

**3D MODEL RECONSTRUCTION
FROM VECTOR
PERPENDICULAR PROJECTIONS**

Michal Eliáš

Bibliographic information of the German National Library

The German National Library lists this publication in the German national bibliography, with detailed bibliographic information on the Internet at <http://dnb.d-nb.de>.

Author's acknowledgement to Gabriela Chmelíková for translation.

This scientific monograph originated from the author's dissertation thesis defended at the Slovak University of Technology in Bratislava, Faculty of Materials Science and Technology in Trnava.

Reviewers:

Peter Husár, Professor, Ph.D.
Aleš Janota, Professor, Ph.D.
Augustín Gese, Ph.D.

Author's contact address:

CONTENTS

ABSTRACT.....	5
LIST OF ABBREVIATIONS.....	6
INTRODUCTION.....	7
1. OVERVIEW OF CURRENT STATE IN THE FIELD.....	10
1.1 DISPLAYING PARTS IN TECHNICAL DRAWING	10
1.1.1 <i>Selected elements and drawings properties</i>	10
1.1.1.1 Scale of projection.....	11
1.1.1.2 Lines.....	11
1.1.1.3 Projections.....	12
1.1.1.4 Other elements.....	15
1.1.1.5 Levels - layers	15
1.1.2 <i>Projecting</i>	15
1.1.2.1 Central projecting	16
1.1.2.2 Parallel projecting.....	16
1.1.3 <i>Geometric transformations</i>	21
1.1.3.1 3D linear transformations	22
1.1.4 <i>Basic geometric elements of technical drawing</i>	23
1.1.5 <i>Areas and their expression for computer graphics</i>	24
1.2 COMPUTER REPRESENTATION OF SOLIDS	25
1.2.1 <i>Boundary representation</i>	25
1.2.1.1 Edge representation	25
1.2.1.2 Simple surface representation.....	26
1.2.1.3 Structured boundary representation.....	26
1.2.2 <i>Constructive solid geometry</i>	27
1.2.3 <i>Patterns</i>	28
1.3 CURRENT APPROACHES TO ANALYSIS OF 3D MODEL RECONSTRUCTION FROM TECHNICAL DRAWING	28
1.3.1 <i>Foreign research</i>	30
1.3.1.1 Boundary representation of solids (B-Rep)	30
1.3.1.2 Constructive solid geometry (CSG).....	32
1.3.1.3 Other methods and analysis	35
1.3.1.4 Patents	36
1.3.2 <i>Domestic research</i>	37
1.3.3 <i>Summary</i>	39
2. SELECTED METHODS AND OWN SOLUTION PROCEDURE	41

2.1	SELECTION OF INPUT AND OUTPUT FORMAT AND WAY OF IMPLEMENTATION.....	41
2.2	DEFINITION OF INPUT LIMIT CRITERIA	42
2.2.1	<i>Elements of technical drawing</i>	43
2.2.2	<i>Geometric elements</i>	43
2.2.3	<i>Dimensions and projecting scale</i>	44
2.2.4	<i>Projections</i>	45
2.3	PROPOSAL OF AUTOMATION ALGORITHM OF 3D MODEL DESIGN	46
2.3.1	<i>Reading of vector data</i>	47
2.3.2	<i>Segmentation of lines</i>	48
2.3.3	<i>Recognition of line groups and projections</i>	49
2.3.4	<i>Front view processing</i>	53
2.3.4.1	Recognition of main axis of rotation and other axes	53
2.3.4.2	Recognition of spaced circles.....	56
2.3.4.3	Recognition of external outline edges	59
2.3.4.4	Processing of internal edges.....	60
2.3.5	<i>Processing of other views</i>	69
2.3.6	<i>Setting CSG representation of part</i>	69
2.3.7	<i>3D part model projection</i>	70
3.	PROGRAM IMPLEMENTATION AND VERIFICATION OF RESULTS.....	72
3.1	IMPLEMENTATION OF ALGORITHMS	72
3.1.1	<i>Data structures</i>	72
3.1.2	<i>User interface</i>	76
3.1.3	<i>Reading data from vector drawing</i>	77
3.1.4	<i>Processing vector data</i>	79
3.1.5	<i>Setting CSG tree of solid representation</i>	79
3.1.6	<i>Constituting final 3D part model</i>	80
3.2	VERIFICATION OF RESULTS.....	81
3.2.1	<i>Naming samples</i>	81
3.2.2	<i>Samples</i>	82
	CONCLUSION.....	85
	REFERENCES.....	88
	LIST OF PUBLICATIONS.....	95
	ANNEX – TESTED SAMPLES	97
