Contents

Introduction xix

Part I: Introducing Cisco Telepresence 3

Chapter 1 What Is Telepresence? 5
Evolution of Video Communications 5
It's All About the Experience! 9
How Is TelePresence Different Than Video Conferencing? 11
  Quality 12
  Simplicity 13
  Reliability 13
  Bandwidth Requirements 14

Chapter 2 Cisco TelePresence Solution Overview 17
The Cisco TelePresence Solution 17
Cisco TelePresence Codec 18
  Industry-Leading Audio and Video 20
  Video Resolution and Compression Formats 21
  Audio Resolution and Compression Formats 23
  Collaboration Tools 24
  Audio and Video Multiplexing 25
Cisco 7975 Series IP Phone 25
Cisco TelePresence System 3000 26
  Three Native 1080p High-Definition Cameras 27
  Three 65-Inch High-Definition Plasma Displays 27
  Purpose-Built Meeting Table, Integrated Projector, and Lighting Shroud 28
  Multichannel Wide-Band Audio 29
Cisco TelePresence System 3200 29
  Extended Camera Focal View 30
  Second Row Seating 30
  Extension of Each Table Segment 31
  Optional Displays for Shared Content 31
Cisco TelePresence System 1000 32
  One Native 1080p High-Definition Camera 33
  One 65-Inch High-Definition Plasma Display 33
  Integrated Lighting Shroud 33
  One Wide-band Microphone and Speaker 34
Part II: Telepresence Technologies 53

Chapter 3 TelePresence Audio and Video Technologies 55

Codec Design Requirements 55
Codec System Architecture 56
Codec Physical Design 56
Master and Slave Codec Architecture 56
Codec Operating System Software 59
Encoding and Packetization 61
Camera and Auxiliary Video Inputs 62
Video Encoding 63
Audio Encoding 68
Real-Time Transport Protocol 70
TelePresence Packet Rates 73
Depacketization and Decoding 77
Managing Latency, Jitter, and Loss 77
Summary of Latency, Jitter, Loss Targets and Thresholds, and Actions 82
Demultiplexing and Decoding 83
Audio-Only Participants 87
Dual-Tone Multi-Frequency 89
RFC 2833 90
Key-Pad Markup Language 90
Other Protocols 90
How DTMF Tones Are Processed in Cisco TelePresence 91
Interoperability with Out-of-Band Collaboration Applications 92
Interoperability with Video Conferencing 92
Interoperability RTP Channels 93

Chapter 4 Connecting TelePresence Systems 99
Internal TelePresence System Connections 99
Connecting a CTS-500 System 99
Connecting a CTS-1000 System 100
Connecting a CTS-3000 System 101
Connecting a CTS-3200 System 104
TelePresence Network Interaction 106
TelePresence Network Deployment Models 111
Intracampus Deployment Model 112
Intra-Enterprise Deployment Model 112
Intercompany Deployment Model 114
TelePresence Phases of Deployment 116

Chapter 5 Network Availability Technologies 121
Network Availability 121
Device Availability Technologies 125
Stackwise/Stackwise Plus 126
Nonstop Forwarding with Stateful Switchover 128
Network Availability Protocols 132
L2 Network Availability Protocols 132
L3 Network Availability Protocols 147
Operational Availabilities Technologies 155
Generic Online Diagnostics 156
Chapter 6  Network Quality of Service Technologies  161

Modular QoS Command-Line Interface  161
Classification Tools  162
  Class Maps  162
  Network Based Application Recognition  163
Marking Tools  165
  Ethernet 802.1Q/p CoS  165
  MPLS EXP  166
  Differentiated Services Code Points  167
Policing Tools  172
  Single-Rate Policers  173
  Dual-Rate Policers  174
Shaping Tools  178
Queuing Tools  181
  CBWFQ  181
  LLQ  183
  Hardware Queuing: 1PxQyT  187
Dropping Tools  190
  WRED  192
  DSCP-Based WRED  193
  Explicit Congestion Notification  194
HQoS  196

Chapter 7  TelePresence Control and Security Protocols  203

Network Control Protocols  203
  IEEE 802.1p/Q: VLAN Tagging and CoS  203
  IEEE 802.1p/Q Utilization Within Cisco TelePresence Networks  205
  IEEE 802.3af: Power over Ethernet  205
  Network Time Protocol (NTP)  206
  Dynamic Host Configuration Protocol (DHCP)  207
Signaling Protocols  208
  Session Initiation Protocol (SIP)  208
  XML/SOAP  213
  AXL/SOAP  216
  JTAPI, TAPI, and CTIQBE  216
  WebDAV  217
  LDAP  217
Network Management Protocols  217
Cisco Discovery Protocol  218
Trivial File Transfer Protocol (TFTP)  222
Simple Network Management Protocol  223
TelePresence Security Protocols  226
Transport Layer Security (TLS)  226
Secure Real-Time Transport Protocol (sRTP)  228
Bandwidth Impact of Enabling TelePresence Encryption  232
Secure Shell (SSH)  232
Secure Hypertext Transfer Protocol (HTTPS)  233

**Part III: Telepresence System Design  237**

**Chapter 8 TelePresence Room Design  239**
Room Dimensions, Shape, and Orientation  239
  Width Requirements  240
  Depth Requirements  245
  Height Requirements  249
  Angles, Shape, and Orientation  253
  Doors and Windows  258
Wall, Floor, and Ceiling Surfaces  259
  Wall Surfaces  259
  Flooring Surfaces  262
  Ceiling Surfaces  263
Lighting and Illumination  265
  Considering Light Angles and Direction  266
  Considering Light Color Temperature  266
  Measuring Light Intensity  269
  Light Fixture and Bulb Considerations  271
  Light Fixture Ballast Considerations  275
Acoustics  276
  Measuring Ambient Noise  277
  Measuring Reverberation  279
  Targeted and Maximum Ambient Noise and Reverberation Levels  281
  Controlling Ambient Noise and Reverberation Levels  281
  Scenarios for Mitigating Ambient Noise and Reverberation  283
HVAC  283
  HVAC Air Noise Diffusion Considerations  289
Chapter 12 TelePresence Call-Signaling Design 435
Overview of TelePresence Call-Signaling Components 435
CUCM: SIP Registrar and Back-to-Back User Agent 435
CTS Endpoints: SIP User Agents 437
CTMS: SIP Trunk 437
Cisco TelePresence SBC and CUBE: B2BUA and Media Proxy 437
Session Description Protocol 438
Bandwidth Negotiation 440
Media Negotiation 440
Other Negotiated Parameters 441
CTS Boot Process 441
Single-Cluster Call Signaling Examples 443
CTS Endpoint Registration 443
Call Setup 445
Call Termination 448
Call Hold 449
Intercluster Call Signaling 450
Single Enterprise Signaling 450
Business-to-Business Signaling 450

Chapter 13 Multipoint TelePresence Design 455
CTMS Overview 455
CTMS Meeting Types 457
CTMS Meeting Features 459
Multipoint Resources 462
Geographical Resource Management 463
Quality of Service 463
Meeting Security 464
Meeting Management 465
Audio and Video Flows in a Multipoint TelePresence Design 466
Audio in a Multipoint TelePresence Meeting 466
Video in a Multipoint TelePresence Meeting 467
TelePresence Interoperability 469

Network Design Considerations for Multipoint TelePresence 472
  Deployment Models 472
  Additional Latency 473
  Bandwidth Considerations 475
  Burst Considerations 477

Positioning of the CTMS Within the Network 481
  Placement Within the Campus 481
  Placement within the Branch 482
  LAN Switch Platform Considerations 482
  WAN Circuit Support 483

Basic Configuration Requirements for Multipoint TelePresence 484
  CUCM Configuration Requirements 484
  CTMS Configuration Requirements 484

Chapter 14 Inter-Company TelePresence Design 487

End-to-End Application Requirements 488
  Experience Quality Requirements 488
  Ease of Use Requirements 489
  Reliability Requirements 489
  Security Requirements 489
  Nonproprietary Requirements 490
  Scalability Requirements 490

Solution Components 490

Network Architecture and Security 492
  Public E.164 Dialing 494
  Inter-VPN Connectivity 495
  End-to-End Application-Layer Security 510

Inter-Company Deployment Models 517
  Converged Versus Overlay Access Circuits 518
  Centralized Inter-Company Access Circuit 518
  Multiple, Decentralized Inter-Company Access Circuits 523
  Inter-Company Dialing Models 528
  Scheduling Inter-Company Meetings 531
  Multiple Service Provider Peering 533

Appendix Protocols Used in Cisco TelePresence Solutions 539

Index 552
