CONTENTS

Contributors and Advisers xi
Preface xiii
Acknowledgments xvii
How to Use This Handbook xix

Section 1. Energy Conversion Engineering 1.1

Section 2. Steam Power Generation 2.1

Section 3. Gas-Turbine Energy Power Generation 3.1

Section 4. Internal-Combustion Engine Energy Analyses 4.1

Section 5. Nuclear Energy Engineering 5.1

Section 6. Hydroelectric Energy Power Plants 6.1

Section 7. Wind-Power Energy Design and Application 7.1

Section 8. Solar-Power Energy Application and Usage 8.1

Section 9. Geothermal Energy Engineering 9.1

Section 10. Ocean Energy Engineering 10.1
Section 11. Heat Transfer and Energy Conservation 

Section 12. Fluid Transfer Engineering 

Section 13. Interior Climate Control Energy Economics 

Section 14. Energy Conservation and Environmental Pollution Control 

Index 1.1
