MOBILE PEER TO PEER (P2P)

A TUTORIAL GUIDE

Frank H. P. Fitzek, University of Aalborg, Denmark
Hassan Charaf, Budapest University of Technology, Hungary
# Contents

Foreword xi
Preface xiii
   About the book xiii
Acknowledgements xv
List of Contributors xvii

Part One  Introduction and Motivation

1  Mobile Peer-to-Peer Networks: An Introduction to the Tutorial Guide 3
   Frank H. P. Fitzek and Hassan Charaf
   1.1 Introduction and Motivation 3
   1.2 Wireless Technologies 6
      1.2.1 Short-range Technologies 7
      1.2.2 Future Wireless Trends 11
   1.3 Mobile Architectures 12
      1.3.1 Cellular Networks 12
      1.3.2 Short-range Point-to-Point Networks 12
      1.3.3 Meshed Networks 13
      1.3.4 Cooperative Networks 14
   1.4 Mobile Scenarios and Business Cases 15
      1.4.1 Social Mobile Networks 15
      1.4.2 Cooperative Wireless Networks 16
   References 17

2  The Evolution of Social Interactions in Networked Space 19
   Lara Srivastava and Frank H. P. Fitzek
   2.1 Connectivity Takes on a New Dimension 19
   2.2 The Principle of Sharing 22
   2.3 Transpatial and Transtemporal Perspective 24
   2.4 Socialization in the Mobile Digital Age 25
2.5 Future Perspectives 27
References 28

Part Two  Basic Functionalities for Mobile P2P

3 The Symbian C++ Programming Environment 31
Morten V. Pedersen and Frank H. P. Fitzek

3.1 Introduction 31
3.2 Tools Overview 31
3.3 Installing the IDE 33
3.4 Installing the SDK and Prerequisites 33
3.5 Using the Carbide IDE 34
3.6 Installing Applications on the Device 38
3.7 Quick Resource Overview 39
References 40

4 Introduction to Bluetooth Communication on Mobile Devices 41
Morten V. Pedersen and Frank H. P. Fitzek

4.1 Introduction 41
4.2 Turning Bluetooth On/Off 42
4.3 Discovering Bluetooth Devices 43
4.3.1 Using the Bluetooth UI 43
4.3.2 Performing Background Device Search 45
4.4 The Service Discovery Protocol 47
4.4.1 Advertising a Service 49
4.4.2 The Structure of a Service Record 49
4.4.3 Searching for Services 53
4.5 Connecting and Transferring Data 54
4.5.1 Building a Server 55
4.5.2 Building a Client 56
4.5.3 Transferring Data 56
4.6 Summary 57
References 58

5 Introduction to WLAN IEEE802.11 Communication on Mobile Devices 59
Károly Farkas and Gergely Csűcs

5.1 IEEE802.11 Architecture Components 59
5.2 IEEE802.11 Layers 59
5.2.1 The Physical Layer 60
5.2.2 The MAC Layer 60
5.3 Joining the WLAN 61
5.4 Handover 61
5.5 Synchronization 62
5.6 Security 62

## Contents

7.4.11 Differences in GridTorrent 141

7.5 Conclusion 141
References 142

8 Introduction to Network Coding for Mobile Peer to Peer (P2P) 143

Janus Heide and Leonardo Militano

8.1 Introduction to Network Coding 143
8.2 The Butterfly Example 144
8.3 Network Coding by XORing 145
8.4 Network Coding in a Cooperative Context 147
8.4.1 No Cooperation 147
8.4.2 Cooperation 148
8.4.3 Cooperation with Network Coding 148
8.5 Proof of Concept Implementation 148
8.6 The XORChat Implementation 149
8.7 Outlook 157
References 159

9 Mobile Social Networking – Beyond the Hype 161

Bertalan Forstner and Imre Kelényi

9.1 Introduction 161
9.2 Gnutella and GGEP 163
9.3 Finding Peers 164
9.3.1 Host Cache 165
9.3.2 Web Caches 165
9.4 Connecting to Random Peers 172
9.5 Protocol Messages 178
9.6 Putting Intelligence into the Peer Selection 185
9.6.1 The Simplest Way: Fetching the Musical Genre 185
9.6.2 Now I Know Who to Connect to! 185
9.7 Conclusion 190
References 190

10 Using Location-based Services on Mobile Phones 191

Péter Ekler and Gábor Zavarkó

10.1 Introduction 191
10.2 Background 192
10.2.1 GPS-based Positioning 192
10.2.2 Location-based Services 193
10.3 Implementing Location-based Services on Mobile Phones 194
10.3.1 Location API of Symbian OS 194
10.3.2 Location API of Java ME 199
10.4 FindFriends Example Application 203
10.4.1 Use Cases 203
10.4.2 The Design of FindFriends 206
10.4.3 Network Communication

10.5 Summary
References

11 Developing Java Games on Symbian OS-based Mobile Devices

Peter Ekler

11.1 Introduction

11.2 The Java Virtual Machine Implementation of Symbian OS

11.2.1 Programming Java on Symbian OS

11.2.2 Processing Power of MIDlets

11.2.3 Network Handling

11.3 Writing Games for Mobile Phones

11.3.1 General Concepts of Game Development

11.3.2 GameCanvas

11.3.3 Ad Hoc WLAN-based Multiplayer Games on Java ME

11.4 MobSensor

11.4.1 MobSensor Functions

11.4.2 MobSensor Architecture

11.4.3 Playing mp3 Alerts in MobSensor

11.4.4 The User Interface of MobSensor

11.5 Summary
