# Table of Contents

## Session 1. Middleware

A Coordination Model for Triplespace Computing ............................. 1  
*Elena Simperl, Reto Krummenacher, and Lyndon Nixon*

Requirements for Routing in the Application Layer .......................... 19  
*Pamela Zave*

Context-Aware Publish Subscribe in Mobile Ad Hoc Networks .............. 37  
*Davide Frey and Gruia-Catalin Roman*

## Session 2. Logic Programming

A Prolog-Based Language for Workflow Programming .......................... 56  
*Steve Gregory and Martha Paschali*

Reactors: A Data-Oriented Synchronous/Asynchronous Programming  
Model for Distributed Applications ........................................... 76  
*John Field, Maria-Cristina Marinescu, and Christian Stefansen*

## Session 3. Formal Approaches

A Theory for Strong Service Compliance ...................................... 96  
*Mario Bravetti and Gianluigi Zavattaro*

Towards a Theory of Refinement in Timed Coordination Languages ..... 113  
*Jean-Marie Jacquet and Isabelle Linden*

A Calculus for Mobile Ad Hoc Networks ...................................... 132  
*Jens Chr. Godskesen*

## Session 4. Concurrency

A Theory of Nested Speculative Execution ................................. 151  
*Cristian Tăpăs and Jason Hickey*

Actors That Unify Threads and Events ....................................... 171  
*Philipp Haller and Martin Odersky*

Generalized Committed Choice .................................................. 191  
*Joxan Jaffar, Roland H.C. Yap, and Kenny Q. Zhu*
## Session 5. Components and Services I

Combining Formal Methods and Aspects for Specifying and Enforcing Architectural Invariants .................................................. 211  
*Slim Kallel, Anis Charfi, Mira Mezini, and Mohamed Jmaiel*

## Session 6. Manet

Object-Oriented Coordination in Mobile Ad Hoc Networks ............. 231  
*Tom Van Cutsem, Jessie Dedecker, and Wolfgang De Meuter*

Coordinating Workflow Allocation and Execution in Mobile Environments ................................................................. 249  
*Rohan Sen, Gregory Hackmann, Mart Haitjema, Gruia-Catalin Roman, and Christopher Gill*

Fact Spaces: Coordination in the Face of Disconnection ............... 268  
*Stijn Mostinckx, Christophe Scholliers, Eline Philips, Charlotte Herzeel, and Wolfgang De Meuter*

## Session 7. Components and Services II

Component Connectors with QoS Guarantees ............................. 286  
*Farhad Arbab, Tom Chothia, Sun Meng, and Young-Joo Moon*

Context-Based Adaptation of Component Behavioural Interfaces ...... 305  
*Javier Cubo, Gwen Salaün, Javier Cámara, Carlos Canal, and Ernesto Pimentel*
