# Table of Contents

## Section I. Models and Methods

1. Modeling operator performance under stress and fatigue: What can a cognitive architectural model tell us?  
   J. W. Kim and P. Hancock, USA  
   Page 1

2. Interactive-Consumer Design & Evaluation (I-CODE): A new method to investigate cognitive structures of user's on automotive functionalities  
   K. Bengler, Germany, J. Coughlin, USA, B. Reimer, USA, and B. Niedermaier, Germany  
   Page 11

3. Using TRIZ for human factors design  
   M. Helander, Singapore  
   Page 20

4. Graphical user interface model based on human error using analytic hierarchy process  
   S. Yamada, T. Nonaka and T. Hase, Japan  
   Page 29

5. Computerised link analysis  
   Y. Zhao, S. Hignett and N. Mansfield, UK  
   Page 34

6. A methodology for evaluating multiple aspects of learnability: Testing an early prototype of the new BMW iDrive  
   B. Reimer, USA, B. Niedermaier, Germany, K. Bengler, Germany, B. Mehler, USA, and J. Coughlin, USA  
   Page 43

7. The method for risk assessment of accident caused by technological process, human factor and environment  
   M. Grozdanovic, E. Stojiljkovic and D. Grozdanovic, Serbia  
   Page 54

8. Methodology for tests execution in usability laboratory considering cross-platform devices  
   C. Tambascia and R. Duarte, Brazil  
   Page 62

9. The study of sizing system with 3D measurement data for preschool children in Central Taiwan  
   Y. C. Lin and J. S. Chen, Taiwan  
   Page 71

10. Perception of pressure on foot  
    A. Rodrigo, Hong Kong, R. Goonetilleke, Hong Kong, and S. Xiong, P. R. China  
    Page 80

Section III. Product Design and User Interfaces

22 Design and evaluation approach for increasing compatibility and performance of digital painter in screen drawing tasks

23 Designing small touch-screen devices: The impact of display size on pointing performance
M. Oehl and F. Siebert, Germany

24 Usability of integrated display groupware in collaborative work
T. Y. Lim, H. Khalid and A. Yeo, Malaysia

25 Beauty and the beast: Predicting web page visual appeal
C. Dudek, G. Lindgaard and S. Pineau, Canada

26 Testing measures of aviation display clutter for predicting pilot perceptions and flight performance
K. Kaufmann, D. Kaber, A. Alexander, S.-H. Kim and J. T. Naylor, USA

27 Operator display issues: Examples from hydrocracking
S. Underwood, J. Shinkle and J. Gallimore, USA

28 Automatic generation of graphical user interface using genetic algorithm
T. Mori, T. Nonaka and T. Hase, Japan

29 A first step towards an integrated warning approach
K. Maier, H. Sacher and J. Hellbruck, Germany

30 Citarasana engineering for modeling affective product design
H. Khalid, Malaysia

31 Modeling mobile devices for the elderly
M. Ziefle, Germany

32 Exploring what young consumers want in cell phones
F. Calisir and C. A. Gumussoy, Turkey

33 Tactile buttons used in non-visual cell phone
N.-F. Chen, F.-G. Wu and C.-H. Ho, Taiwan

34 Ergonomic evaluation of Brazilian interfaces of mobile banking sites developed for iPhone
V. Kupczik and S. Padovani, Brazil
35 Design comparison of commercial TV remote controls
H. Beauchamp and Y. S. Ryu, USA

36 Can “tactile kiosk” attract potential users in public?
Y. Yasuma, M. Nakanishi and Y. Okada, Japan

37 The improvement of Beijing digital information booth interface design
P.-L. Rau and Y. Sun, P. R. China

38 Emotions invoked by overall shape of robot
J. Hwang, Korea, W. Hwang, Korea, and T. Park, Singapore

39 User-centered smarter robotic medical systems
T. Ahram, W. Karwowski, B. Amaba and C. Andrzejczak, USA

40 Development and pilot test of a usability evaluation protocol for an ergonomic device in a hospital
P. T. W. So, S. W. C. Cheng, H. P. So and A. H. S. Chan, Hong Kong

41 Design of hand operated trowel: An ergonomic approach
M. Khidiya and A. Bhardwaj, India

42 Modeling precision agriculture device for palm oil industry
M. F. Yahaya and S.-L. Choong, Malaysia

43 An expert system for risk assessment of work-related musculo-skeletal disorders
S. Pavlovic-Veselinovic, Serbia, A. Hedge, USA, and M. Grozdanovic, Serbia

44 Towards more humane calendar applications
S. Engemand and S. Keates, UK

45 User interface with bird’s eye view function
T. Nonaka, K. Oishi and T. Hase, Japan

Section IV. Input Devices and Computer Based Systems

46 Ergonomic assessment of pronating-reducing mouse designs: Anatomical compliance in three-dimensional space
D. Feathers, A. Hedge and K. Rollings, USA

47 Ergonomic comparison of five mouse designs: Performance and posture differences
A. Hedge, D. Feathers and K. Rollings, USA
Five-key text entry: An empirical comparison of novice performance with three keyboard layouts
B. Millet, S. Asfour, J. R. Lewis and A. Onar-Thomas, USA

Adaptive haptic touchpad for infotainment interaction in cars - How much information is the driver able to feel?
R. Spies, W. Hamberger, A. Blattner, H. Bubb and K. Bengler, Germany

Design approach of a direct-touch input for navigation techniques interface of web map
H. Lin and F.-G. Wu, Taiwan

Study on a haptic interaction with touch panel
D. Kobayashi and S. Yamamoto, Japan

Universal communication through touch panel
N. Hosono, H. Inoue, H. Miki, M. Suzuki and Y. Tomita, Japan

AV remote controller with an input device to recognize handwritten characters
M. Yonezawa, T. Nonaka and T. Hase, Japan

AV remote controller using speech recognition
S. Sugiyama, T. Nonaka and T. Hase, Japan

Bridging the disconnect between back injuries and prevention using interactive computer-based systems
R. J. Banks and J. A. Hay, USA

Modeling of an integrated workstation environment for occupational safety and health application
A. R. Omar and I. Halim, Malaysia

Technology acceptance and the ageing population: A review
K. Chen and A. H. S. Chan, Hong Kong

Evaluation of dynamic touch using moment of joint inertia
T. Asao, Y. Kumazaki, K. Kawanishi, K. Kotani and K. Horii, Japan

Improvement in touch operations by tactile feedback
T. Fukui, M. Nakanishi, Y. Okada and S. Yamamoto, Japan

Section V. Individual and Environmental Technology Related Issues

Technology acceptance and the ageing population: A review
K. Chen and A. H. S. Chan, Hong Kong

Evaluation of dynamic touch using moment of joint inertia
T. Asao, Y. Kumazaki, K. Kawanishi, K. Kotani and K. Horii, Japan

Improvement in touch operations by tactile feedback
T. Fukui, M. Nakanishi, Y. Okada and S. Yamamoto, Japan
