## Introduction

The Growing Surge in Electric Vehicle Activity ......................................................... 3  
Ronald K. Jurgen, Editor

## EV Overviews and Viewpoints

A Survey on Electric/Hybrid Vehicles (2010-01-0856) .................................................. 9  
Bernardo Ribeiro, Francisco Brito and Jorge Martins – University do Minho

Design Optimization of a Series Plug-In Hybrid Electric Vehicle for Real-World Driving Conditions (2010-01-0840) .......................................................... 23  
Rakesh Patil, Vrian Adomato and Zoran Filipi – University of Michigan

Design and Analysis of an Adaptive Real-Time Advisory System for Improving Real World Fuel Economy in a Hybrid Electric Vehicle (2010-01-0835) ........................................... 35  
Fazal Syed – Ford Motor Company  
Swathi Nallapa and Allen Dobryden – Ford Motor Company  
Carrie Grand – Michigan Technological University  
Ryan McGee and Dimitar Filev – Ford Motor Company

What if the Prius Wasn’t a Hybrid? What if the Corolla Were? An Analysis Based on Vehicle Limited Fuel Consumption and Powertrain and Braking Efficiency (2010-01-0834) ........................................... 47  
Clark Hochgraf – Rochester Institute of Technology  
Mike Duoba – Argonne National Laboratory

Simulation Based Assessment of Plug-in Hybrid Electric Vehicle Behavior During Real-World 24-Hour Missions (2010-01-0827) .......................................................... 55  
Tae-Kyung Lee and Zoran Filipi – University of Michigan

The CO₂ Benefits of Electrification REVs, PHEVs and Charging Scenarios (2009-01-1311) .......................................................... 69  
E. D. Tate and Peter J. Savagian – General Motors Corporation
Drive Cycle Fuel Consumption Variability of Plug-In Hybrid Vehicles
Due to Aggressive Driving (2009-01-1335) ................................................................. 81
Richard “Barney” Carlson, Henning Lohse-Busch, Michael Duoba
and Neeraj Shidore – Argonne National Laboratory

Thermoelectric Exhaust Heat Recovery for Hybrid Vehicles
(2009-01-1327) ............................................................................................................. 89
Quazi E. Hussain, David R. Brigham and Clay W. Maranville –
Ford Motor Company

Impact of Drive Cycles on PHEV Component Requirements
(2008-01-1337) ........................................................................................................... 101
J. Kwon, J. Kim, E. Fallas, S. Pagerit and A. Rousseau –
Argonne National Laboratory

Hybrid Electric Vehicle Energy Management Using Game Theory
(2008-01-1317) ........................................................................................................... 111
C. Dextreit and F. Assadian – Jaguar Cars Ltd.
I. V. Kolmanovsky – Ford Research and Advanced Engineering
J. Mahtani and K. Burnham – Coventry University

The Electrification of the Automobile: From Conventional Hybrid,
to Plug-In Hybrids, to Extended-Range Electric Vehicles
(2008-01-0458) ........................................................................................................... 125
E. D. Tate, Michael O. Harpster and Peter J. Savagian –
General Motors Corporation

Study on the Potential Benefits of Plug-In Hybrid Systems
(2008-01-0456) ........................................................................................................... 137
Masayuki Komatsu, Toshifumi Takaoka, Tetsuhiro Ishikawa,
Yuujin Gotouda and Naoto Suzuki – Toyota Motor Corporation
Tamaki Ozawa – Toyota Technical Development Corporation

About the Editor ............................................................................................................. 147
