Compiler Construction

16th International Conference, CC 2007
Held as Part of the Joint European Conferences on Theory and Practice of Software, ETAPS 2007
Braga, Portugal, March 26-30, 2007
Proceedings

Springer
# Table of Contents

## Architecture

New Algorithms for SIMD Alignment ........................................... 1  
*Liza Fireman, Erez Petrank, and Ayai Zaks*

Preprocessing Strategy for Effective Modulo Scheduling on Multi-issue Digital Signal Processors ........................................... 16  
*Doosan Cho, Ravi Ayyagari, Gang-Ryung Uh, and Yunheung Paek*

An Array Allocation Scheme for Energy Reduction in Partitioned Memory Architectures ........................................... 32  
*K. Shyam and R. Govindarajan*

## Garbage Collection and Program Analysis

Using Prefetching to Improve Reference-Counting Garbage Collectors ........................................... 48  
*Harel Paz and Erez Petrank*

Accurate Garbage Collection in Uncooperative Environments with Lazy Pointer Stacks ........................................... 64  
*Jason Baker, Antonio Cunei, Filip Pizlo, and Jan Vitek*

Correcting the Dynamic Call Graph Using Control-Flow Constraints ........................................... 80  
*Byeongcheol Lee, Kevin Resnick, Michael D. Bond, and Kathryn S. McKinley*

Obfuscating Java: The Most Pain for the Least Gain ........................................... 96  
*Michael Batchelder and Laurie Hendren*

## Register Allocation

A Fast Cutting-Plane Algorithm for Optimal Coalescing ........................................... 111  
*Daniel Grund and Sebastian Hack*

Register Allocation and Optimal Spill Code Scheduling in Software Pipelined Loops Using 0-1 Integer Linear Programming Formulation ........................................... 126  
*Santosh G. Nagararkatte and R. Govindarajan*

Extended Linear Scan: An Alternate Foundation for Global Register Allocation ........................................... 141  
*Vivek Sarkar and Rajkishore Barik*
Program Analysis

Program Refactoring, Program Synthesis, and Model-Driven Development .................................................. 156
  Don Batory

A Practical Escape and Effect Analysis for Building Lightweight Method Summaries ........................................ 172
  Sigmund Cherem and Radu Rugina

Layout Transformations for Heap Objects Using Static Access Patterns .......................................................... 187
  Jinseong Jeon, Keoncheol Shin, and Hwansoo Han

A New Elimination-Based Data Flow Analysis Framework Using Annotated Decomposition Trees ...................... 202
  Bernhard Scholz and Johann Blieberger

A Declarative Framework for Analysis and Optimization ................................................................................. 218
  Henry Falconer, Paul H.J. Kelly, David M. Ingram, Michael R. Mellor, Tony Field, and Olav Beckmann

Author Index ................................................................................................................. 233
