# Table of Contents

## Invited Lectures

Consistent Query Answering: Five Easy Pieces .......................... 1  
*Jan Chomicki*

Ask a Better Question, Get a Better Answer: A New Approach to Private Data Analysis .............................................. 18  
*Cynthia Dwork*

Beauty and the Beast: The Theory and Practice of Information Integration ................................................................. 28  
*Laura Haas*

## Information Integration and Peer to Peer

Approximate Data Exchange .................................................. 44  
*Michel de Rougemont and Adrien Vieilleribièr*

Determinacy and Rewriting of Conjunctive Queries Using Views: A Progress Report ...................................................... 59  
*Alan Nash, Luc Segoufin, and Victor Vianu*

Compact Samples for Data Dissemination ................................ 74  
*Tova Milo, Assaf Sagt, and Elad Verbin*

Privacy in GLAV Information Integration ................................ 89  
*Alan Nash and Alin Deutsch*

## Axiomatizations for XML

Unlocking Keys for XML Trees .............................................. 104  
*Sven Hartmann and Sebastian Link*

Characterization of the Interaction of XML Functional Dependencies with DTDs ......................................................... 119  
*Lucja Kot and Walker White*

Axiomatizing the Logical Core of XPath 2.0 ................................ 134  
*Balder ten Cate and Maarten Marx*

## Expressive Power of Query Languages

Query Evaluation on a Database Given by a Random Graph .......... 149  
*Nilesh Dalvi*
The Limits of Querying Ontologies .............................. 164  
Riccardo Rosati

Incompleteness, Inconsistency, and Uncertainty

Complexity of Consistent Query Answering in Databases Under  
Cardinality-Based and Incremental Repair Semantics ............. 179  
Andrei Lopatenko and Leopoldo Bertossi

World-Set Decompositions: Expressiveness and Efficient Algorithms .... 194  
Lyublena Antova, Christoph Koch, and Dan Olteanu

On the Expressiveness of Implicit Provenance in Query and Update  
Languages ................................................. 209  
Peter Buneman, James Cheney, and Stijn Vansummeren

Trajectory Databases: Data Models, Uncertainty and Complete Query  
Languages ................................................. 224  
Bart Kuijpers and Walied Othman

XML Schemas and Typechecking

Complexity of Typechecking XML Views of Relational Databases .... 239  
Piotr Wieczorek

Exact XML Type Checking in Polynomial Time .......................... 254  
Sebastian Maneth, Thomas Perst, and Helmut Seidl

Optimizing Schema Languages for XML: Numerical Constraints  
and Interleaving ........................................... 269  
Wouter Gelade, Wim Martens, and Frank Neven

Stream Processing and Sequential Query Processing

Database Query Processing Using Finite Cursor Machines ............. 284  
Martin Grohe, Yuri Gurevich, Dirk Leinders, Nicole Schweikardt,  
Jerzy Tyszkiewicz, and Jan Van den Bussche

Constant-Memory Validation of Streaming XML Documents  
Against DTDs .................................................. 299  
Luc Segoufin and Cristina Sirangelo

Ranking

Preferentially Annotated Regular Path Queries .......................... 314  
Gösta Grahne, Alex Thomo, and William Wadge
