Object-Oriented Systems
Analysis and Design

Noushin Ashrafi
Professor of Information System
University of Massachusetts–Boston

Hessam Ashrafi
Software Architect

Pearson Education International
CONTENTS

Preface xii
Acknowledgments xviii
About the Authors xix

PART I: THE FOUNDATIONS 1

CHAPTER 1 Information Systems 1

1. Overview 1
   Chapter Topics 1
   Introduction 1

2. Introducing Information Systems 3
   Information 3
   System 6
   The Information System 9
   The Information Technology 10
   Applications and Systems 13

3. The Information System as Product 14
   Business and Information Systems 15
   The Business of Information Systems 15
   Infrastructural Information Systems 16
   The Enterprise of Software Development 17

CHAPTER 2 The Concept of Object Orientation 30

1. Overview 30
   Chapter Topics 30
   Introduction 30

2. Introducing Objects 31
   Real Objects 31
   Virtual Objects 36

3. The Origins of Object-Oriented Technology 44
   Object-Oriented Languages 45

4. Object-Oriented Modeling 46

5. The Unified Modeling Language (UML) 47

CHAPTER 3 Methodology 54

1. Overview 54
   Chapter Topics 54
   Introduction 54

2. Introducing Methodology 55
   Defining Methodology 55
   Generalization, Abstraction & Innovation 56
   Challenges of Methodology 57
PART II: ANALYSIS 101

CHAPTER 4 Gathering Requirements 101

1. Overview 101
   Chapter Topics 101
   Introduction 101

2. Defining Requirements 103

3. Requirements Discovery 103

4. Classifying Requirements 105
   Functional Requirements 105
   Nonfunctional Requirements 106

5. Techniques for Eliciting Requirements 109
   Interviews 109
   Questionnaires 117
   Elicitation Workshops 120
   Field Trips & Observation 121
   Modeling 123

6. Sources & Authorities 125
   Sponsors 125
   Domain Experts 125
   Stakeholders 126
   Users 127
   Reverse Engineering 127

7. Managing Requirements 129

8. Case History: Walden Medical Center 130
   The Rise 131
   The Decline 131
   The Revival 132
   Inception of the Project 132
   Initial Requirements 135

9. Deliverables 135
CHAPTER 5  Domain Analysis  145

1. Overview  145
   Chapter Topics  145
   Introduction  146

2. Problems, Solutions, and Requirements  148
   Problems vs. Solutions  148
   Problem Space vs. Solution Space  150
   Requirements vs. Product Specifications  152

3. Domain Definition  154
   The Meaning of Domain  154
   The Domain Scope  155
   Domains and Subsystems  156
   Walden's Domain Definitions  157

4. Domain Analysis  159
   Finding Domain Concepts  160
   Domain Dictionary  164
   Beyond Application Boundaries  168

5. Business Rules  169
   Definition and Significance  170
   Classification  170
   Managing Business Rules  173

6. Deliverables  176

CHAPTER 6  Behavioral Modeling I: Use Cases: The Basics  181

1. Overview  181
   Chapter Topics  181
   Introduction  182

2. Introducing Use Cases  183
   What Use Case Modeling Is  183
   What Use Case Modeling Is Not  184
   Components of a Use Case  185
   Use Cases in the Modeling Spectrum  194

3. Develop Initial Use Cases  195
   From Domain Analysis to Use Cases  195
   Identify Prominent Actors  196
   Identify Major Use Cases  199
   Develop Context Diagram  201

4. Deliverables  202

CHAPTER 7  Behavioral Modeling II: Developing Use Cases  206

1. Overview  206
   Chapter Topics  207
   Introduction  207

2. Develop Base Use Cases  208
   What a "Base" Use Case Is  208
   The Template  209
   Template Fields  209

3. Actor Generalization  223

4. Dependencies: Include and Extend  225
   Extend Relationship  225
CHAPTER 8 Structural Modeling 248

1. Overview 248
   Chapter Topics 248
   Introduction 249

2. Introducing Structural Modeling 249

3. Classes & Structural Modeling 251
   Classes as Object Templates 251
   Classes as Building Blocks 252
   Objects as Black Boxes 253
   Interface 254
   Structuring the Interface 256
   Composite & Collection Objects 258

4. Finding Classes 259
   From Use Cases to Classes 259
   Elaborating Classes 267

5. Relationships 276
   Association 276
   Class Diagram 277
   Multiplicity 279
   Aggregation & Composition 281
   Constraints 282
   Generalization & Specialization 283

6. Deliverables 285

CHAPTER 9 Dynamic Modeling 293

1. Overview 293
   Chapter Topics 293
   Introduction 294

2. Introducing Dynamic Modeling 295

3. Object Interaction 297
   Messages 297
   Methods 303
2. Introducing the User Interface  401
   The Responsibilities of the User Interface  402
   The Evolution of the User Interface  403
   User Interface Objects  403

3. The Language of the User Interface  404
   The Metaphors  404
   The Roles  405
   The Grammar of the User Interface  417

4. Shaping Messages into the User Interface  419
   Mapping Parameters & Attributes  420
   Constraints in UI Design  424

5. Modeling the User Interface  425
   Class Diagrams  426
   Navigation  429
   Storyboarding  429
   Simulation & Prototyping  432

6. Deliverables  435

CHAPTER 13  Application Design III: Database & Persistence  441

1. Overview  441
   Chapter Topics  442
   Introduction  442

2. Data & Data Management  443
   Data  443
   Data Management  445
   The Database Management System (DBMS)  448

3. The Relational Model  453
   Tables  454
   The Foreign Key  456
   Data Integrity  457
   SQL  461
   Data Normalization  467
   Intersection Tables  473
   Lookup Tables  476
   Modeling the Relational Database  477

4. Designing Persistence  480
   Mapping to Relational Databases  480
   The Persistence Layer  485

5. Deliverables  489

CHAPTER 14  Patterns  496

1. Overview  496
   Chapter Topics  496
   Introduction  497

2. Introducing Patterns  497
   The Background  498
   The Pattern Language  500
   The Risks  501

3. Design Patterns  502
   Factory Method  503
   The Object Adapter  505
3. Testing 590
   Levels of Testing 591
   Testing & Object Orientation 592

4. Deployment 593
   The Deployment Diagram 594
   User Training 596
   Change & Maintenance 599

5. Deliverables 600
