Preface xxi
Acknowledgments xxxii
About the Author xxxiii

PART I: About Interdisciplinary Studies 1

1. Defining Interdisciplinary Studies 3
   Chapter Preview
   The Meaning of Interdisciplinary Studies 3
   Two Conceptions of Interdisciplinary Studies 3
   The "Discipline" Part of Interdisciplinary Studies 4
   Categories of Traditional Disciplines 5
   The Fine and Performing Arts 5
   The Applied and Professional Fields 5
   The Emergence of Interdisciplines 6
   Evolving Constructs 6
   The "Inter" Part of Interdisciplinary Studies 7
   "Inter" Refers to Contested Space 7
   "Inter" Refers to the Action Taken on Insights 7
   "Inter" Refers to the Result of Integration 7
   Aspects of the Prefix "Inter" Summarized 8
   The "Studies" Part of Interdisciplinary Studies 8
   Why Traditional Disciplines Are Not Referred to as "Studies" 8
   Why "Studies" Is an Integral Part of Interdisciplinary Studies 9
   The Differences Between the Disciplines and Interdisciplinary Studies 9
   Why "Studies" Is Plural 11
A Definition of Interdisciplinary Studies 12
   Reasons for Agreeing on a Definition of Interdisciplinary Studies 12
The Need to Produce Revolutionary Insights and Generative Technologies 38
The Interdisciplinary Critique of the Disciplines 41
Specialization Can Blind Us to the Broader Context 42
Specialization Tends to Produce Tunnel Vision 42
Disciplinarians Sometimes Fail to Appreciate Other Disciplinary Perspectives 43
Some Worthwhile Topics Fall in the Gaps Between Disciplines 43
Creative Breakthroughs Often Require Interdisciplinary Knowledge 43
The Disciplines Are Often Unable to Address Complex Problems Comprehensively 44
The Disciplines Are Products of a Bygone Age 44
The Formation of the Disciplines and the Origins of Interdisciplinarity 45
The Origins of the University and the Disciplines 46
The Impact of the Enlightenment and Scientific Revolution on the Disciplines 46
The Consolidation of the Disciplines in the Late Eighteenth and Early Nineteenth Centuries 47
The Professionalization of Knowledge in the Late Nineteenth and Early Twentieth Centuries and the Rise of the Modern Disciplines 47
The Emergence of Interdisciplinary Studies and Interdisciplinarity 48
The General Education Movement 49
The Cold War Era and Interdisciplinarity 49
University Reforms in the 1960s and the Emergence of Interdisciplinary Studies 50
Interdisciplinary Studies Becomes an Academic Field 51
Assumptions of Interdisciplinarity 52
The Reality Beyond the Academy Requires an Interdisciplinary Approach to Research and Education 52
The Disciplines Are Foundational to Interdisciplinarity 53
The Disciplines by Themselves Are Inadequate to Address Complex Problems 53
Disciplinary Perspectives are Partial and Biased 55
Cognitive Abilities Fostered by Interdisciplinarity 56
Develop and Apply Perspective-Taking Techniques 56
Develop Structural Knowledge of Complex Problems 56
Create or Discover Common Ground Between Conflicting Insights 56
Integrate Conflicting Insights From Two or More Disciplines 57
Produce a Cognitive Advancement or More Comprehensive Understanding of the Problem 57
Reflection on What Interdisciplinary Education Offers 58
Traits and Skills of Interdisciplinarians 58
Traits 58
Skills 61
Reflection on Traits and Skills of Interdisciplinarians 63
Chapter Summary 63
Notes 64
Exercises 65

PART II: Drawing on Disciplinary Insights 67

3. Beginning the Research Process 69
Chapter Preview 69
What the Interdisciplinary Research Process Is 69
A Process of Decision Making 69
A Decision-Making Process 70
A Decision-Making Process That Is Heuristic 70
A Decision-Making Process That Is Iterative 71
A Decision-Making Process That Is Reflexive 71
Two Additional Characteristics of the IRP 71
An Integrated Model of the IRP 73
The Benefits of a Map 73
Cautions Concerning These STEPS 74
STEP 1: Define the Problem or State the Research Question 76
Select a Problem or Pose a Question That Is Complex and Requires Insights From More Than One Discipline 76
Define the Scope of the Problem or Question 77
Avoid Three Tendencies That Run Counter to the IRP 78
Disciplinary Bias 78
Disciplinary Jargon 78
Personal Bias 79
Follow Three Guidelines for Stating the Problem or Posing the Question 80
Examples of Statements of an Interdisciplinary Problem or Question 81
Note to Readers 84
STEP 2: Justify Using an Interdisciplinary Approach 84
The Problem or Question Is Complex 85
Important Insights or Theories of the Problem Are Offered by Two or More Disciplines 85
Note to Readers 86
No Single Discipline Has Been Able to Explain the Problem Comprehensively or Resolve It 86
The Problem Is an Unresolved Societal Need or Issue 86

Examples of Statements That Justify Using an Interdisciplinary Approach 87

Chapter Summary 89
Notes 90
Exercises 91

4. Introducing the Disciplines 93
Chapter Preview 93
The Structure of Knowledge and Its Reflection in the Organization of the Academy 93
Disciplines 94
Disciplinarity 94
Categories of Disciplines 94
The Concept of Disciplinary Perspective 96
Disciplinary Perspective 96
Misconceptions About the Term Disciplinary Perspective 96
Other Problems With the Concept of Disciplinary Perspective 99
The Concept of Disciplinary Perspective Clarified 100
A Definition of Disciplinary Perspective 101
Using Disciplinary Perspectives 102
The Defining Elements of a Discipline's Perspective 105
Phenomena 105
Phenomena Classified 107
Note to Readers 111
Epistemology 111
The Nature and Limits of the Truth Claims Made by Major Epistemological Approaches 112
Various Epistemologies 113
Epistemologies of Various Theories and Schools of Thought 117
Note to Readers 119
Assumptions 120
Basic Assumptions 120
Note to Readers 125
Concepts 126
Theory 126
Two Kinds of Theory 127
The Importance of Theory to Interdisciplinary Work 127
Note to Readers 128
5. Identifying Relevant Disciplines

Chapter Preview

STEP 3: Identify Relevant Disciplines

Identify Potentially Relevant Disciplines

Identify Potentially Relevant Disciplines Before Conducting the Full-Scale Literature Search

Identify Phenomena Typically of Interest to Disciplines

Draw on Disciplinary Perspectives in a General Sense

An Example of the Standard Way to Proceed

Synthesis of the Perspectival and Classification Approaches

Summary of How to Identify Disciplines Potentially Relevant to the Problem

Map the Problem to Reveal Its Disciplinary Parts

The Research Map

The Concept or Principle Map

The Theory Map

Systems Thinking and the System Map

Benefits to Students of Using Systems Thinking and the System Map

The Similarity of Systems Thinking to Problem-Based and Inquiry-Based Learning

How Systems Thinking Promotes Interdisciplinary Learning and Facilitates the Research Process

Reducing the Number of Potentially Relevant Disciplines to Those That Are Most Relevant

“Most” Relevant Defined

Three Questions to Ask to Distinguish Between Potentially Relevant and Most Relevant Disciplines

Applying These Questions to the Disciplines Potentially Relevant to Various Topics
6. Conducting the Literature Search

Chapter Preview
STEP 4: Conduct the Literature Search
Defining Literature Search
Reasons for Conducting the Literature Search
Special Challenges Confronting Interdisciplinarians
There Is Simply More Ground to Be Covered
Interdisciplinary Researchers Risk Being Seduced by What Disciplinary Experts Say
Interdisciplinarians Must Place the Insights and Theories of Each Relevant Discipline Within the Context of Its Unique Perspective
The Methods of Library and Database Cataloguing Disadvantage Interdisciplinary Researchers
Conducting the Interdisciplinary Literature Search
The Initial Search
The Organization and Classification of Books in Libraries
Direct Searching
Search Strategies
Mistakes Commonly Made When Beginning the Literature Search
The Full-Scale Literature Search
Note to Readers
Two Challenges of the Full-Scale Literature Search
Building on the Connections Discovered by Previous Scholars
Consulting Disciplinary Experts
Other Sources of Knowledge

Chapter Summary
Notes
Exercises

7. Developing Adequacy in Relevant Disciplines

Chapter Preview
STEP 5: Develop Adequacy in Each Relevant Discipline
Comprehending Enough About Each Discipline
How Much Knowledge Is Required From Each Discipline?
10. Identifying Conflicts Between Insights

Chapter Preview

STEP 7: Identify Conflicts Between Insights or Theories and Their Sources

The Importance of Identifying Conflicts Between Insights

Where Conflicting Insights Are Located

Conflicting Insights Produced by Authors From the Same Discipline

Conflicting Insights Produced by Authors From Different Disciplines

Why Insights Conflict

Concepts Embedded in Insights

Assumptions

Organizing Disciplinary Insights

Theories as Sources of Insights and Conflict Between Insights

Theories as Sources of Insights, Concepts, and Assumptions

Theories as Sources of Insights

Theories as Sources of Concepts

Theories as Sources of Assumptions

Organizing Information About Theories

Theories From the Same Discipline Can Be Sources of Conflict Between Insights

Theories From the Same Discipline Can Be Sources of Conflicting Assumptions

Theories From Different Disciplines Can Be Sources of Conflict Between Insights

A Note to Readers About Communicating Conflicts and Their Sources

Chapter Summary

Exercises

11. Creating Common Ground Between Concepts

Chapter Preview

STEP 8: Create Common Ground Between Concepts and Theories

The Theory of Common Ground as the Basis for Collaborative Communication and Interdisciplinary Integration
A Definition of Interdisciplinary Common Ground
Common Ground Is Necessary for Collaborative Communication
Common Ground Requires Unconventional Thinking
Common Ground Is Achieved Through the Use of Language
Note to Readers
Common Ground Must Be Created Whenever Concepts or Theories Conflict
Common Ground Is Created by Modifying Concepts or Theories Directly or Through Their Assumptions
Creating Common Ground Is Integral to Preparing Concepts and Theories for Integration
Creating Common Ground Requires Using Intuition
An Example of How Intuition Helps to Achieve Common Ground
Creating Common Ground Plays Out Differently in Contexts of Narrow Versus Wide Interdisciplinarity
Creating Common Ground Is the Interdisciplinarian's Responsibility
Modifying Concepts and Assumptions
How to Proceed
When to Seek Common Ground
Decide How Comprehensive the Study Will Be
Decide What Common Ground Will Be Created From
A Best Practice When Working With Concepts and Assumptions
Techniques Demonstrated for Modifying Concepts and Assumptions
1. The Technique of Redefinition
2. The Technique of Extension
3. The Technique of Transformation
4. The Technique of Organization
The Value of These Techniques
Creating Common Ground When Assumed Values and Rights Conflict
Arguments for the Validity of These Types
How to Know If Insights Conflict Over Ethics
Creating Common Ground When Values and Ethical Positions Conflict
Chapter Summary
Notes
Exercises
12. Creating Common Ground Between Theories 355
   Chapter Preview 355
   Disciplinary Theories 355
      A Definition of Disciplinary Theory 356
      When Working With Theories Is Necessary 356
   The Relationship of Models, Variables, and Causal Processes to Theories 357
      Models 357
      Variables and Relationships 358
      Independent and Dependent Variables 358
      Why a More Comprehensive Theory Includes Variables From Other Relevant Theories 359
      Theories May Contain Macro- and/or Micro-Level Variables Affecting the Construction of a More Comprehensive Theory 359
   Variables and Causality 361
      When Theories Differ Only Minimally and Focus Instead on Process 361
   Modifying a Set of Theories 364
      Situation A: One or More Theories in the Set Have a Broader Range of Applicability Than Do Others 364
         Identify All Variables or Causal Factors Addressed by Each Theory 364
         Reduce These Variables to the Fewest Number Possible by Categorizing Them Under a Few Broad Headings 365
         Determine How Many of These Categories Are Included in Each Theory 366
         If No Theory Encompasses All Categories, Determine Which Theory Can Most Readily Be Extended to Do So 366
         Modify the Theory by Extending Its Range of Applicability 368
      Critiquing Theories 369
         Situation B: None of the Theories in the Set Borrow Elements From Other Disciplines 370
            Modifying Concepts Embedded in Theories 371
            Modifying Assumptions Underlying Theories 372
            Modifying Concepts and Assumptions 377
   Chapter Summary 379
   Notes 380
   Exercises 380

13. Constructing a More Comprehensive Understanding or Theory 382
   Chapter Preview 382
   STEP 9: Construct a More Comprehensive Understanding 382
A Definition of More Comprehensive Understanding
and More Comprehensive Theory 382
Unpacking This Definition 383
The Process Involved 383
Constructing the More Comprehensive Understanding
From Modified Concepts 384
From the Humanities 384
From the Social Sciences 386
Constructing a More Comprehensive Theory From
a Modified Theory 387
Six Strategies to Achieve Causal or Propositional Integration 388
Sequential or End-to-end Causal Integration 388
Horizontal or Side-by-Side Causal Integration 389
Multicausal Integration 390
Cross-level or Multilevel Causal Integration 395
Spatial and Analytical Integration 403
Chapter Summary 407
Notes 407
Exercises 408

14. Reflecting on, Testing, and Communicating the Understanding 409
Chapter Preview 409
STEP 10: Reflect on, Test, and Communicate the Understanding 409
Reflecting on the More Comprehensive Understanding or Theory 409
Reflect on What Has Actually Been Learned From the Project in an Overall Sense 410
Reflect on STEPS Omitted or Compressed 411
Reflect on One's Own Biases 411
Interrogate One's Own Biases 412
Check One's Work for Biases 413
Reflect on One's Adherence to a Theoretical Approach 413
Reflect on One's Limited Understanding of the Relevant Disciplines, Theories, and Methods 414
Testing the Quality of Interdisciplinary Work 414
Learning Outcomes Claimed for Interdisciplinarity 415
Cognitive Abilities Attributable to Interdisciplinary Learning Drawn From Research on Cognition and Instruction 415
Develop and Apply Perspective-Taking Techniques 416
Develop Structural Knowledge of Problems Appropriate to Interdisciplinary Inquiry 416
