Bibliographic information of the German National Library

The German National Library lists this publication in the German national bibliography, with detailed bibliographic information on the Internet at <http://dnb.d-nb.de>.

Author's acknowledgement to Dagmar Rusková for translation.

This scientific monograph originated from the author's habilitation thesis defended at the Slovak University of Technology in Bratislava, Faculty of Materials Science and Technology in Trnava.

Reviewers:

Dušan Krokavec, Professor, Ph.D

Dušan Mudrončík, Professor, Ph.D.

Juraj Spalek, Professor, Ph.D.

Author's contact address:

Róbert Vrábek, Assoc. Professor, Ph.D.

Contents

ABSTRACT	5
MOTIVATION AND INTRODUCTION	6
1 METHOD OF HARMONIC LINEARIZATION AND SYSTEMS WITH HIGH-SPEED FEEDBACK	11
1.1 Introductory considerations	11
1.2 Nonlinear autonomous circuits and MHL	13
2 MATHEMATICAL METHODS OF INVESTIGATION OF NON-LINEAR DYNAMICAL SYSTEMS	17
2.1 Method of differential inequalities	17
2.2 Method of phase-state space	18
2.2.1 <i>Types of auto-oscillations in the autonomous 2nd order dynamical systems</i>	20
Bibliography	23
APPENDICES	25
A ANHARMONIC QUARTIC POTENTIAL OSCILLATOR PROBLEM AT OCCURRENCE OF SINGULAR PERTURBATIONS	27
A.1 Introduction	27
A.2 Prüffer's transformation and ϵ-undamped oscillations . .	28

B SOLUTIONS WITH ARBITRARILY LARGE ZERO NUMBERS	35
B.1 Introduction	35
B.2 Preliminaries	37
B.3 Main result	39
C THREE-POINT BOUNDARY VALUE PROBLEM	45
C.1 Introduction	45
C.2 Existence and asymptotic behavior of solutions	46
D FOUR-POINT BOUNDARY VALUE PROBLEM	51
D.1 Preliminaries	51
D.2 Main result	53
D.3 The correction function $v_\epsilon^{(corr)}(t)$	55
D.4 Proof of Theorem	57
D.5 Approximation of the solutions	59
E BOUNDARY LAYER PHENOMENON	63
E.1 Introduction	63
E.2 Boundary layer analysis	65
F LINEAR PROBLEM WITH CHARACTERISTIC ROOTS ON IMAGINARY AXIS	69
F.1 Introduction	69
F.2 Main result	71
G PROBLEM WITH NON-NORMALLY HYPERBOLIC MANIFOLD	77
G.1 Introduction	77
G.2 Main result	86

G.3	Generalization of the assumption $(\mathcal{A}1)$	90
H	A NOTE ABOUT THE EQUIVALENCE FOR NEUMANN PROBLEM WITH NON-NORMALLY HYPERBOLIC MAN- IFOLD	93
H.1	Preliminaries	93
H.2	Main results	97
H.3	Optimality of $v_{c,\epsilon,i}(t)$	102
