# Table of Contents

Introducing Combustion-Turbulence Interaction in Parallel Simulation of Diesel Engines .......................................................... 1  
   P. Belardini, C. Bertoli, S. Corsaro, P. D’Arabia

An Enhanced Parallel Version of Kiva-3V, Coupled with a 1D CFD Code, and Its Use in General Purpose Engine Applications .............. 11  
   G. Bella, F. Bozza, A. De Maio, F. Del Cillo, S. Filippone

A Distributed, Parallel System for Large-Scale Structure Recognition in Gene Expression Data .......................................................... 21  
   J. Ernst

Cluster Design in the Earth Sciences Tethys ........................................... 31  
   J. Oeser, H.-P. Bunge, M. Mohr

A Streaming Implementation of Transform and Quantization in H.264 ........................................................................................................ 41  
   H. Li, C. Zhang, L. Li, M. Pang

A Parallel Transferable Uniform Multi-Round Algorithm in Heterogeneous Distributed Computing Environment .............................. 51  
   H. Yamamoto, M. Tsuru, Y. Oie

Clustering Multicast on Hypercube Network ............................................ 61  
   S. Lu, B. Fan, Y. Dou, X. Yang

Checkpointing and Communication Pattern-Neutral Algorithm for Removing Messages Logged by Senders ................................. 71  
   J. Ahn

The Design of a Dynamic Efficient Load Balancing Algorithm on Distributed Networks .............................................................. 81  
   Y. Lee, O. Lee, W. Choi, C. Youn, I. Chung

Distributed Resource Allocation for Stream Data Processing .................. 91  
   A. Tang, Z. Liu, C. Xia, L. Zhang

Network Probabilistic Connectivity: Expectation of a Number of Disconnected Pairs of Nodes ...................................................... 101  
   A.S. Rodionov, O.K. Rodionova
