**

The Varieties of Programming Language Semantics (And Their Uses)  
Peter D. Mosses  

Binding-Time Analysis for Polymorphic Types  
Rogardt Heldal, John Hughes  

An Investigation of Compact and Efficient Number Representations in the Pure Lambda Calculus  
Torben E. Mogensen  

**Processes and Concurrency**

Observational Semantics for Timed Event Structures  
Irina B. Virbitskaite  

The Impact of Synchronisation on Secure Information Flow in Concurrent Programs  
Andrei Sabelfeld  

Dynamical Priorities without Time Measurement and Modification of the TCP  
Valery A. Sokolov, Eugene A. Timofeev  

**UML Specification**

From ADT to UML-Like Modelling  
Egidio Astesiano, Maura Cerioli, Gianna Reggio
Transformation of UML Specification to XTG .................................. 247
  Ella E. Roubtsova, Jan van Katwijk, Ruard C.M. de Rooij,
  Hans Toetenel

Petri Nets

A Systematic Approach towards Object-Based Petri Net Formalisms ...... 255
  Berndt Farmer, Irina Lomazova

Unfoldings of Coloured Petri Nets ............................................. 268
  Vitaly E. Kozura

A Net-Based Multi-tier Behavior Inheritance Modelling Method .......... 279
  Shengyuan Wang, Jian Yu, Chongyi Yuan

Testing

Specification Based Testing: Towards Practice ............................... 287
  Alexander K. Petrenko

Java Specification Extension for Automated Test Development .......... 301
  Igor B. Bourdonov, Alexey V. Demakov, Andrew A. Jarov,
  Alexander S. Kossatchev, Victor V. Kuliamin, Alexander K. Petrenko,
  Sergey V. Zelenov

Specification-Based Testing of Firewalls .................................... 308
  Jan Jürjens, Guido Wimmel

Software Construction

Academic vs. Industrial Software Engineering: Closing the Gap .......... 317
  Andrey N. Terekhov, Len Erlikh

A Method for Recovery and Maintenance of Software Architecture ...... 324
  Dmitry Koznov, Konstantin Romanovsky, Alexei Nikitin

An Empirical Study of Retargetable Compilers .............................. 328
  Dmitry Boulytchev, Dmitry Lomov

Data & Knowledge Bases

Conceptual Data Modeling: An Algebraic Viewpoint ....................... 336
  Kazem Lellahi

Integrating and Managing Conflicting Data ................................. 349
  Sergio Greco, Luigi Pontieri, Ester Zumpano

A Knowledge Engineering Approach to Deal with
  'Narrative' Multimedia Documents ......................................... 363
  Gian Piero Zarri
Using Agents for Concurrent Querying of Web-Like Databases via a Hyper-Set-Theoretic Approach .................................................. 378
   Vladimir Sazonov

Logic Programming

Reexecution-Based Analysis of Logic Programs with Delay Declarations... 395
   Agostino Cortesi, Baudouin Le Charlier, Sabina Rossi

Pos(T): Analyzing Dependencies in Typed Logic Programs .............. 406
   Maurice Bruynooghe, Wim Vanhoof, Michael Codish

A Prolog Tailoring Technique on an Epilog Tailored Procedure .......... 421
   Yoon-Chan Jhi, Ki-Chang Kim, Kemal Ebcioğlu, Yong Surk Lee

Constraint Programming

Hierarchical Constraint Satisfaction Based on Subdefinite Models .... 434
   Dmitry Ushakov

Using Constraint Solvers in CAD/CAM Systems .......................... 446
   Vitaly Telerman

A Graphical Interface for Solver Cooperations ............................ 457
   Laurent Granvilliers, Eric Monfroy

Program Analysis

Abstract Computability of Non-deterministic Programs over Various Data Structures ............................................. 468
   Nikolaj S. Nikitchenko

On Lexicographic Termination Ordering with Space Bound Certifications .............................................. 482
   Guillaume Bonfante, Jean-Yves Marion, Jean-Yves Moyen

Generalised Computability and Applications to Hybrid Systems .......... 494
   Margarita V. Korovina, Oleg V. Kudinov

Language Implementation

Exploring Template Template Parameters .................................. 500
   Roland Weiss, Volker Simonis

Compiler-Cooperative Memory Management in Java ........................ 511
   Vitaly V. Mikheev, Stanislav A. Fedoseev

A Software Composition Language and Its Implementation ............. 519
   Dietrich Birngruber
Editor Definition Language and Its Implementation .......................... 530
   Audris Kalnins, Karlis Podnieks, Andris Zarins, Edgars Celms,
   Janis Barzdins

Oberon-2 as Successor of Modula-2 in Simulation ........................... 538
   Alexey S. Rodionov, Dmitry V. Leskov

Author Index .................................................................................. 547
