# Table of Contents

## I. Invited Talks/Competition

Logic Programming and Nonmonotonic Reasoning: From Theory to Systems and Applications .................................................. 1  
*Nicola Leone*

Policy-Based Computing: From Systems and Applications to Theory ... 2  
*Jorge Lobo*

The First Answer Set Programming System Competition .................. 3  
*Martin Gebser, Lengning Liu, Gayathri Namasivayam,  
André Neumann, Torsten Schaub, and Miroslaw Truszczynski*

## II. Technical Papers

CR-MODELS: An Inference Engine for CR-Prolog ............................... 18  
*Marcello Balduccini*

Debugging ASP Programs by Means of ASP ................................. 31  
*Martin Brain, Martin Gebser, Jörg Pührer, Torsten Schaub,  
Hans Tompits, and Stefan Woltran*

A Purely Model-Theoretic Semantics for Disjunctive Logic Programs with Negation ................................................................. 44  
*Pedro Cabalar, David Pearce, Panos Rondogiannis, and  
William W. Wadge*

Complexity of Default Logic on Generalized Conjunctive Queries ...... 58  
*Philippe Chapdelaine, Miki Hermann, and Ilka Schnoor*

A Preference-Based Framework for Updating Logic Programs ........... 71  
*James P. Delgrande, Torsten Schaub, and Hans Tompits*

Well-Founded Semantics and the Algebraic Theory of Non-monotone Inductive Definitions ......................................................... 84  
*Marc Denecker and Joost Vennekens*

On the Complexity of Answer Set Programming with Aggregates ....... 97  
*Wolfgang Faber and Nicola Leone*

Experimenting with Look-Back Heuristics for Hard ASP Programs ...... 110  
*Wolfgang Faber, Nicola Leone, Marco Maratea, and Francesco Ricca*
### Table of Contents

#### Complexity of Rule Redundancy in Non-ground Answer-Set Programming over Finite Domains

Michael Fink, Reinhard Pichler, Hans Tompits, and Stefan Woltran

123

#### Conflict-Driven Answer Set Enumeration

Martin Gebser, Benjamin Kaufmann, André Neumann, and Torsten Schaub

136

#### Head-Elementary-Set-Free Logic Programs

Martin Gebser, Joohyung Lee, and Yuliya Lierler

149

#### A Deductive System for PC(ID)

Ping Hou, Johan Wittocx, and Marc Denecker

162

#### Modularity Aspects of Disjunctive Stable Models

Tomi Janhunen, Emilia Oikarinen, Hans Tompits, and Stefan Woltran

175

#### A Characterization of Strong Equivalence for Logic Programs with Variables

Vladimir Lifschitz, David Pearce, and Agustín Valverde

188

#### A Unified Semantics for Constraint Handling Rules in Transaction Logic

Marc Meister, Khalil Djelloul, and Jacques Robin

201

#### Conditional Planning with External Functions

Davy Van Nieuwenborgh, Thomas Eiter, and Dirk Vermeir

214

#### Logic Programs with Abstract Constraints: Representaton, Disjunction and Complexities

Jia-Huai You, Li Yan Yuan, Guohua Liu, and Yi-Dong Shen

228

#### General Default Logic

Yi Zhou, Fangzhen Lin, and Yan Zhang

241

### III. System Descriptions

#### The $\mathcal{LP}$-OD System: Logic Programming Meets Outlier Detection

Fabrizio Angiulli, Gianluigi Greco, Luigi Palopoli, and Domenico Trimboli

254

#### clasp: A Conflict-Driven Answer Set Solver

Martin Gebser, Benjamin Kaufmann, André Neumann, and Torsten Schaub

260

#### GrinGo: A New Grounder for Answer Set Programming

Martin Gebser, Torsten Schaub, and Sven Thiele

266
Using Answer Sets to Solve Belief Change Problems .......................... 272
   Aaron Hunter, James P. Delgrande, and Joel Faber

An **Smodels** System with Limited Lookahead Computation ............... 278
   Gayathri Namasivayam and Mirosław Truszczynski

Programming Applications in CIFF ........................................... 284
   Paolo Mancarella, Fariba Sadri, Giacomo Terreni, and
   Francesca Toni

CPP: A Constraint Logic Programming Based Planner with
   Preferences ................................................................. 290
   Phan Huy Tu, Tran Cao Son, and Enrico Pontelli

IV. Posters

An Application of Defeasible Logic Programming to Decision Making
   in a Robotic Environment ............................................. 297
   Edgardo Ferretti, Marcelo Errecalde, Alejandro J. García, and
   Guillermo R. Simari

On the Effectiveness of Looking Ahead in Search for Answer Sets ...... 303
   Guohua Liu and Jia-Huai You

Enhancing ASP Systems for Planning with Temporal Constraints ...... 309
   Veena S. Mellarkod and Michael Gelfond

Semantics for Possibilistic Disjunctive Programs ......................... 315
   Juan Carlos Nieves, Mauricio Osorio, and Ulises Cortés

Modularity in SMODELS Programs ......................................... 321
   Emilia Oikarinen

**Author Index** .............................................................. 327
