Methods in Behavioral Research

TENTH EDITION

PAUL C. COZBY
California State University, Fullerton
Contents

Preface xiii
About the Author xvii

1 SCIENTIFIC UNDERSTANDING OF BEHAVIOR 1
Uses of Research Methods 2
The Scientific Approach 3
Goals of Science 7
Basic and Applied Research 10
Study Terms 14
Review Questions 14
Activity Questions 14
Answers 15

2 WHERE TO START 16
Hypotheses and Predictions 17
Who We Study: A Note on Terminology 18
Sources of Ideas 18
Library Research 23
Anatomy of a Research Article 33
Study Terms 35
Review Questions 35
Activity Questions 36

3 ETHICAL RESEARCH 37
Milgram’s Obedience Experiment 38
The Belmont Report 39
Assessment of Risks and Benefits 39
Informed Consent 42
The Importance of Debriefing 47
STUDYING BEHAVIOR  65

Variables  66
Operational Definitions of Variables  67
Relationships Between Variables  68
Nonexperimental Versus Experimental Methods  73
Independent and Dependent Variables  78
Causality  80
Choosing a Method: Advantages of Multiple Methods  82
Evaluating Research: Four Validities  85
Study Terms  87
Review Questions  87
Activity Questions  88
Answers  89

MEASUREMENT CONCEPTS  90

Reliability of Measures  91
Construct Validity of Measures  96
Research on Personality and Individual Differences  99
Reactivity of Measures  100
Variables and Measurement Scales  100
Study Terms  104
Review Questions  104
Activity Questions  104
6 OBSERVATIONAL METHODS 106
Quantitative and Qualitative Approaches 107
Naturalistic Observation 108
Systematic Observation 112
Case Studies 115
Archival Research 116
Study Terms 119
Review Questions 119
Activity Questions 119
Answers 120

7 ASKING PEOPLE ABOUT THEMSELVES: SURVEY RESEARCH 121
Why Conduct Surveys? 122
Constructing Questions to Ask 124
Responses to Questions 127
Finalizing the Questionnaire 131
Administering Surveys 132
Survey Designs to Study Changes Over Time 135
Sampling From a Population 136
Sampling Techniques 138
Evaluating Samples 142
Reasons for Using Convenience Samples 143
Study Terms 145
Review Questions 145
Activity Questions 146
Answers 146

8 EXPERIMENTAL DESIGN 147
Confounding and Internal Validity 148
Basic Experiments 149
Assigning Participants to Experimental Conditions 153
Independent Groups Design 153
Repeated Measures Design 154
Matched Pairs Design 159
Study Terms 160
Review Questions 161
Activity Questions 161
Graphing Relationships  229
Correlation Coefficients: Describing the Strength of Relationships  230
Effect Size  235
Statistical Significance  236
Regression Equations  236
Multiple Correlation  237
Partial Correlation and the Third-Variable Problem  239
Structural Equation Modeling  240

Study Terms  241
Review Questions  242
Activity Questions  242
Answers  243

UNDERSTANDING RESEARCH RESULTS: STATISTICAL INFERENCE  244

Samples and Populations  245
Inferential Statistics  245
Null and Research Hypotheses  246
Probability and Sampling Distributions  247
Example: The $t$ and $F$ Tests  250
Type I and Type II Errors  256
Choosing a Significance Level  259
Interpreting Nonsignificant Results  259
Choosing a Sample Size: Power Analysis  261
The Importance of Replications  262
Significance of a Pearson $r$ Correlation Coefficient  262
Computer Analysis of Data  263
Selecting the Appropriate Statistical Test  265
Study Terms  266
Review Questions  266
Activity Questions  267

GENERALIZING RESULTS  268

Generalizing to Other Populations of Research Participants  269
Cultural Considerations  272
Generalizing to Other Experimenters  274
Pretests and Generalization  274
Generalizing from Laboratory Settings  275
The Importance of Replications 276
Evaluating Generalizations via Literature Reviews and Meta-Analysis 278
Using Research to Improve Lives 281
Study Terms 281
Review Questions 282
Activity Questions 282

APPENDIX A: WRITING RESEARCH REPORTS 283
Introduction 283
Writing Style 284
Organization of the Report 288
The Use of Headings 298
Citing and Referencing Sources 299
Abbreviations 307
Some Grammatical Considerations 309
Reporting Numbers and Statistics 312
Conclusion 313
Paper and Poster Presentations 313
Sample Paper 315

APPENDIX B: STATISTICAL TESTS 337
Descriptive Statistics 337
Statistical Significance Tests 340
Correlation and Effect Size 355

APPENDIX C: STATISTICAL TABLES 359
Table C.1 Random Number Table 361
Table C.2 Critical Values of Chi-Square 365
Table C.3 Critical Values of t 366
Table C.4 Critical Values of F 367
Table C.5 Critical Values of r (Pearson product-moment correlation coefficient) 370

APPENDIX D: CONSTRUCTING A LATIN SQUARE 371
Glossary 373
References 381
Credits 393
Index 395
