Preface x
About the Author xii

PART I TECHNOLOGY ENTREPRENEURSHIP FOR SCIENTISTS AND ENGINEERS 1

CHAPTER 1 Scientists and Engineers as Entrepreneurs 1
   The Transition to Entrepreneurship 2
      Why Study Entrepreneurship? 4
   The Role of Innovation and Entrepreneurship 5
      Defining Innovation 6 • Dispelling Innovation Myths 7
   The Commercialization Process 9
      1 Discovery 9 • 2 Opportunity Recognition 9 • 3 Testing
         Technology and Market Feasibility 11 • 4 Protecting IP Assets 11
      5 Prototyping 11 • 6 Testing the Market and First Customer 12
      7 Deciding on a Launch Strategy 12 • 8 Developing the Business
         Plan 12 • Launching the Business 12
   Summary 13
   Discussion Questions 15
   Case Study: Innovation in the Palm of His Hand 13
   Endnotes 15

CHAPTER 2 Recognizing and Screening Technology Opportunities 17
   Opportunity Recognition and Creation 18
      Employing Creative Problem-Solving Skills for Opportunity
         Recognition and Creation 18
   Sources of Opportunity 23
      Study an Industry 23 • Search the Patent Literature 24 • Talk to
         Customers 24 • Look into University Opportunities 24 • Investigate
         Government Sources 25 • Find New Value in Existing Technology 25
         Other Sources 25
   Screening Technology Opportunities 26
      Gauge Technology Readiness 27 • Determine IP Status 27
      Identify Potential Market Applications 27 • Estimate Resource
         Requirements 27
CHAPTER 3 Designing and Developing a Technology Start-up  33
Developing a Business Concept  34
Features versus Benefits  35
Conducting a Feasibility Analysis  36
Analyzing the Industry  37 • Market Analysis  40 • Analyzing the
Competition  43 • Analyzing Product/Service Feasibility  44
Analyzing the Management Team  44 • Building an Effective Business
Model and Assessing Capital Requirements  44
Is This Business Feasible?  46
Summary  47
Discussion Questions  48
Case Study: Start-ups Begin with a Vision—and This Is a Big One  48
Endnotes  50

CHAPTER 4 Building an Effective Team  51
Forming an Effective Founding Team  52
The Perils of Technology Founding Teams  53 • Characteristics of
Effective Teams  54
Extending the Founding Team  55
Professional Advisors  56 • Boards of Directors  56 • Avoiding Traps
When Forming Boards and Management Teams  57 • Using Independent
Contractors  58 • Other Resources to Extend the Team  59
The Move from Start-Up to Rapid Growth  59
Summary  61
Discussion Questions  61
Case Study: Turning a Scientist into an Entrepreneur  61
Endnotes  62

PART II DEVELOPING AND PROTECTING INTELLECTUAL PROPERTY  65
CHAPTER 5 The Concept of Intellectual Property  65
The Theory Behind IP Protections  66
Incentives to Invent  66 • Incentives to Disclose  67 • Incentives to
Commercialize  67
CHAPTER 8 Technology Transition and Entry Strategies 131

Transitioning from Project to Operations 132
  Build a First-Class Team 132 • Develop the Mission 133
Deciding on a Launch Strategy 135
  License the Technology 135 • Sell the Technology 135 • Start a Company 135 • Form a Strategic Alliance 136
Deciding on an Operational Strategy 138
  Process Flow 139 • Organizational Architecture 140
Organizing from a Legal Perspective 141
  R&D and Prelaunch Forms 144 • Legal Forms That Protect the Owners 144 • Making a Decision about Form 146 • Changing Legal Forms 147

Summary 147
Discussion Questions 148
Case Study: Quantum Dots 148
Endnotes 150

CHAPTER 9 Technology Adoption Patterns and Marketing Strategy 153

The Nature of High Technology Markets 154
  Market Uncertainty 155 • Technological Uncertainty 155
  Competitive Uncertainty 155 • Know-How, Complexity, and Velocity Effects 156
The Technology Adoption Cycle 156
  Building Critical Mass for a Tornado 158 • After the Tornado 158
Determining a Marketing Approach 159
  Understanding Customer Needs 161
Pricing High-Technology Products 162
  Defining the Components of Price 163 • Converging on a Price Point 164 • Constructing a Pricing Strategy 165
Developing a Marketing Plan 165
  Constructing a One-Paragraph Plan 166 • Marketing Tools 167
Promoting High-Technology Products 167
  Using Preannouncements 170 • Developing a Brand Presence 169
  Taking Advantage of Publicity 170
PART IV START-UP FINANCIAL STRATEGY 175

CHAPTER 10 The Business Model 175
Developing a Business Model 176
  Strategic Positioning in the Value Chain 177 • Identify Sources of Revenue 179 • Identify the Cost Drivers 181 • Capture Value with Pricing, Cost, and Financing 181 • Test for Weaknesses in the Business Model 181 • Launch and Measure the Business Model 182
Understanding Why Business Models Fail 183
  Predictions About the Future are Based on Faulty Logic 183 • The Business Model Does not Create and Capture Value 183 • The Entrepreneur Has not Identified the Customer 184
Summary 184
Discussion Questions 184
Case Study: Pandora—There Must Be a Business Model that Works 185
Endnotes 186

CHAPTER 11 Funding the Technology Start-up 187
Risks and Stages of Funding 188
The Cost of Raising Capital 190
  Bootstrapping the Start-up 191
Government Funding Sources 192
  Small Business Innovation Research Grants 192 • Small Business Technology Transfer Research Program 193 • Small Business Investment Company Program 193 • The Small Business Administration 193
Seed Capital 194
  Friendly Money 194 • Debt Financing 195 • Equity Arrangements 195 • Strategic Partnerships and Other Intermediaries 196
Start-up Funding 196
  Angel Investors and Networks 197
Funding Biotechnology 199
  Seed Stage 199
    • First-Round Funding: FDA Phase I Testing 200 • Second-Round Funding: The Business Model 200
CHAPTER 12 Funding Growth 205

Financial Strategy for Growth 206
VC Funding 206
  VC Screening Process 207 • Timing of Funding 211
  The Aftermath 211
The Private Offering 211
  Small Corporate Offering Registration 212 • Direct Public Offering:
    Regulation A 213
The Initial Public Offering 213
  The IPO Process 214
Summary 217
Discussion Questions 217
Case Study: From Riches to Rags and Back? When Going public
  May Not be the Right Path 218
Endnotes 219

CHAPTER 13 Technology Valuation 221

The Drivers of Value 222
  When Value Is Discounted 224
Financial Models for Assessing Value 225
  Valuations Based on Cost 225 • Income Method: The Pro Forma
    Discounted Cash Flow Model 226 • The Real Options Model 228
  Venture Capital Methods 231 • The Hockey Stick Approach: The
    Basics 231 • The Issue of Dilution 233
Valuing a License Agreement 233
Summary 234
Discussion Questions 235
Case Study: Value is in the Eyes of the Beholder 235
Endnotes 236
