Contents

Preface xi

Chapter 1

When Worlds Collide: Can UML help SoC Design? 1
Grant Martin, Wolfgang Mueller

1.1. Introduction 1
1.2. New Directions for HW-SW Interaction 2
1.3. UML 2.0 3
1.4. UML Profiles 7
1.5. Executable UML 9
1.6. UML in the SoC Design Process 11
1.7. Conclusions 15

Chapter 2

Why Systems-on-Chip needs More UML like a Hole in the Head 17
Stephen J. Mellon, John R. Wolfe, Campbell McCausland

2.1. Problem and Solution 17
2.2. Executable and Translatable UML Application Models 20
2.3. Manipulating the Application Models 27
2.4. Marks 32
2.5. Work in Context 33
2.6. How Does All This Stack Up? 35
2.7. A Hole in the Head? 36

Chapter 3

UML as a Framework for Combining Different Models of Computation 37
Peter Green

3.1. Introduction 37
3.2. Modeling Framework 38
3.3. Modeling Synchronous Dataflow Graphs in UML 2.0 39
3.4. Communication and Concurrency 44
3.5. Class and Object Relationships 46
3.6. The Shell Model 50
3.7. Hybrid Shells 53
3.8. Mapping Shell Models to Software and Hardware 55
3.9. Case Study: A Simple Modem 57
3.10. Conclusions 61
Chapter 4
A Generic Model Execution Platform for the Design of Hardware and Software
Tim Schatikowsky, Wolfgang Mueller, Achim Rettberg
4.1. Introduction 63
4.2. Related Works 64
4.3. The Model Execution Platform (MEP) 66
4.4. Code Generation for Hardware Implementation 75
4.5. The MEP Virtual Machine 86
4.6. Conclusions 87

Chapter 5
Hardware/Software Codesign of Reconfigurable Architectures Using UML
Bernd Steinbach, Dominik Fröhlich, Thomas Beierlein
5.1. Introduction 89
5.2. A Platform Model Driven Development Approach 91
5.3. Mapping Design Models onto Implementation Models 99
5.4. Mapping Implementation Models onto Platform-Specific Implementations 102
5.5. Experimental Results 115
5.6. Conclusions 116

Chapter 6
A Methodology for Bridging the Gap between UML and Codesign
Anand Shankar Basu, Marcello Lajolo, Mauro Prevostini
6.1 Introduction 119
6.2. State of the Art and Contribution 120
6.3. The ACES Codesign Flow 121
6.4. Modeling Hardware Related Aspects in UML 130
6.5. Model Verification in UML 137
6.6. Transformation from UML to Codesign 139
6.7. Conclusions 146

Chapter 7
UML Tailoring for SystemC and ISA Modelling
Giovanni Agosta, Francesco Bruschi, Donatella Sciuto
7.1. Introduction 147
7.2. Abstraction and Application Specificity 148
7.3. UML Transaction Level Modeling 152
7.4. Application Specific UML Modeling 161
7.5. Concluding Remarks 173

Chapter 8
Model-Driven SoC Design: The UML-SystemC Bridge
Kathy Dang Nguyen, Zhenxin Sun, P.S. Thiagarajan, Weng-Fai Wong
8.1. Introduction 175
8.2. SystemC Preliminaries 179
8.3. UML Modeling 179
8.4. Implementation 183
8.5. Examples and Results 188
8.6. Conclusion 196
Chapter 9
A Comparison between UML and Function Blocks for Heterogeneous SoC Design and ASIP Generation
Lisane Brixolara, Leandro B. Becker, Luigi Carro, Flavio Wagner, Carlos E. Pereira

9.1. Introduction
9.2. A Methodology for SoC Design and ASIP Generation
9.3. Case Study: Evaluating High Level Models
9.4. Problems in Mapping from High Level Models to HW-SW SoC
9.5. Related Works
9.6. Conclusions

Chapter 10
A Model-Driven Development Process for Low Power SoC Using UML
Yves Vanderperren, Wim Dehaene

10.1. Introduction
10.2. UML and System Design
10.3. Process and Model-Driven Development
10.4. Model-Driven Development for SoC: Case Study
10.5. Conclusions

References
