Electric Power Distribution Reliability

SECOND EDITION

Richard E. Brown
## Contents

*Series Introduction*  
Preface  
Author

### 1. DISTRIBUTION SYSTEMS
- 1.1. Generation, Transmission, and Distribution  
- 1.2. Distribution Substations  
- 1.3. Primary Distribution Systems  
- 1.4. Secondary Distribution Systems  
- 1.5. Load Characteristics  
- 1.6. Distribution Operations  
- 1.7. Study Questions  
  References

### 2. RELIABILITY METRICS AND INDICES
- 2.1. Power Quality, Reliability, and Availability  
- 2.2. Reliability Indices  
- 2.3. Customer Cost of Reliability  
- 2.4. Reliability Targets  
- 2.5. History of Reliability Indices  
- 2.6. Study Questions  
  References
### 3. INTERRUPTION CAUSES

3.1. Equipment Failures
3.2. Animals
3.3. Severe Weather
3.4. Trees
3.5. Human Factors
3.6. Most Common Causes
3.7. Study Questions

References

### 4. COMPONENT MODELING

4.1. Component Reliability Parameters
4.2. Failure Rates and Bathtub Curves
4.3. Probability Distribution Functions
4.4. Fitting Curves to Measured Data
4.5. Component Reliability Data
4.6. Study Questions

References

### 5. SYSTEM MODELING

5.1. System Events and System States
5.2. Event Independence
5.3. Network Modeling
5.4. Markov Modeling
5.5. Analytical Simulation for Radial Systems
5.6. Analytical Simulation for Network Systems
5.7. Monte Carlo Simulation
5.8. Other Methodologies
5.9. Study Questions

References

### 6. SYSTEM ANALYSIS

6.1. Model Reduction
6.2. System Calibration
6.3. System Analysis
6.4. Improving Reliability
6.5. Storm Hardening
6.6. Conversion of Overhead to Underground
6.7. Economic Analysis
6.8. Marginal Benefit-to-Cost Analysis
6.9. Comprehensive Example
6.10. Study Questions

References
## Contents

7. **SYSTEM OPTIMIZATION**
   - 7.1. Overview of Optimization 361
   - 7.2. Discrete Optimization Methods 371
   - 7.3. Knowledge-Based Systems 385
   - 7.4. Optimization Applications 392
   - 7.5. Final Thoughts on Optimization 418
   - 7.6. Study Questions 421
   - References 422

8. **AGING INFRASTRUCTURE**
   - 8.1. Equipment Aging 425
   - 8.2. Equipment Age Profiles 426
   - 8.3. Population Aging Behavior 428
   - 8.4. Age and Increasing Failure Rates 432
   - 8.5. Inspection, Repair, and Replacement 438
   - 8.6. State of the Industry 441
   - 8.7. Final Thoughts 450
   - 8.8. Study Questions 451
   - References 452

*Index* 455
