Table of Contents, Part IV

Parallel Program Debugging with MAD – A Practical Approach ........ 201
Dieter Kranzlmüller, Axel Rimnac

Workshop on Parallel Input/Output Management Techniques (PIOMT2003)

Enhancing Prediction Accuracy in PCM-Based File Prefetch by Constrained Pattern Replacement Algorithm ....................... 213
Inchul Choi, Chanik Park

Parallel I/O Scheduling in Multiprogrammed Cluster Computing Systems ..................................................... 223
Jemal H. Abawajy

Design and Evaluation of Distributed Smart Disk Architecture for I/O-Intensive Workloads ................................. 230
Steve Chiu, Wei-keng Liao, Alok Choudhary

An Adaptive Load Balancing Algorithm for Large Data Parallel Processing with Communication Delay .................. 242
Kenji Imasaki, Jemal H. Abawajy

A Flexible Multiagent Parallel File System for Clusters ............ 248
Mária S. Pérez, Jesús Carretero, Félix García, José M. Peña, Víctor Robles

A New Proportional-Share Disk Scheduling Algorithm: Trading-Off I/O Throughput and QoS Guarantee .................. 257
Young Jin Nam, Chanik Park

Workshop on Dynamic Data Driven Application Systems

Computational Aspects of Chemical Data Assimilation into Atmospheric Models ........................................... 269
Gregory R. Carmichael, Dacian N. Daescu, Adrian Sandu, Tianfeng Chai

Virtual Telemetry for Dynamic Data-Driven Application Simulations .... 279
Craig C. Douglas, Yalchin Efendiev, Richard Ewing, Raytcho Lazarov, Martin J. Cole, Greg Jones, Chris R. Johnson

Tornado Detection with Support Vector Machines ...................... 289
Theodore B. Trafalis, Huseyin Ince, Michael B. Richman
Computational Science Simulations Based on Web Services

Paul Chew, Nikos Chrisochoides, S. Gopalsamy, Gerd Heber,
Tony Ingraffea, Edward Luke, Joaquim Neto, Keshav Pingali,
Alan Shih, Bharat Soni, Paul Stodghill, David Thompson,
Steve Vavasis, Paul Wawrzynek

DDEMA: A Data Driven Environment for Multiphysics Applications

John Michopoulos, Panagiota Tsompanopoulou, Elias Houstis,
John Rice, Charbel Farhat, Michel Lesoinne, Frederic Lechenault

Discrete Event Solution of Gas Dynamics within the DEVS Framework

J. Nutaro, B.P. Zeigler, R. Jammalamadaka, S. Akerkar

Data Driven Design Optimization Methodology: A Dynamic
Data Driven Application System

Doyle Knight

Derivation of Natural Stimulus Feature Set Using
a Data-Driven Model

Alexander G. Dimitrov, Tomas Gedeon, Brendan Munney,
Ross Snider, Zane Aldworth, Albert E. Parker, John P. Miller

Performance Evaluation of Generalized Polynomial Chaos

Dongbin Xiu, Didier Lucor, C.-H. Su, George Em Karniadakis

Driving Scientific Applications by Data in Distributed Environments

Joel Saltz, Umit Catalyurek, Tahsin Kurc, Mike Gray,
Shannon Hastings, Steve Langella, Sivaramakrishnan Narayanan,
Ryan Martino, Steven Bryant, Malgorzata Peszynka, Mary Wheeler,
Alan Sussman, Michael Beynon, Christian Hansen, Don Stredney,
Dennis Sessanna

Simulating Sellers' Behavior in a Reverse Auction B2B Exchange

Subhajyoti Bandypadhyay, Alok R. Chaturvedi, John M. Barron,
Jackie Rees, Shailendra Mehta

Rapid Real-Time Interdisciplinary Ocean Forecasting Using
Adaptive Sampling and Adaptive Modeling and Legacy Codes:
Component Encapsulation Using XML

Constantinos Evangelinos, Robert Chang, Pierre F.J. Lermusiaux,
Nicholas M. Patrikalakis

A Computational Infrastructure for Reliable Computer Simulations

J. Tinsley Oden, James C. Browne, Ivo Babuška,
Kenneth M. Liebti, Leszek F. Demkowicz
Workshop on Complex Problem-Solving Environments for Grid Computing (WCPSE02)

Automating Metadata Web Service Deployment for Problem Solving Environments ................................. 393  
Ozgur Balsoy, Ying Jin, Galip Aydin, Marlon Pierce, Geoffrey Fox

Building Problem Solving Environments with Application Web Service Toolkits ....................................... 403  
Choonhan Youn, Marlon Pierce, Geoffrey Fox

GSF: A Problems Solving Environment Supporting Multi-models Parallel Grid Programming ....................... 413  
Qian-ni Deng, Xin-da Lu

Implementation of a Grid-Enabled Problem Solving Environment in Matlab .............................................. 420  
Hakki Eres, Graeme Pound, Zhouan Jiao, Jasmin Wason, Fenglian Xu, Andy Keane, Simon Cox

GSiB: PSE Infrastructure for Dynamic Service-Oriented Grid Applications .................................................. 430  
Yan Huang

Workshop on Modeling and Simulation in Supercomputing and Telecommunications

Partial Dual Unicasting Based Handoff for Real-Time Traffic in MIPv6 Networks ..................................... 443  
DaeKyu Choi, Hyunseung Choo

Simulations on Batching in Video-on-Demand Transmissions ................................................................. 453  
Juan Segarra, Vicent Cholvi

The Design of XML-Based Internet Security Integrated System Architecture .............................................. 463  
Kwang H. Kim, Tae-Kyung Kim, Dong S. Kim, Tai M. Chung

Performance Analysis of a Mobility Support Scheme between Subnetworks in Differentiated Services ........... 473  
Jongoh Kim, Jonghyun Choi, Youngsong Mun

Performance Analysis for Real-Time Grid Systems on COTS Operating Systems ....................................... 482  
Eui-Nam Huh, Youngsong Mun
Scalable Keyframe Extraction Using One-Class Support
Vector Machine ................................................................. 491
  YoungSik Choi, Sangyoun Lee

A Design and Performance Evaluation of 2-Level Call Admission
Control Scheme in Mobile Multimedia Networks ....................... 500
  Myung Il Kim, Sung Jo Kim

Performance Evaluation of a Relocation Method for Mobile
Computing Maintaining Data Consistency .................................. 510
  Byung-Kwan Lee, Am-Suk Oh

Reliability Problem on All Pairs Quickest Paths ........................ 518
  Young-Cheol Bang, Hyunseung Choo, Youngsong Mun

A Concurrency Control Algorithm for Firm Real-Time
Database Systems .................................................................. 524
  Seok Jae Lee, Jae Ryong Shin, Seok Il Song, Jae Soo Yoo,
  Ki Hyung Cho

Workshop on Modeling of Multimedia Synchronization in Mobile
Information System

Secure Firewall Traversal in Mobile IP Network .......................... 535
  Jung-Min Park, Min-Jung Jin, Kijoon Chae

Buffering Management Scheme for Multimedia Synchronization in
Mobile Information System ...................................................... 545
  Gi-Sung Lee, Jeung-gyu Lee, Sok-Pal Cho

Resource Reservation and Allocation Based on Direction Prediction
for Handoff in Mobile Multimedia Networks ............................. 555
  Jongchan Lee, Hongjin Kim, Kuinam J. Kim

Petri-Net Model of Multimedia Synchronization in
Mobile Environment ............................................................ 566
  Keun-Wang Lee, Jong-Hee Lee, Hae-Seok Oh

New Mobility Scheme for Reducing Location Traffic
in Mobile Networks ................................................................ 576
  Il-Sun Hwang, Myungsun Lee, Ki-sung Yoo, Jin-wook Chung

Mobile Animation Algorithm for Cyber Museum ...................... 586
  Sung-Soo Hong, Sang-Kil Kim

Certificate Management Client System for E-transactions on Internet .... 596
  Jeom goo Kim, Yoochan Ra, Jaehwan Lim
Threat Description for the PP by Using the Concept of the Assets Protected by TOE .................................................. 605
   Tai-hoon Kim, Byung-gyu No, Dong Chun Lee

Real-Time Data Management for Network Information System .......... 614
   Dong Chun Lee

Efficient Migration Algorithm for Mobile Agents in Wired/Wireless Internets .................................................. 626
   Sukwoo Han, Kuinam J. Kim, Young-Sung Kim

Workshop on OpenMP for Large Scale Applications

OpenMP in the Field: Anecdotes from Practice .......................... 637
   Russell K. Standish, Clinton Chee, Nils Smeds

OpenMP and NUMA Architectures I: Investigating Memory Placement on the SCI Origin 3000 ........................................ 648
   Nathan Robertson, Alistair Rendell

Poor Scalability of Parallel Shared Memory Model: Myth or Reality? .... 657
   Mark Kremenetsky, Arthur Raefsky, Steve Reinhardt

Asynchronous Execution of OpenMP Code .................................. 667
   Tien-hsiung Weng, Barbara Chapman

Workshop on Modeling Morphogenesis and Pattern Formation in Biology

Virtual Reef: A Visualisation Framework for Marine Simulation Models .. 679
   Stephen Jeffrey

Modelling Developmental Regulatory Networks .......................... 688
   Tommy Krul, Jaap A. Kaandorp, Joke G. Blom

A Biomechanical Imitative Model for Pulsatile Morphogenesis .......... 698
   L.V. Belousov, V.I. Grabovsky

Using Computational Plant Science Tools to Investigate Morphological Aspects of Compensatory Growth .......................... 708
   David Thornby, Michael Renton, Jim Hanan

3D Visualization of Complex Surfaces Using Dynamic Delaunay Tessellation ........................................ 718
   M.L. Gavrilova, J. Pinovarov
Workshop on Adaptive Algorithms for Parallel and Distributed Computing Environments

CODELAB: A Developers' Tool for Efficient Code Generation and Optimization .................................................. 729
    Dragan Mirković, S. Lennart Johnsson

A Knowledge Discovery Methodology for Behavior Analysis of Large-Scale Applications on Parallel Architectures .......................................................... 739
    Elias N. Houstis, Vassilios S. Verykios, Ann C. Catlin,
    John R. Rice

Performance Modeling for Dynamic Algorithm Selection .......................................................... 749
    Michael O. McCracken, Allan Snavely, Allen Malony

Self-Adapting Numerical Software and Automatic Tuning of Heuristics .................................................. 759
    Jack Dongarra, Victor Eijkhout

Poster Papers

Computer Simulation of Multi-dimensional Bone Deformity Correction and Lengthening by Unilateral External Fixator .......... 771
    Yoon Hyuk Kim

Problems and Prospects for Quantum Computational Speed-up .......... 779
    E.V. Krishnamurthy

A Configuration Algorithm for Provisioning of Cell-Based MPLS Network .................................................. 789
    Daniel Won-Kyu Hong, Choong Seon Hong, Dong-Sik Yun

Exact and Approximate Algorithms for Topological Design of Wide Area Networks with Non-simultaneous Single Commodity Flows .......... 799
    Andrzej Kasprzak

Modeling and Simulation of Distributed Security Models .......... 809
    Hee Suk Seo, Tae Ho Cho, Sung Do Chi

An Efficient Collective Communication Method for Grid Scale Networks .................................................. 819
    Kyung-Lang Park, Hwang-Jik Lee, Youn-Joo Lee, Oh-Young Kwon,
    Sung-Yong Park, Hyung-Woo Park, Shin-Dug Kim

Reliability Theory Model and Expected Life Shortest Path in Stochastic and Time-Dependent Networks .......... 829
    Guo-zhen Tan, Xiang-fu Xia, Wen Gao
Using a GA Adaptor in Multi-applications ........................................ 839
  Cheng Wei Hang, Yen Cheung

Automated Debugging in Java Programs Using HDM .......................... 849
  Hoon-Joon Kouh, Weon-Hee Yoo

Pattern Based Approaches to Pre-processing Structured Text:
A Newsfeed Example ................................................................. 859
  Paul Bogg

Evolutionary Rule Generation Classification and Its Application
to Multi-class Data ............................................................... 868
  Susan E. Bedingfield, Kate A. Smith

Self-Organizing Hybrid Neurofuzzy Networks .................................. 877
  Sung-Kwun Oh, Su-Chong Joo, Chang-Won Jeong, Hyun-Ki Kim

FOM: A Framework for Metaheuristic Optimization .......................... 886
  J.A. Parejo, J. Racero, F. Guerrero, T. Kwok, K.A. Smith

ClassdescMP: Easy MPI Programming in C++ .................................. 896
  Russell K. Standish, Duraid Madina

A Novel Evolutionary Approach to Linear Time-Series
Forecasting Model ................................................................. 903
  Prakash Vijayan, S. Suresh

Design and Implementation of XML DBMS Based on Generic
Data Model .............................................................................. 911
  JongSeon Lim, Sung yoon Bang, Kyung-Soo Joo

Developing a Unified Design Methodology Based on Extended
Entity-Relationship Model for XML ......................................... 920
  Mun-Young Choi, JongSeon Lim, Kyung-Soo Joo

Investigating Neural Network Modeling Decisions for the
Australian All-Ordinaries Index ................................................ 930
  Andrew Flitman, Mark Barnes, Deniss Teng Tai Kiat

Rapid Prototyping Methodology and Environments for Fuzzy
Applications .............................................................................. 940
  Chantana Chantrapornchai

Multiple Correlation Analysis of Fuzzy Sets .................................. 950
  Nancy P. Lin

An Efficient Dispersal and Encryption Scheme for Secure
Distributed Information Storage ................................................ 958
  Sung Jin Choi, Hee Yong Youn, Bo Kyoung Lee
