## Contents

### Foreword

vii

### Preface

ix

### Part I: Basic Chapters

1. An Introduction to Finite Automata and their Connection to Logic
   *Howard Straubing and Pascal Weil*
   3

2. Finite-State Automata on Infinite Inputs
   *Madhavan Mukund*
   45

3. Basics on Tree Automata
   *Christof Löding*
   79

4. An Introduction to Timed Automata
   *Paritosh K. Pandya and P. Vijay Suman*
   111

### Part II: Verification

5. A Language-Theoretic View of Verification
   *Kamal Lodaya*
   149

6. A Framework for Decentralized Physical Access Control using Finite State Automata
   *Namit Chaturvedi, Atish Datta Chowdhury and B. Meenakshi*
   171

7. Reasoning about Heap Manipulating Programs using Automata Techniques
   *Supratik Chakraborty*
   193

8. Chop Expressions and Discrete Duration Calculus
   *S. Ajesh Babu and Paritosh K. Pandya*
   229

9. Automata on Distributed Alphabets
   *Madhavan Mukund*
   257
10. The Theory of Message Sequence Charts
   K. Narayan Kumar

11. Type Checking of Tree Walking Transducers
    Sebastian Maneth, Sylvia Friese and Helmut Seidl

12. Three Case Studies on Verification of Infinite-State Systems
    Javier Esparza and Jörg Kreiker

13. Introduction to Hybrid Automata
    Madhu Gopinathan and Pavithra Prabhakar

14. The Discrete Time Behavior of Restricted Linear Hybrid Automata
    Manindra Agrawal, Frank Stephan, P.S. Thiagarajan and Shaofa Yang

Part III: Automata and Logic

15. Specification and Verification using Temporal Logics
    Stéphane Demri and Paul Gastin

16. Finite Automata and the Analysis of Infinite Transition Systems
    Wolfgang Thomas

17. Automata over Infinite Alphabets
    Amaldev Manuel and R. Ramanujam

18. Automata and Logics over Signals
    Fabrice Chevalier, Deepak D’Souza, Raj Mohan M. and Pavithra Prabhakar

Part IV: Compression

19. Syntax Directed Compression of Trees Using Pushdown Automata
    Priti Shankar

20. Weighted Finite Automata and Digital Images
    Kamala Krithivasan and Y. Sivasubramanyam
