3.4 Multi-parameter monitoring 26
3.5 Applications 32
3.5.1 Monitoring of glucose and lactate with a micro-dialysis probe 32
3.5.2 Ammonia monitoring 34
4. CONCLUSIONS AND OUTLOOK 36
5. REFERENCES 36

NEURAL IMPLANTS IN CLINICAL PRACTICE
Interfacing neurons for neuro-modulation, limb control, and to restore vision—Part I
1. INTRODUCTION TO NEURAL IMPLANTS 41
2. ANATOMICAL AND BIOPHYSICAL FUNDAMENTALS 45
2.1 Peripheral Nerve Anatomy 45
2.2 Mechanisms of Peripheral Nerve Damage 47
2.3 Excitability of Nerves 48
2.4 Electrical Modelling of the Nerve Membrane 49
2.5 Propagation of Action Potentials 50
2.6 Extra-cellular Stimulation of Nerve Fibres 52
2.7 Selective Activation of Nerve Fibres 54
3. CLINICAL IMPLANTS 55
3.1 Electrodes—The Key Component in Neural Prostheses 56
3.2 Cardiac Pacemakers 57
3.3 Implantable Defibrillators 59
3.4 Cochlea Implants 60
3.5 Phrenic Pacemakers 61
3.6 Grasp Neuroprostheses 61
3.7 Neuroprostheses for gait and posture 63
3.8 Spinal Root Stimulator 65
3.9 Drop Foot Stimulator 66
3.10 Neuro-modulation 67
3.11 Deep Brain Stimulation 68
3.12 Vagal Nerve Stimulation 69
