# Table of Contents

**ISAS 2004**

Architecture of Highly Available Databases  
*Sam Drake, Wei Hu, Dale M. McInnis, Martin Sköld, Alok Srivastava, Lars Thalmann, Matti Tikkanen, Øystein Torbjørnsen, Antoni Wolski* .................................. 1

Data Persistence in Telecom Switches  
*S.G. Arun* ......................................................... 17

Distributed Redundancy or Cluster Solution? An Experimental Evaluation of Two Approaches for Dependable Mobile Internet Services  
*Thibault Renier, Hans-Peter Schwefel, Marjan Bozinovski, Kim Larsen, Ramjee Prasad, Robert Seidl* .................................. 33

OpenHPI: An Open Source Reference Implementation of the SA Forum Hardware Platform Interface  
*Sean Dague* ......................................................... 48

Quality of Service Control by Middleware  
*Heinz Reisinger* ...................................................... 61

Benefit Evaluation of High-Availability Middleware  
*Jürgen Neises* ...................................................... 73

A Measurement Study of the Interplay Between Application Level Restart and Transport Protocol  
*Philipp Reinecke, Aad van Moorsel, Katinka Wolter* ......................... 86

Service-Level Management of Adaptive Distributed Network Applications  
*K. Ravindran, Xiliang Liu* .................................. 101

A Methodology on MPLS VPN Service Management with Resilience Constraints  
*Jong-Tae Park, Min-Hee Kwon* .................................. 118

Highly-Available Location-Based Services in Mobile Environments  
*Peter Ibach, Matthias Horbank* .................................. 134
On Enhancing the Robustness of Commercial Operating Systems  
Andreas Johansson, Adina Sărbu, Arshad Jhumka, Neeraj Suri  

A Modular Approach for Model-Based Dependability Evaluation of a Class of Systems  
Stefano Porcarelli, Felicita Di Giandomenico, Paolo Lollini, Andrea Bondavalli  

Rolling Upgrades for Continuous Services  
Antoni Wolski, Kyösti Laiho  

First Experience of Conformance Testing an Application Interface Specification Implementation  
Francis Tam, Kari Ahvanainen  

On the Use of the SA Forum Checkpoint and AMF Services  
Stéphane Brossier, Frédéric Herrmann, Eltefaat Shokri
