Part I: Product Design

Chapter 1: Product Development Life Cycle 3

1.1. Introduction 3
1.2. The Evolution of Product Development 3
1.3. Sequential Product Development 5
1.4. Simultaneous/Integrated Product Development 6
1.5. Generic Product Development Process 7
  1.5.1. Needs Recognition 8
  1.5.2. Design Specifications 11
  1.5.3. Conceptual Design 13
  1.5.4. Concept Generation 14
  1.5.5. Concept Selection 15
  1.5.6. Final Concept Preliminary Design 16
  1.5.7. Detail Design 16
  1.5.8. Component Final Design 17
  1.5.9. Cost Estimation 17
  1.5.10. Prototyping 17
  1.5.11. Production 17
  1.5.12. Marketing 18
1.6. Case Study-Needs Recognition: A Utility Snip 19
  1.6.1. Overview 19
  1.6.2. Objectives 20
  1.6.3. Procedure 20
Chapter 2: Product Life Cycle Cost Model

2.1. Introduction
2.2. Role of Computers in Manufacturing Systems
2.3. Product Life Cycle Cost Analysis
   2.3.1. Cost Breakdown in Manufacturing Systems
      2.3.1.1. Total System Cost (C)
      2.3.1.2. Advanced Research and Development (C_r)
      2.3.1.3. Program Management (C_rm)
      2.3.1.4. Advanced Research and Development (C_nr)
      2.3.1.5. Engineering design cost (C_re)
      2.3.1.6. Equipment Development and Test (C_n)
      2.3.1.7. Engineering Data (C_rd)
      2.3.1.8. Investment (C_i)
      2.3.1.9. Manufacturing (C_im)
      2.3.1.10. Nonrecurring Manufacturing Cost (C_in)
      2.3.1.11. Recurring Manufacturing Cost (C_ir)
      2.3.1.12. Construction Cost (C_ic)
      2.3.1.13. Initial Logistic Support Cost (C_il)
      2.3.1.14. Operator Personnel Cost (C_o)
      2.3.1.15. Operation Cost (C_oo)
      2.3.1.16. Operator Personnel Cost (C_coop)
      2.3.1.17. Operator Training Cost (C_oott)
      2.3.1.18. Operational Facilities Cost (C_oof)
      2.3.1.19. Support and Handling Equipment Cost (C_oee)
      2.3.1.20. Maintenance Cost (C_om)
      2.3.1.21. Maintenance Personnel and Support Cost (C_omm)
      2.3.1.22. Corrective Maintenance Cost (C_oom)
      2.3.1.23. Preventive Maintenance Cost (C_oos)
      2.3.1.24. Spare/Repair Cost (C_omx)
      2.3.1.25. Test and Support Equipment Cost (C_oms)
      2.3.1.26. Transportation and Handling Cost (C_omt)
      2.3.1.27. Maintenance Training Cost (C_omp)
      2.3.1.28. Maintenance Facilities Cost (C_omf)
      2.3.1.29. Technical Data Cost (C_omd)
      2.3.1.30. System/Equipment Modification (C_on)
      2.3.1.31. System Phase-out and Disposal Cost (C_op)

2.4. Computer-Aided Cost Estimating in Manufacturing
2.5. Objective of Cost Estimating
   2.5.1. Assist in Submitting Bids
   2.5.2. Revise Quotations
Chapter 5: Feature Extraction Techniques

5.1. Feature Representation
   5.1.1. Feature Representation by B-rep
   5.1.2. Feature Representation by CSG
   5.1.3. Feature Representation by B-rep and CSG (Hybrid Method)

5.2. Feature Recognition Techniques
   5.2.1. The Syntactic Pattern Recognition Approach
   5.2.2. The Logic-Based Approach
   5.2.3. Graph-Based Approach
   5.2.4. Expert System Approach
   5.2.5. Volume Decomposition and Composition Approach
   5.2.6. 3D Feature Recognition from a 2D Feature Approach

5.3. Summary
5.4. Problems

Chapter 6: Initial Graphics Exchange Specifications (IGES)

6.1. Data Transfer in CAD/CAM Systems
6.2. Initial Graphics Exchange Specifications (IGES)
   6.2.1. Structure of the IGES File
      6.2.1.1. Start Section
      6.2.1.2. Global Section
      6.2.1.3. Directory Entry Section (DE)
      6.2.1.4. Parameter Data Section (PD)
      6.2.1.5. Terminate Section

## Chapter 12: Collaborative Engineering

12.1. Introduction                                                     | 303  |
12.2. Product Design and Development Process                          | 304  |
  12.2.1. Integrated Product Development (IPD)                          | 305  |
  12.2.2. The Principles of IPD                                         | 305  |
12.3. Collaborative Engineering Approach                               | 306  |
12.4. Role of Collaboration in IPD                                      | 307  |
12.5. Product Development Teams (PDTs) and Collocation 308
12.6. Effectiveness of PDT 309
12.7. Product Design in a Collaborative Environment 310
  12.7.1. Collaborative Marketplace 311
  12.7.2. Collaborative Approach 312
12.8. Integrated Product Design and Development in a Collaborative Environment 313
  12.8.1. System Structure and Components 315
  12.8.2. Collaborative Environment 316
  12.8.3. Analysis Phase 317
  12.8.4. Optimization Phase 318
  12.8.5. Parametric CAD Modeling 319
  12.8.6. Advantages of the System 319
12.9. Summary 320
12.10. Problems 320
