INTERNATIONAL SYMPOSIUM ON GLASS

DIGEST

SEPTEMBER 3—7, 1984
BEIJING, CHINA

The Chinese Silicate Society
CONTENTS

Recent problems about glass chemistry..........................M. M. Schultz (1)
Some aspects on SiO₂ glass structure..................Jiang Zhonghong, Qian Zhenying et al. (2)
The structure of glass—a continuum model....................L. D. Pye (3)
Formation and structure of titanate glasses..................Cheng Jijian, Chen Wei (4)
Theoretical and experimental elucidation of the structure of alkaline earth aluminosilicates
Study on Raman spectrum of Na₂O–Al₂O₃–P₂O₅ glasses...Jin Yifen, Jiang Dehua et al. (6)
Structure and vibrational spectra of glasses containing several glass forming oxides and no modifying oxides........Huang Guosong, Chen Haiyan et al. (7)
DTA. X-ray and IR studies of strontium–phosphate glasses...Qi Yafan, Liao Yunmao et al. (8)
Network structure investigation of nioboborate glasses...Wang Zhongcai, Sui Bingkai et al. (9)
Structural analysis of CaSiO₃ glass by X-ray diffraction and Raman spectroscopy........C. D. Yin, M. Okuno et al. (10)
EXAFS and XANES joint analysis of semiconducting vanadium–phosphate glasses.....O. Gzowski, L. Murawski et al. (11)
Magnetic resonance on high disordered glasses................S. Simon, V. Simon et al. (12)
A HREM study of CdSe-glass coloration.....................Wen Shulin, Feng Jingwei (13)
NMR studies of Na₂O–B₂O₃–SiO₂ glasses with moderate alkali content........Xiao Shaozhan, Meng Qingan (14)
Investigation of structural effect of Fe³⁺ in alkali-silicate glasses................Cheng Yibing, Xu Chao et al. (15)
Structural study and electrical conductivity of lithium borosilicate glasses containing transition metal oxides.........................A. M. Sanad, I. Kashif et al. (16)
Elementary intrinsic defects generation mechanisms and structure in fused silica........A. R. Silin (17)
Influence of crystallization on internal friction of some oxide glasses...........Li Jiazhi (18)
Use of generalized Maxwell model for the analysis of mechanical properties of glasses in the glass transition region...............O. V. Mazurin, D. G. Damdinov et al. (19)
Internal friction in vanadium-phosphate glass doped with the Na₂O ..................D. Samatowicz, D. Bednarczyk et al. (20)
Strength and fatigue of some binary and ternary silicate glasses.....................E. Gehrke, M. Hahnert et al. (21)
Migration of Cu⁺ ions in Cu₂O–Al₂O₃–SiO₂ glasses by heating in air................K. Kamiya, T. Yoko et al. (22)
Stress-strain-acoustic emission response of glasses ......................... Jin Zongzhe, Yang Hong (23)
Microhardness and softening points of some vanadate glasses ....................... N. A. Ghoneim, M. M. Halawa (24
Distribution of ions in the surface layers of ion-exchanged glasses ..................... V. V. Moiseev, V. I. Nefedov et al. (26)
Effect of impure ions in molten KNO₃ on ion-exchange and strengthening of glasses ......................... Zhang Xiangchen, He Ouli et al. (27)
Effects of devitrification on leaching behavior of a simulated nuclear waste glass ................... B. F. Zhu, D. E. Clark et al. (28)
A study on water durability of tin-doped glasses ................................ Gao Minqin, Katsuaki Takahashi (29)
Effect of phase separation on weathering of soda-lime-silica glasses ........................................ Wang Chengyu, Zhou Liangzhi (30)
Mixed-alkali effect in alkali borate glasses ........................................ A. A. Ahmed (31)
Chemical durability of Na₂O-TiO₂-SiO₂ glasses and mixed alkali effect ..................................... Sun Yuzhen, Su Youan et al. (32)
Effect of anion additives in molten salt on glass strengthening ........................................ Jiang Youmei, Jiang Linge (33)
Nuclear waste glass leaching—comparison of laboratory and field tests .................. D. E. Clark, B. F. Zhu (34)
Electrochemical studies on ionic behavior in molten glasses .................................................. Katsuaki Takahashi, Yoshinari Miura (35)
Effect of small amount of oxide additives on the wetting behavior of glass on metal ................................ Wang Minquan, Ge Manzhen et al. (36)
Acidity and ionic structure of molten alkali silicates ........................................ Michael Perander (37)
Field-assisted reaction at metal-molten glass interface .................................................. Y. Miura, K. Takahashi (38)
Dealkalization of glass surfaces utilizing aggressive gases ........................................... H. A. Schaeffer (39)
Evaluation of grain loss method for chemical durability of commercial glasses for use in quality control ........................................ N. A. Ghoneim, F. A. Moustaffa et al. (40)
Effect of oxidic film thickness of kovar on sealing strength in hard-glass kovar seals ..................... Wang Yikong, Cheng Xuguan (42)
Corrosion of molybdenum metal by minor ingredients of soda-lime glass batch .................. Yu Xiaoyan, Wang Nanning et al. (43)
Field-assisted ion exchange between molten alloys and soda lime glass ................................ Liang Zhihong, Alfred R. Cooper (44)
Spectroscopy of transition metal ions in inorganic glasses ........................................... Gan Fuxi (45)
Effect of heating and cooling atmosphere on colors of red glaze and glass containing copper ........................................ M. Wakamatsu, N. Takeuchi et al. (46)
Study on ultraviolet absorption of glasses based on XₙOₙ-MO-M₂O system ...........................
Xu Yuezhen

Time-resolved fluorescence spectra of titanium-containing fluorophosphate glasses

Liu Huiming, Gan Fuxi

Structural interpretation of spectral luminescent properties of sodium borosilicate glasses activated by ions of variable valency

S. S. Kasymova, E. M. Milyukov et al.

d-f transition bands of Pr, Sm and Yb ions in silica glasses

Gu Zhenan

Optical absorption and elastic property of Li_2O-(LiCl)_2-B_2O_3-Al_2O_3 glasses

Huang Xihuai, Huang Pengnia

Temperature dependence and time evolution of luminescence of Ce^{3+}, Tb^{3+}, Tm^{3+} in phosphate glasses

Qi Changhong, Gan Fuxi et al.

Luminescence of Cu^{+} ions in phosphate glasses

Liu Huiming, Gan Fuxi

Optical absorption property of glasses colored with Cd (S, Se, Te)

Chen Xuexian, Sheng Liangen et al.

Preparation and properties of cerium activated lithium glass scintillators

Shi Guizhen et al.

A study of the accuracy of the measurement of the spectral specular reflectance of coated flat glass with commercial spectrophotometers

P. Polato, F. Geotti-Bianchini et al.

Reflection spectra of silicate glasses in the vacuum region

T. Izumitani, S. Hirota

Infrared spectra of some glasses in the ternary system V_2O_5-P_2O_5-CaO

N. A. Ghoneim

Infra-red absorption spectra of some selected alkali silicate glasses in relation to their structure

F. A. Moustaffa, N. A. Ghoneim et al.

Development of machineable bioactive glass ceramics for medical uses

W. Vogel, W. Holand et al.

Phase separation and controlled crystallization of non-oxide glasses

Cheng Jijian

Electrical characteristics of materials of the system BaO–Fe_2O_3–B_2O_3

D. Hulsenberg, O. Knauf

Influence of alternating electric fields on the crystallization of barium titanate glasses

D. Hulsenberg, J. Lehmann

Crack nucleation in ultrathin blown silicate glasses

T. Toninato, V. Gottardi

Study on crystallization of some Li–Al–Si–O–N glasses

Hu Guanqing, Yao Luping et al.

Effect of Al_2O_3 on phase separation and crystallization in ZnO–Al_2O_3–B_2O_3–SiO_2 glasses

Wu Tie, He Ouli et al.

Quantitative calculation of immiscibility ranges of multi-component glass systems

Jiang Zhonghong, Guo Yanhua

Melting kinetics of crystals in glass-forming systems

Fang Zhiyao, D. R. Uhlmann

Phlogopite based glass-ceramics

Li Rounan, Zhu Peinan

Relationship between phase separation and properties in some non-prototype glasses
Zhu Peinan

Study of crystallization of Li₂O-ZnO-Al₂O₃-SiO₂ system glasses

Wang Changwen, Xu Wentian

Glass formation and crystallization in ZrO₂-Al₂O₃-P₂O₅ system

Zheng Guopei, Bai Xueling et al.

Colour of photosensitive coloured glass of Na₂O-ZnO-Al₂O₃-SiO₂ system containing F, Br and Ag

Nie Chunsheng, Lin Aixin

Effect of minor additional P₂O₅ on some phase transformations of plate glasses

Jiang Zhonghua, Zhou Zhichao et al.

Chemical strengthening of Na₂O-Al₂O₃-SiO₂ system glasses by surface controlled crystallization

Cheng Jijian, Zhu Binfu et al.

Some recent new applications of glass technology

H. M. Garfinkel

Glass formation, properties and structure of glasses in the P₂O₅-WO₃-K₂O-Al₂O₃ system

Qi Yafan, He Li

Glass formation and properties of glasses in X₂O₃ (X= B, Al, Ga)-K₂O(ZnO)-Nb₂O₅ systems

Wang Zhongcai Yin Yingji et al.

Glass formation and optical properties of glasses in the systems (R₂O of R'O)-Ta₂O₅-Ga₂O₃

T. Kokubo, S. Inaka et al.

Some data concerning the viscosity dependence upon the molecular mass of sodium-silicate and lead-silicate glasses

P. Balta, M. V. Dinulescu

Electrical and magnetic properties of lithium borate glass containing iron

A. G. Mostafa, A. M. Sanad et al.

Infrared spectra of some glasses in the V₂O₅-P₂O₅-CaO system

N. A. Ghoneim

Physical properties of glasses containing several glass-forming oxides

Lin Fengying, Gu Donghong et al.

High-chromium containing lithium silicate glasses

G. Fdez. Arroyo, C. Moure et al.

Halide glasses

Jacques Lucas

Halide glasses based on chlorides, bromides and iodides

Ma Fuding, John Lau et al.

Glass formation and chemical duralility of some ZnCl₂-based ternery halide systems

Hu Xinyuan, Jiang Zhonghong et al.

The effect of oxide impurity on the physical properties of fluorozirconate glass

Hu Hefang

Effects of As and Te on crystallization and optical gaps of selenium

Yang Hanmei, Wang Weizhong et al.

Chalcogenide glass electrodes sensitive to heavy metal ions

N. Tohge, M. Tanaka

Refractories for the glass industry

V. Gottardi

The corrosion of zirconia and zircon refractories by molten glasses

K. Kato, N. Araki
Quantitative model studies of stirrers for laboratory glass melts........................................Wang Shaosheng, M. Cable (93)
Investigation of eliminating volatile striae by a quantitative method........................................Mi Qingzhou, Zheng Songlin et al. (94)
Glass homogeneity measurement using Shelyubskii technique.........................................Arun K. Varshneya, (95)
An improved apparatus of measuring inhomogeneity of glasses..............................................Teruo Sakaino, Sang-Soo Lee, et al. (97)
Analyses of production problems affecting glassware performance.....................................Henry M. Dimmick, John S. Wasylyk (98)
The mathematical modelling of glass manufacturing processes..............................................H. Rawson, (99)
Improvement on the construction of float glass tank furnace by physical modeling..............Zhou Zhihao, Zheng Dade (100)
Modeling of heat transfer in melting of glass batch..................................................X. Wu, R. Viskanta (101)
Evaluation of batch mixing quality by \( \chi^2 \) testing combined with standard deviation......Zhang Bidong (102)
The preheating of glass batch..........................................................M. L. Froberg (103)
Effect of return flow on melting rate and heat efficiency in flat glass melting furnaces........Chen Zhengshu (104)
Energy savings in glass conditioning..........................................................................................Peter Vilk (105)
New development in glass batch preparation; pelletization; energy saving by preheating......B. Zippe (106)
Energy savings in the glass industry due to the use of steel recuperators............................P. Billarand, R. Dupeyron et al. (107)
Developments in float and fibre glass products........................................................................A. S. Robinson (108)
Development and evolution of the new drawing process.......................................................T. Murayama, (109)
Preparation techniques of phosphate laser glasses...............................................................Jiang Yasi, Zhang Junzhou et al. (111)
Effect of sodium sulphate and temperature on the fining of float glass................................S. Manabe, K. Kitamura, (112)
The role of \( \text{As}_2\text{O}_3 \) and \( \text{CeO}_2 \) in the decolorization and refining processes of industrial glass........S. Hreglich, F. Nicoletti et al. (113)
An aspect of glass in a post industrial society.................................................................J. H. Cook (114)
Glass defects in specialty and container glasses.......................................................................J. F. Wosinski (115)
Improvements in the manufacture of flat glass.........................................................................Larry R. McCoy (116)
Theoretical and practical achievements in electric melting of glass......................................Jaroslav Stanek (117)
Glass experiments in space.......................................................................................................N. J. Kreidl (118)
Ion bombardment of glass.........................................................................................................A. Deshkovskaya (119)
Hydration of phosphate and borate glasses at high temperatures and high pressures........Huang Zhanjie, Sumio Sakka et al. (120)
Formation and stability of amorphous III–V compounds.........................................................Wang Hao, Gan Fuxi et al. (121)
Preparation of hydrogenated amorphous silicon oxide film by RF glow discharge........

Design and operation of electrically heated forehearth........Shi Jinan, Fang Xianbo et al. (123)

Sol-gel: science, processes and products..............................Helmut Dislich, (124)

Hotmelt adhesives for glass containers by the sol-gel process...H. Schmidt, H. Scholze et al. (125)

Devitrification kinetics of a sol-gel prepared Na$_2$O$\cdot$2SiO$_2$ glass...A. Buri, A. Marotta et al. (126)

Optical absorption of doped silica glasses from gels..............Liu Xiaoming, Wang Yuguang (127)

Some characteristics of Al$_2$O$_3$-B$_2$O$_3$-SiO$_2$ glasses prepared from gels..................Liu Xiaoming, Wang Yuguang (128)

Variations of structure and homogeneity in the transformation process from gel to glass in some silicate systems..................Jiang Fusong, Hou Lisong et al. (129)

Glass composition for spinning reinforcement fibres.............S. Kumar (130)

Heterogeneous equilibria and elements distribution in MCVD process for making optical fiber..................Zhang Yinghua, Gao Xinhua et al. (131)

Phosphate-based optical fibres, drawing technique and properties........................................J. Wasylak, J. Dorosz (132)

Alkali resistance of some silicate glass fibres......................G. Scarinci, D. Festa et al. (133)

A new production line for glasswool in Italy............Luigi Montani, Gerard Hoff et al. (134)

Crystallization of glass fibres of the system Zn-Fe-Mn-oxides-alumina-silica..............................E. Lucchini, R. Dal Maschio (135)

Study of alkali resistance of CaO-Al$_2$O$_3$-SiO$_2$ glasses........Ge Dunshi, Han Zhiying et al. (136)

Compound glass preparation for optical fibers using Brazilian natural quartz..............................................Luiz Carlos Barbosa, Carlos K. Suzuki (137)

Chemical analyses of some early Chinese glasses...Robert H. Brill, Stephen S. C. Tong et al. (138)

Investigation on some Chinese ancient lead glasses..............Shi Meiguang, He Ouli, (139)

Lead isotope studies of early Chinese glasses......I. Lynus Barnes, Robert H. Brill et al. (140)

Relations between the ancient Chinese glasses and the glasses excavated in the Japanese tombs........................................Kazuo Yamasaki, Masayo Murozumi (141)

Technology of ancient Chinese glasses in Bo Shan around the 14th century........................................Yi Jialiang, Tu Shujin (142)

Physical properties of early Chinese glasses...............John F. Wosinski, Robert H. Brill (143)

Chinese early glass vessels...........................................An Jiayao (144)
