PROCEEDINGS

of the

International Conference

on Computer Systems and Technologies

and Workshop for PhD Students in Computing

Edited by

B. Rachev
Technical University of Varna, Bulgaria

A. Smrikarov
University of Ruse, Bulgaria

CompSysTech’09

Ruse, Bulgaria, 18-19 June
TABLE OF CONTENTS

PLENARY SESSION

P.1 CompSysTech – Ten Years after the Beginning ...
Boris Rachev

P.2 IPv6: The Next Big Bail-Out. Will IPv6 Save the Internet?
Latif Ladid

P.3 ICT infrastructure and Scientific Research
Kiril Boyanov, Dimitar Todorov

P.4 Polymorphic Architectures – from Media Processing to Supercomputing
Georgi Kuzmanov

P.5 Advanced Scalable Algorithms for Advanced Architectures
Vassil Alexandrov

P.6 National Broadband Program of the Republic of Bulgaria
Roumen Trifonov

SESSION I Computer Systems

I. 1. Non-contact ultrasound method for identification of yogurt according to its butter content
Nikolay Shopov, Raycho Ilarionov, Ivan Simeonov, Hristo Kilifarev

Raycho Ilarionov

I. 3. Hardware implementation of strategies for servicing queues
Stoyan Prokopov, Dimitar Tyanev

I. 4. Micro-pipeline Section For Condition-Controlled Loop
Dimitar Tyanev, Stamen Kolev, Dragomir Yanev

I. 5. Outline of RISC-based Core for Multiprocessor on Chip Architecture Supporting Moving Threads
Jani Paakkulainen, Jari-Matti Mäkelä, Ville Leppänen, Martti Forsell

I. 6. Photonic Crystal Fibers challenge
Jordan Urumov, Zhejno Zhejnov

I. 7. Programming and applying of the multiple product distribution system by using PIC 16F877A microcontroller
Özcan Varul, Melih Inal

SESSION II Computer Technologies

II. 1. Experiences with Embedding MPL Security Monitors into Java Programs
Jari-Matti Mäkelä, Ville Leppänen

II. 2. MVTsim – Software Simulator for Multicore on Chip Parallel Computer Architectures
Jari-Matti Mäkelä, Jani Paakkulainen, Ville Leppänen

II. 3. Dynamic reconfiguration of Multimodal Architectures
Hicham Djenidi, Amar Ramdane-Cherif, Nicole Lévy, Chakib Tadj

II. 4. Evaluating the Method of the Transforming Ontology Axioms to Application Domain Rules
Diana Kalibatiene, Olegas Vasilecas

II. 5. Cyclic Histogram Thresholding and Multithresholding
Dimo Dimov, Lasko Laskov

II. 6. Researching product tiles in eBay using the eBay API
Nikolaj Cholakov
II. 7. Security Assurance during the Software Development Cycle  
Isaac Agudo, Jose L. Vivas, Javier Lopez

II. 8. A practical approach for software project management  
Violeta Bozhikova, Mariana Stoeva, Krasimir Tsonev

Tzanko Golemanov, Kostadin Kratchanov, Emilia Golemanova

II. 10. Spider vs. Prolog: Computation Control  
Emilia Golemanova, Kostadin Kratchanov, Tzanko Golemanov

II. 11. Architectural Design of a Software Engine for Adaptation Control in the ADOPTA E-learning Platform  
Boyan Bontchev, Dessislava Vassileva, Boryana Chavkova, Vladimir Mitev

II. 12. Approach for data replication on MS SQL Server  
Dessislava Petrova-Antonova, Ivelina Vacheva

II. 13. Design of Service Level Agreements for Software Services  
Diana Berberova, Boyan Bontchev

SESSION IIIA  Application Aspects of Computer Systems and Technologies

IIIA. 1. Application of contemporary measurement and analysis techniques to human cardiovascular system  
Maja Bračič Lotrič, Aneta Stefanovska

IIIA. 2. A Bayesian Approach to Recognise Facial Expressions using Vector Flows  
Xiaofan Sun, Leon Rothkrantz, Dragos Datcu, Pascal Wiggers

IIIA. 3. A bottom-up approach of fusion of events in surveillance systems  
Leon Rothkrantz, Zhenke Yang, Michael Jepson, Pascal Wiggers, Dragos Datcu

IIIA. 4. FACS-coding of Facial Expressions  
Leon Rothkrantz, Dragos Datcu, Pascal Wiggers

IIIA. 5. Controlling the Speed of Coding Line Conveyor Using Fuzzy Logic  
Atanas Atanasov

IIIA. 6. XPDL - Bringing Business and Software Together - a Case Study  
Orlin Genchev, John Galletly

IIIA. 7. A Vision-Based Attentive User Interface with (Semi-)Automatic Parameter Calibration  
Fabio Fosso, Marco Porta

IIIA. 8. A Design of an Integrated Document System for Project Management  
Iulian Intorsureanu, Rodica Mihalca, Adina Uta, Anca Andreeescu

Anca Andreeescu

IIIA. 10. Web based portfolio optimization  
Todor Stoilov, Krasimira Stoilova

IIIA. 11. Learning by Negation of the Negative Examples – Single Model versus Double Model  
Zekie Shevked, Ludmil Dakovski

Hristo Indzhov, Dimitar Blagoev, George Totkov

IIIA. 13. Implementation Design of Access Control System. Local Database in Flash Memory Array.  
Radoslav Mladenov, Sava Ivanov

IIIA. 14. Open Source Solution for a Workflow Execution Architecture  
Martin Tsenov, Krasimir Trichkov, Simeon Tsvetanov

IIIA. 15. One approach to HTML wrappers creation: using Document Object Model tree  
Viera Rozinajova, Ondrej Hluchy
III. 16. Keeping Artifacts Alive: Towards a Knowledge Management System
   Hilda Tellioglu

III. 17. 1-Wire Based Data Acquisition System
   Georgi Georgiev

III. 18. Personalized Web Search Using Context Enhanced Query
   Michal Kajaba, Pavol Navrat

III. 19. Distillation column control using genetic algorithms for LQR design
   Karl O. Jones, Wilfried Hengue

III. 20. Limitations of Multivariable Controller Tuning Using Genetic Algorithms
   Karl O. Jones, Wilfried Hengue

III. 21. Augmenting UML with decision table technique
   Kestutis Normantas, Olegas Vasilecas, Sergejus Sosunovas

III. 22. GPROM: a Tool for Non-Invasive Personal Tracking
   Andrea Girardello, Giancarlo Succi

SESSION III B  Application Aspects of Computer Systems and Technologies

III B. 1. Remote Identification and Information Processing with a Near Field Communication Compatible Mobile Phone
   Raine Kelkka, Tommi Kallonen, Jouni Ikonen

III B. 2. An Access Control and Time Management Software Solution Using RFID
   Jani Peusaari, Raine Kelkka, Jouni Ikonen

III B. 3. RFID and Business Card Information
   Tommi Kallonen, Juho Vartiainen, Jouni Ikonen

III B. 4. Distributed Mobile Traffic Monitoring System Based on Free and Open Source Software
   Velislava Spasova, Grisha Spasov

III B. 5. Architectural models for realization of Web-based Personal Health Systems
   Mitko Shopov, Grisha Spasov, Galidia Petrova

III B. 6. An Algorithm for modeling self-similar Ethernet traffic
   Evgeniya Gospodinova

III B. 7. The influence of self-similar traffic on telecommunication
   Evgeniya Gospodinova, Mitko Gospodinov

III B. 8. Cooperation Requirements for Packet Forwarding in Vehicular Ad-Hoc Networks (VANETs)
   Candelaria Hernández-Goya, Pino Caballero-Gil, Jezabel Molina-Gil, Candido Caballero-Gil

III B. 9. The Application of Fuzzy Expert Cooling System for Multi Core Microprocessors and Mainboards
   Kursat Zuhtuogullar, Ismail Saritas, Novruz Allahverdi

III B. 10. Modeling the performance and emission characteristics of diesel engine and petrol-driven engine by ANN
   Kemal Tütüncü, Novruz Allahverdi

III B. 11. A Nonlinear Programming Case Study to a Sensor Location Problem
   Peter Gabor Szabo

III B. 12. Multidimensional Scaling: Multi-Objective Optimization Approach
   Ausras Mackute-Varoneckiene, Antanas Zilinskas, Audrius Varoneckas

III B. 13. An Application of an Algorithm for Common Subgraph Detection for Comparison of Protein Molecules
   Stoicho Stoichev, Dobrinka Petrova

III B. 14. Gustafson-Kessel Algorithm for Evolving Data Stream Clustering
   Olga Georgieva, Dimitar Filev

III B. 15. Implementing Common Array Algorithms on modern GPUs
   Tzvetomir Vassilev
SESSION IV  Educational Aspects of Computer Systems and Technologies

IV. 1. Wireless Sensor Networks to support elementary school learning activities
  Ricardo Silva, Nadya Antonova, Jorge Silva, Antonio Mendes, Maria Marcelino

IV. 2. Net-Generation Learning Style – a Challenge for Higher Education
  Aneliya Ivanova, Galina Ivanova

IV. 3. LOGOPED 2.0: Software System for E-consulting and Therapy of People with
  Communicative Disorders
  Vania Sivakova, George Totkov, Todorka Terzieva

IV. 4. FSM Decomposition with Application to FPGA Synthesis
  Alexander Sudnitson, Dmitri Mihhailov, Margus Kraus, Konstantin Tarletski

IV. 5. You must be independent and have self-confidence. Attitude of Distance Learners
  Ásrín Matthiasdóttir

IV. 6. A Web Search Methodology for Different User Typologies
  Marco Alfáno, Biagio Lenzitti

IV. 7. The “Jigsaw” Collaborative Method in e-Learning Environment Moodle
  Georgi Tuparov, Daniela Tuparova, Ilka Zafirova

IV. 8. Scoring Concept Maps: an Overview
  Alla Anohina, Janis Grandspenks

IV. 9. An Algorithm for Defining of Initial Package of Notions for Purpose of E-Learning
  Mitko Mitev, Elena Racheva, Ginka Marinova

IV. 10. The Emerging Global Campus Model
  Roumen Nikolov

IV. 11. Some remarks about OO teaching
  Janusz Jablonowski

IV. 12. Creating an E-Training Course on Computer’s Operation Systems
  Yuri Hopterev

IV. 13. An Approach to Development of Personalized E-learning Environment for Dys-lexic Pupils’ Acquisition of Reading Competence
  Rumen Andreev, Valentina Terzieva, Petia Kademova-Kazarova

  Computer Science
  Daniela Chudá, Martin Nehéz, Michal Čerňanský

IV. 15. Information system topics for studies in software engineering
  Mirjana Ivanović, Dragana Todorić-Vukašin, Zoran Budimac

IV. 16. European Standardization: Mobility without Borders
  Rositsa Doneva, Georgy Totkov, Nikolay Kasakliev, Elena Somova
IV. 17. Python Prevails  
Vambola Leping, Marina Lepp, Margus Niitsoo, Eno Tõnisson, Varmo Vene, Anne Villems

SESSIO N V Biometrics
V. 1. A Shape Based Approach for Biometrical Analysis  
Mariana Stoeva, Violeta Bozhikova
V. 2. Multifactor Authentication based on keystroke dynamics  
Daniela Chudá, Michal Šurfina
V. 3. A Computer system for graphometric handwriting analysis  
Dobrin Nestorov, Stefan Benchev, Stefan Bonchev, Ruslan Kostashki, Georgi Gluhchev

CompSysTech'09 PhD Workshop

PhD Students Session VI Computer Systems & Technologies, Application & Educational Aspects of Computer Systems & Technologies
VI. 1. Prototype of a platform for monitoring and management of asynchronous network events (Network Simulator of Asynchronous Events)  
Vanya Topalova
VI. 2. Runtime Generation of an User Interface, Described in a Database  
Plamen Paskalev, Ilka Serafimova
VI. 3. Rule based GUI modification and adaptation  
Plamen Paskalev
VI. 4. Clustering and Prediction of Risk Spread Curves  
Ventsislav Nikolov
VI. 5. Possibilities of Grid computing for realization of simulation problems  
Ivaylo Penev, Anatoliy Antonov
VI. 6. Ensuring Consistency of Information Systems Rules Models  
Olegas Vasilecas, Ruta Dubauskaite
Darius Jurkevicius, Olegas Vasilecas
VI. 8. Data Extraction by Visual Matching  
Lukáš Bařinka, Ivan Jelinek
VI. 9. Proposing of modular system for web information extraction  
Vojtěch Jirkovský, Ivan Jelinek
