

Christian P. Robert · George Casella

# Introducing Monte Carlo Methods with R

 Springer

---

# Contents

<b>Preface</b> .....	vii
<b>List of Figures</b> .....	xiii
<b>List of Examples</b> .....	xvii
<b>1 Basic R Programming</b> .....	1
1.1 Introduction .....	2
1.2 Getting started .....	3
1.3 R objects .....	5
1.3.1 The vector class .....	6
1.3.2 The matrix, array, and factor classes .....	9
1.3.3 The list and data.frame classes .....	12
1.4 Probability distributions in R .....	14
1.5 Basic and not-so-basic statistics .....	14
1.6 Graphical facilities .....	26
1.7 Writing new R functions .....	31
1.8 Input and output in R .....	35
1.9 Administration of R objects .....	36
1.10 The mscm package .....	36
1.11 Additional exercises .....	37
<b>2 Random Variable Generation</b> .....	41
2.1 Introduction .....	42
2.1.1 Uniform simulation .....	42
2.1.2 The inverse transform .....	44
2.2 General transformation methods .....	46
2.2.1 A normal generator .....	47
2.2.2 Discrete distributions .....	48
2.2.3 Mixture representations .....	50
2.3 Accept-reject methods .....	51

2.4	Additional exercises . . . . .	57
<b>3</b>	<b>Monte Carlo Integration . . . . .</b>	<b>61</b>
3.1	Introduction . . . . .	62
3.2	Classical Monte Carlo integration . . . . .	65
3.3	Importance sampling . . . . .	69
3.3.1	An arbitrary change of reference measure . . . . .	69
3.3.2	Sampling importance resampling . . . . .	75
3.3.3	Selection of the importance function . . . . .	78
3.4	Additional exercises . . . . .	86
<b>4</b>	<b>Controlling and Accelerating Convergence . . . . .</b>	<b>89</b>
4.1	Introduction . . . . .	90
4.2	Monitoring variation . . . . .	91
4.3	Asymptotic variance of importance sampling estimators . . . . .	92
4.4	Effective sample size and perplexity . . . . .	98
4.5	Simultaneous monitoring . . . . .	100
4.6	Rao–Blackwellization and deconditioning . . . . .	107
4.7	Acceleration methods . . . . .	111
4.7.1	Correlated simulations . . . . .	111
4.7.2	Antithetic variables . . . . .	113
4.7.3	Control variates . . . . .	116
4.8	Additional exercises . . . . .	122
<b>5</b>	<b>Monte Carlo Optimization . . . . .</b>	<b>125</b>
5.1	Introduction . . . . .	126
5.2	Numerical optimization methods . . . . .	127
5.3	Stochastic search . . . . .	130
5.3.1	A basic solution . . . . .	130
5.3.2	Stochastic gradient methods . . . . .	136
5.3.3	Simulated annealing . . . . .	140
5.4	Stochastic approximation . . . . .	146
5.4.1	Optimizing Monte Carlo approximations . . . . .	146
5.4.2	Missing-data models and demarginalization . . . . .	150
5.4.3	The EM algorithm . . . . .	152
5.4.4	Monte Carlo EM . . . . .	157
5.5	Additional exercises . . . . .	163
<b>6</b>	<b>Metropolis–Hastings Algorithms . . . . .</b>	<b>167</b>
6.1	Introduction . . . . .	168
6.2	A peek at Markov chain theory . . . . .	168
6.3	Basic Metropolis–Hastings algorithms . . . . .	170
6.3.1	A generic Markov chain Monte Carlo algorithm . . . . .	171
6.3.2	The independent Metropolis–Hastings algorithm . . . . .	175
6.4	A selection of candidates . . . . .	182

6.4.1	Random walks	182
6.4.2	Alternative candidates	185
6.5	Acceptance rates	192
6.6	Additional exercises	195
<b>7</b>	<b>Gibbs Samplers</b>	<b>199</b>
7.1	Introduction	200
7.2	The two-stage Gibbs sampler	200
7.3	The multistage Gibbs sampler	206
7.4	Missing data and latent variables	209
7.5	Hierarchical structures	221
7.6	Other considerations	224
7.6.1	Reparameterization	224
7.6.2	Rao–Blackwellization	227
7.6.3	Metropolis within Gibbs and hybrid strategies	230
7.6.4	Improper priors	232
7.7	Additional exercises	234
<b>8</b>	<b>Monitoring and Adaptation for MCMC Algorithms</b>	<b>237</b>
8.1	Introduction	238
8.2	Monitoring what and why	238
8.2.1	Convergence to the stationary distribution	238
8.2.2	Convergence of averages	240
8.2.3	Approximating iid sampling	240
8.2.4	The <code>coda</code> package	241
8.3	Monitoring convergence to stationarity	242
8.3.1	Graphical diagnoses	242
8.3.2	Nonparametric tests of stationarity	243
8.3.3	Spectral analysis	247
8.4	Monitoring convergence of averages	250
8.4.1	Graphical diagnoses	250
8.4.2	Within and between variances	253
8.4.3	Effective sample size	255
8.4.4	Fixed-width batch means	257
8.5	Adaptive MCMC	258
8.5.1	Cautions about adaptation	258
8.5.2	The <code>amcmc</code> package	264
8.6	Additional exercises	267
