   Brian “Psychochild” Green—Near Death Studios, Inc.

1.4 Power by the People: User-Creation in Online Games .............. 57
   Cory Ondrejka—Linden Lab

1.5 Games Within Games: Graph Theory for Designers—Part 1 ........... 85
   David Kennerly—Fine Game Design

1.6 Worlds Within Worlds: Graph Theory for Designers—Part 2 .......... 99
   David Kennerly—Fine Game Design

1.7 Guild Management Tools for a Successful MMP Game .............. 113
   Sean “Dragons” Stalzer—The Syndicate

1.8 A Stock Exchange-Inspired Commerce System .................. 125
   John M. Olsen—Infix Games

1.9 Alternatives to the Character Grind ............................. 133
   Artie Rogers—NCSofl

1.10 Telling Stories in Online Games ............................... 147
   Shannon Appelcline—Skotos
1.11 Great in Theory: Examining the Gap Between System Design Theory and Reality ........................................ 165
Justin Quimby—Turbine Entertainment Software

SECTION 2 MMP ENGINEERING TECHNIQUES ........................................ 171

2.1 Automated Testing for Online Games ........................................ 173
Larry Mellon—Electronic Arts

2.2 Massively Multiplayer Scripting Systems .................................... 199
Jon Parise—Electronic Arts

2.3 Real-World MMO Object Sharing ............................................. 209
Joe Ludwig—Flying Lab Software

2.4 MMP Server Cluster Architecture ............................................. 221
Joe Ludwig—Flying Lab Software

2.5 Massively Multiplayer Games Using a Distributed Services Approach ........................................ 233
Shea Street—Tantrum Games

2.6 Metrics Collection and Analysis ................................................ 243
Larry Mellon—Electronic Arts

2.7 Delta-Compression for Heterogeneous Data Transfer .................. 257
Jim Hicke—Xtreme Strategy Games, LLC

2.8 Architecture and Techniques for an MMORTS ............................. 267
Gideon Amir—Majorem
Ramon Axelrod—AiSeek, Inc.

2.9 MMP Engineering Pitfalls .................................................... 277
Justin Quimby—Turbine Entertainment Software

2.10 Animated Procedural Skies .................................................... 285
John M. Olsen—Infix Games

2.11 Time and Event Synchronization Across an MMP Server Farm .... 295
Roger Smith—Modelbenders, LLC
Don Stoner—DCSI

2.12 Anti-Cheat Mechanisms for Massively Multiplayer Games .......... 307
Marty Poulin—Sony Computer Entertainment America

2.13 The Quest for Holy Scale—Part 1: Large-Scale Computing .......... 339
Max Skibinsky—HiveMind, Inc.
2.14 The Quest for Holy Scale—Part 2: P2P Continuum ........................................... 355
Max Skibinsky—HiveMind, Inc.

2.15 Optimization Techniques for Rendering Massive Quantities
of Mesh Deformed Characters in Real-Time ......................................................... 375
John W. Ratcliff—Ageia Technologies, Inc.

SECTION 3 MMP PRODUCTION TECHNIQUES ......................................................... 385

3.1 Large-Scale Project Management ................................................................. 387
Michael Saladino—Electronic Arts
