New Concepts in Commercial Vehicle Suspensions, Advancements in Braking, Steering, and Stability and Handling Simulation

SP-1984
TABLE OF CONTENTS

2005-01-3495 An Optimal Preview ANN Driver Model Based on Error Elimination Algorithm ................................................. 1
    Dejun Zhuang, Fan Yu and Daofei Li
    Shanghai Jiao Tong University

    Markus Plankensteiner
    TTA-Group
    Kjeld Buus-Jensen and Finn Visgaard-Nielsen
    Sauer-Danfoss (Nordborg) A/S
    Tomislav Lovric and Wolfgang Mickisch
    TÜV Nord Fahrzeug GmbH
    Peter Rech and Christiana Seethaler
    TTTech Computertechnik AG/TTControl S.r.l.

2005-01-3535 Compliant Control of Electric Power Assisted Steering Systems ................................................................. 19
    A. Emre Cetin, Banu Sinanoglu, Serdar Gungor
    and Ahmet Kanbolat
    Ford Otosan
    M. Arif Adli
    Marmara University

2005-01-3536 About the Change in the Amount of Perspiration and Steer Characteristic by Giving Visual Information and Body Sensory Information in the Drift Cornering ................................................. 29
    Hiromichi Nozaki
    Kinki University, Department of Mechanical Engineering Faculty of Science and Engineering

2005-01-3538 Compromise Between Sensing of Critical Cornering and Drift Control ............................................................. 37
    Hiromichi Nozaki
    Kinki University, Department of Mechanical Engineering, Faculty of Science and Engineering

2005-01-3563 Efficient Monitoring of Loads and Stresses Under Service and Test Conditions ..................................................... 43
    Andreas N. J. Rupp and Alexander Masieri
    University A. S. Kempten
    Thomas Dornbusch
    SWIFT GmbH
    Xuechun Zheng and Fan Yu
    State Key Laboratory of Vibration, Shock and Noise, Institute of Automotive Engineering,
    Shanghai Jiao Tong University

2005-01-3565  Development of Accelerated Durability Tests for Commercial Vehicle Suspension Components ........................................... 55
    Ragnar Ledesma, Leonard Jenaway, Yenkai Wang and Shan Shih
    ArvinMeritor, Inc.

2005-01-3566  A Novel Integrated Chassis Controller Design Combining Active Suspension and 4WS ........................................... 67
    Xiaoming Shen and Fan Yu
    Shanghai Jiao Tong University

2005-01-3568  A Finite Element and Experimental Analysis of a Light Truck Leaf Spring System Subjected to Pre-Tension and Twist Loads ........................................... 77
    Daniel Kirby and Richard Charniga
    Ford Motor Company

2005-01-3577  Experimental Assessment of Baffles and Their Effect on the Longitudinal Sloshing Force in a Scaled Elliptical Tank ........................................... 87
    Manuel J. Fabela-Gallegos, Andres Ramirez-Valencia,
    Carlos A. Favela-Gallegos,
    David Vazquez-Vega and Miguel Martinez-Madrid
    Instituto Mexicano del Transporte

2005-01-3581  Experimental Evaluation of Baffles Geometry and Their Configuration in a Partially Filled Scaled Elliptical Tank ........................................... 93
    Manuel J. Fabela-Gallegos, David Vazquez-Vega,
    Miguel Martinez-Madrid,
    Carlos A. Favela-Gallegos and Andres Ramirez-Valencia
    Instituto Mexicano del Transporte

2005-01-3591  Engine Mounting Layout by Air Suspension ........................................... 101
    Tetsuya Sakai
    Muroran Institute of Technology
    Mitsuo Iwahara and Akio Nagamatsu
    Hosei University
    Toshiyuki Shibayama
    Doshisha University
2005-01-3593  Comparison of Roll Properties of Hydraulically and Pneumatically Interconnected Suspensions for Heavy Vehicles ..............................................................107
Dongpu Cao, Subhash Rakheja and Chun-Yi Su
CONCAVE Research Center, Department of Mechanical and Industrial Engineering, Concordia University

2005-01-3594  Role of Transverse Baffle Designs on Transient Three-Dimensional Liquid Slosh in a Partly-Filled Circular Tank ..........................................................119
Korang Modaressi-Tehrani, S. Rakheja and I. Stiharu
CONCAVE Research Centre, Concordia University

2005-01-3597  Tire Forces and Moments and On-road Lateral Stability of Articulated Steer Vehicles ..........................................................133
N. L. Azad, J. McPhee and A. Khajepour
Departments of Mechanical Engineering and Systems Design Engineering, University of Waterloo

2005-01-3610  Comparison of ABS Configurations and Their Effects on Stopping Performance and Stability for a Class 8 Straight-Truck........................................145
Scott B. Zagorski and Richard L. Hoover
Transportation Research Center Inc.

2005-01-3611  Comparison of Heavy Truck Foundation Brake Performance Measured with an Inertia Brake Dynamometer and Analyses of Brake Output Responses to Dynamic Pressure Inputs ........................................155
Richard L. Hoover and Scott B. Zagorski
Transportation Research Center, Inc.

2005-01-3612  Axiomatic Design of a Smart Inlet Control Valve for Air Brake Compressors ..........................................................181
Paul Reisinger
Bendix Commercial Vehicle Systems Llc

2005-01-3614  Air Disc and S-Cam Brake Stopping Performance Comparison for Class 8 Tractor and Trailer Combinations .............189
Richard L. Hoover, Scott B. Zagorski and Tim Van Buskirk
Transportation Research Center, Inc.
