Nanoengineering of Structural, Functional, and Smart Materials

Edited by
Mark J. Schulz, Ajit D. Kelkar, and Mannur J. Sundaresan

Taylor & Francis
Taylor & Francis Group
Boca Raton London New York

A CRC title, part of the Taylor & Francis imprint, a member of the Taylor & Francis Group, the academic division of T&F Informa plc.
Contents

Chapter 1
Introduction to Nanoengineering ................................................................. 1
John F. Maguire and David B. Mast

PART 1 Synthesis of Nanoscale Materials

Chapter 2
Design of Nanostructured Materials ............................................................ 15
Debasish Banerjee, Jingyu Lao, and Zhifeng Ren

Chapter 3
Carbon Nanotubes and Bismuth Nanowires ............................................. 57
Mildred S. Dresselhaus, Ado Jorio, and Oded Rabin

Chapter 4
Nanobelts and Nanowires of Functional Oxides ...................................... 99
Xudong Wang and Zhong Lin Wang

Chapter 5
Advances in Chemical Vapor Deposition of Carbon Nanotubes ............. 125
Vesselin N. Shanov, Atul Miskin, Sachin Jain, Peng He,
and Mark J. Schulz

Chapter 6
Self-Assembled Au Nanodots in a ZnO Matrix: A Novel Way to Enhance
Electrical and Optical Characteristics of ZnO Films .................................. 159
Ashutosh Tiwari and Jagdish Narayan

Chapter 7
Synthesis of Boron Nitride Nanotubes Using a Ball-Milling and Annealing
Method ........................................................................................................ 169
Ying Chen and Jim S. Williams
PART 2 Manufacturing Using Nanoscale Materials

Chapter 8
Plasma Deposition of Ultra-Thin Functional Films on Nanoscale Materials ................................................................. 199
Peng He and Donglu Shi

Chapter 9
Structural Nanocomposites .................................................................................................................. 225
Hassan Mahfuz

Chapter 10
Synthesis and Characterization of Metal-Ceramic Thin-Film Nanocomposites with Improved Mechanical Properties ........................................ 247
Dhnanjay Kumar, Jagannathan Sankar, and Jagdish Narayan

Chapter 11
Macroscopic Fibers of Single-Walled Carbon Nanotubes ................................................................. 263
Virginia A. Davis and Matteo Pasquali

Chapter 12
Carbon Nanofiber and Carbon Nanotube/Polymer Composite Fibers and Films .............................................................. 285
Han Gi Chae, Tetsuya Uchida, and Satish Kumar

Chapter 13
Surface Patterning Using Self-Assembled Monolayers: A Bottom-Up Approach to the Fabrication of Microdevices ................................. 315
Lakshmi Supriya and Richard O. Claus

Chapter 14
Enhancement of the Mechanical Strength of Polymer-Based Composites Using Carbon Nanotubes ................................................ 327
Kin-Tak Lau, Jagannathan Sankar, and David Hui

Chapter 15
Nanoscale Intelligent Materials and Structures .................................................................................. 347
Chapter 16
Thermal Properties and Microstructures of Polymer Nanostructured Materials
Joseph H. Koo and Louis A. Pilato

Chapter 17
Manufacturing, Mechanical Characterization, and Modeling of a Pultruded Thermoplastic Nanocomposite
Samit Roy, Kalivarathan Vengadassalam, Farzana Hussain, and Hongbing Lu

PART 3 Modeling of Nanoscale and Nanostructured Materials

Chapter 18
Nanomechanics
Young W. Kwon

Chapter 19
Continuum and Atomistic Modeling of Thin Films Subjected to Nanoindentation
J. David Schall, Donald W. Brenner, Ajit D. Kelkar, and Rahul Gupta

Chapter 20
Synthesis, Optimization, and Characterization of AlN/TiN Thin Film Heterostructures
Cindy K. Waters, Sergey Yarmolenko, Jagannathan Sankar, Sudhir Neralla, and Ajit D. Kelkar

Chapter 21
Polarization in Nanotubes and Nanotubular Structures
Marco Buongiorno Nardelli, Serge M. Nakhmanson, and Vincent Meunier

Chapter 22
Multiscale Modeling of Stress Localization and Fracture in Nanocrystalline Metallic Materials
Vesselin Yamakov, Dawn R. Phillips, Erik Saether, and Edward H. Glaessgen

Chapter 23
Modeling of Carbon Nanotube/Polymer Composites
Gregory M. Odegard
