Table of Contents

Introduction

Interrelationships are Key ............................................................ v
Ronald K. Jurgen, Editor

Brake-by-Wire

Robust Wheel-Slip Control for Brake-by-Wire Systems (2005-01-1584) ........................................... 3
Kunsoo Huh, Daegun Hong, Paljoo Yoon, Hyung-Jin Kang, and Inyong Hwang

Jung Hwan Choi, Kyung Chang Lee, Man Ho Kim, and Suk Lee

Design of Two Families of Electric Park Brake and Their Optional Suite of Functionality & Operational Features (2005-01-0787) ........................................... 19
Dennis Plunkett and Nui Wang

Digital By-Wire Replaces Mechanical Systems in Cars (2004-01-2926) ..................................................... 29
Ronald W. Stence

Control of an Electromechanical Brake for Automotive Brake-By-Wire Systems with an Adapted Motion Control Architecture (2004-01-2050) ..................................................... 37
Chris Line, Chris Manzie, and Malcolm Good

Paljoo Yoon, Hyung-Jin Kang, Inyong Hwang, Kunsoo Huh, and Daegun Hong

An Original Method to Predict Brake Feel: A Combination of Design of Experiments and Sensory Science (2003-01-0598) ..................................................... 55
Victoire Dairou, Alain Priez, Jean-Marc Sieffermann, and Marc Danzart

Sascha Semmler, Rolf Isermann, Ralf Schwarz, and Peter Rieth

Virtual Design of a 42V Brake-by-Wire System (2003-01-0305) ..................................................... 69
Joachim Langenwalter and Bryan Kelly

eBrake® - The Mechatronic Wedge Brake (2002-01-2582) ..................................................... 75
Henry Hartmann, Martin Schaut, Antonio Pascucci, and Bernd Gombert

Development of Vehicle Dynamics Management System for Hybrid Vehicles – ECB System for Improved Environmental and Vehicle Dynamic Performance (2002-01-1586) ..................................................... 81
Masayuki Soga, Michihito Shimada, Jyun-ichi Sakamoto, and Akihiro Otomo
Development of Electronically Controlled Brake System for Hybrid Vehicle (2002-01-0300) ............................................................. 87
Eiji Nakamura, Masayuki Soga, Akira Sakai, Akihiro Otomo, and Toshikazu Kobayashi

Advances and Challenges in BBW AWB Dispulsion for Future Automotive Vehicles (2001-01-3321) ................................................. 93
Bogdan Fijalkowski

The Kinetic Brake Booster (2001-01-3189) ........................................... 105
Valentin Ivanov, Joseph Lepeshko, and Vladimir Boutylin

Antilock Braking Systems (ABS)

Influence of Hydraulic ABS Parameters on Solenoid Valve Dynamic Response and Braking Effect (2005-01-1590) ........................................ 113
Xuele Qi, Jian Song, and Huiyi Wang

Graeme F. Fowler, Robert E. Larson, and Laura A. Wojcik

Andrea Diermeier and Wilhard von Wendorff

Electro Hydraulic Braking System Modelling and Simulation (2003-01-3336) ................................................................. 141
Luigi Petruccelli, Mauro Velardocchia, and Aldo Sorniotti

Soo-Jin Lee, Young-Jun Kim, Kihong Park, and Dong-Goo Kim

Development of Fuzzy Logic Anti-Lock Braking System for Light Bus (2003-01-0458) ....................................................... 155
Sun Jun

The Evaluation of ABS Performance (2003-01-0255) .......................... 159
Yongping Hou and Zhuoping Yu

Seongho Choi, Jinkoo Lee, and Inyong Hwang

A Model Based Design Analysis of Hydraulic Braking System (2003-01-0253) .............................................................. 171
Ijin Yang, Woogab Lee, and Inyong Hwang

ABS System Validation: Integrating Tone Rings and Wheel Speed Sensors in HIL Simulation (2002-01-3123) ..................................... 177
Mark Bennett and Michael Tober

Magneto-Optic Tachometers for Automotive Vehicles' Chassis (2002-01-2227) .................................................. 183
Wojciech Weglarski
The Theoretical Concepts for Pre-Extreme ABS (2002-01-2185) ...................................................... 189
Valentin Ivanov, Michael Vysotsky,
Vladimir Boutylin, and Joseph Lepeshko

On Board Doppler Sensor for Absolute Speed Measurement in
Automotive Applications (2002-01-1071) ................................................................. 195
Thierry Ditchi, Stéphane Holé,
Céline Corbrion, and Jacques Lewiner

The Rapid Development of Vehicle Electronic Control System by
Hardware in the Loop Simulation (2002-01-0568) ................................................... 201
Li Jun, Feng Jinzhi, Yu Fan, and Zhang Jianwu

Approach of Debugging Control Laws of ABS Combined with
Hardware in the Loop Simulation and Road Experiment (2001-01-2729) ............... 209
Huiyi Wang, Bo Gao, and Jian Song

Roll Over Prevention Based on State of the Art ABS Systems (2001-01-2727) ............. 213
Gusztav Holler and Joseph Macnamara

An Investigation into Fuzzy Control for Anti-Lock Braking System
Based on Road Autonomous Identification (2001-01-0599) ........................................ 219
Li Jun, Zhang Jianwu, and Yu Fan

The Development and Testing of a Prototype Electromagnetic
ABS for Drum Brakes (2001-01-0598) .............................................................. 227
J. Andrew Ridnour and Frank H. Speckhart

Comparison of Control Methods for Electric Vehicle AntiLock
Braking/Traction Control Systems (2001-01-0596) ...................................................... 237
P. Khatun, C. M. Bingham, and P. H. Mellor

Mixed H∞ and Fuzzy Logic Controllers for the Automobile ABS (2001-01-0594) ........... 247
Farhad Assadian

Traction Control Systems (TCS, ASR)

The Effect of Tyre Dynamics on Wheel Slip Control Using Electromechanical
Brakes (2005-01-0419) ...................................................... 259
Okwuchi Emereole and Malcolm Good

Hardware-in-the-loop Simulation for Traction Control and the Debugs
of its Electric Control Unit (2004-01-2056) ...................................................... 271
Huiyi Wang

Dana Torque Vectoring Differential Dynamic Trak™ (2004-01-2053) ...................... 277
John Park and William J. Kroppe

An Empirical Model for Longitudinal Tire-Road Friction
Estimation (2004-01-1082) ................................................................. 283
Mingyuan Bian, Keqiang Li, Nenglian Feng, and Xiaomin Lian

Vehicle Dynamics and Torque Management Devices (2004-01-1058) ...................... 289
Heinrich Huchtkoetter and Theodor Gassmann
Theodor Gassman and John A. Barlage

The Advantages of an Electronically Controlled Limited Slip Differential (2004-01-0861) .................................................................305
Jerry Kinsey

Deron Littlejohn, Tom Fornari, George Kuo, Bryan Fulmer, Andrew Mooradian, Kevin Shipp, Joseph Elliott, Kwangjin Lee, and Margaret Richards

Adaptive Hydraulic Braking Traction Control for the 2003 Chevrolet Kodiak and GMC TopKick (2002-01-3116) ........................................321
Francis P. Tyienda and Yuji Nakayasu

Improved Differential Function for Avoiding Slippage of Motor Vehicles in a Muddy Trench (2002-01-0988) ........................................329
S. S. Gill, N. S. Kalsi, Balraj Singh, Nirmal Singh, and Neetu Singh

Improving Performance of a 6x6 Off Road Vehicle Through Individual Wheel Control (2002-01-0968) ..................................................333
Andrew Jackson, David Crolla, Adrian Woodhouse, and Michael Parsons

Rotating Wheel Torque Meter with Telemetrie Data Transmission (2001-01-0793) .................................................................341
Thomas Berther and Hans Burkard

Traction Control Applications in Engine Control (2000-01-3464) ..........347
Badih Jawad, Nabil Hachem, Sasa Cizmic, Janette Leese, and William Bowerman

Stability Control Systems (VDC)

The Development of Active Geometry Control Suspension (AGCS) System (2005-01-1927) .................................................................355
Sangho Lee, Hyun Sung, and Unkoo Lee

Herbert Schuette and Peter Waeltermann

Enhanced Traction Stability Control System (2005-01-1591) ...............379
Youssef A. Ghoneim, William C. Lin, Yuen-Kwok Chin, and David M. Sidlosky

Vehicle System Modeling for Computer Aided Chassis Control Development (2005-01-1432) ........................................391
Judy Che, Mark Jennings, and Alexander Zaremba
A Vehicle State Detection Method Based on Estimated Aligning Torque Using EPS (2005-01-1265) .......................................................... 403
Kenji Nakajima, Masahiko Kurishige,
Masaya Endo, and Takayuki Kifuku

Integration of Active Suspension and Active Driveline to Ensure Stability While Improving Vehicle Dynamics (2005-01-0414) ......................... 411
Nicolas Cooper, David Crolla,
Martin Levesley, and Warren Manning

Modelling and Simulation of Electric Stability Program for the Passenger Car (2004-01-2090) .......................................................... 417
Huiyi Wang and Chunyu Xue

P. Borio, U. Delcaro, S. Frediani,
C. Ricci, and G. Caviasso

Integration Chassis Control (ICC) Systems of Mando (2004-01-2044) .................................................................................. 433
Youseok Kou, Wanil Kim, SangHo Yoon,
JeongWoo Lee, and Dongshin Kim

Mark Harrison, Yuzuru Otsuka, and Minekazu Sakai

Four-wheel-steering Control Strategy and its Integration with Vehicle Dynamics Control and Active Roll Control (2004-01-1061) .......................................................... 445
Mauro Velardocchia, Andrea Morgando, and Aldo Sorniotti

A Supervisory Control to Manage Brakes and Four Wheel Steer Systems (2004-01-1059) .......................................................... 455
Edward J. Bedner, Jr. and Hsien H. Chen

Taeyoung Chung, Kyongsu Yi,
Jeongtae Kim, and Jangmoo Lee

ESC II – ESC With Active Steering Intervention (2004-01-0260) .................................................................................. 471
Peter E. Rieth and Ralf Schwarz

A Failsafe Strategy for a Vehicle Dynamic Control (VDC) System (2004-01-0190) .......................................................... 479
Mauro Velardocchia and Aldo Sorniotti

Mohammad Durali and Yusef Bahramzadeh

Farzad Tahami, Shahrokh Farhanghi, and Reza Kazemi

Sohel Anwar
Direct Yaw Control of an All-Wheel-Drive EV Based on Fuzzy Logic and Neural Networks (2003-01-0956) .................................................................511
Farzad Tahami, Reza Kazemi, and Shahrokh Farhanghi

The Development of an Advanced Control Method for the Steer-by-Wire System to Improve the Vehicle Maneuverability and Stability (2003-01-0578) .................................................................519
Se-Wook Oh, Seok-Chan Yun, Ho-Chol Chae, Seok-Hwan Jang, Jae-Ho Jang, and Chang-Soo Han

R. Willig and M. Mörbe

Development of Mando ESP (Electronic Stability Program) (2003-01-0101) .................................................................535
Dongshin Kim, Kwangil Kim, Woogab Lee, and Inyong Hwang

Fuzzy Based Stability Enhancement System for a Four-Motor-Wheel Electric Vehicle (2002-01-1588) .................................................................541
Farzad Tahami, Reza Kazemi, Shahrokh Farhanghi, and Behzad Samadi

Trade-Offs for Vehicle Stability Control Sensor Sets (2002-01-1587) .................................................................551
Mike Babala, Gary Kempen, and Paul Zatyko

Driveline Torque-Bias-Management Modeling for Vehicle Stability Control (2002-01-1584) .................................................................557
Chia-Shang Liu, Vincent Monkaba, Hualin Tan, Clive McKenzie, Hyeongcheol Lee, and Sophia Suo

Understanding the Interaction Between Passive Four Wheel Drive and Stability Control Systems (2002-01-1047) .................................................................569
Syun K. Lee and Nancy M. Atkinson

Influence of Active Chassis Systems on Vehicle Propensity to Maneuver-Induced Rollovers (2002-01-0967) .................................................................575
Aleksander Hac

A New Control Strategy for Vehicle Active Suspension System Using PID and Fuzzy Logic Control (2001-01-2519) .................................................................583
Yu Fan, Li Jun, Feng Jinzhi, and Zhang Jianwu

Research of Driver Assistance System for Recovering Vehicle Stability from Unstable States (2001-01-1276) .................................................................591
Xinpeng Tang and Kenichi Yoshimoto

A Coordination Approach for DYC and Active Front Steering (2001-01-1275) .................................................................597
M. Selby, W. J. Manning, M. D. Brown, and D. A. Crolla

Stability Control of Combination Vehicle (2001-01-0138) .................................................................605
Pahngroc Oh, Hao Zhou, and Kevin Pavlov

Development of Vehicle Stability Control System Based on Vehicle Sideslip Angle Estimation (2001-01-0137) .................................................................613
Akitaka Nishio, Kenji Tozu, Hiroyuki Yamaguchi, Katsuhiko Asano, and Yasushi Amano
Rollover Propensity Evaluation of an SUV Equipped with a TRW VSC System (2001-01-0128) .................................................................................................................................621
Ali Y. Ungoren, Huei Peng, and Danny R. Milot

What the Future Holds

Active Development Underway in Many Areas .................................................................633
