EMBEDDED SYSTEMS CIRCUITS and PROGRAMMING

Julio Sanchez
Maria P. Canton
# Table of Contents

## Preface

### Chapter 1 – Real-Time Computing

1.0 Defining the Embedded System  
1.1 Embedded Systems History  
1.2 Hardware Complexity  
1.2.1 Processor  
1.2.2 Microcontrollers  
1.2.3 Hardware and Software  
1.3 Execution in Real-Time  
1.3.1 Hard and Soft Real-Time Systems

### Chapter 2 – Circuit Fundamentals

2.1 Electrical Circuit  
2.2 Circuit Concepts and Components  
2.3 Digital Electronics  
2.4 Diode  
2.4.1 Light-Emitting Diode (LED)  
2.5 Transistors  
2.5.1 Bipolar Transistor  
2.5.2 MOS Transistor

### Chapter 3 – Logic Gates and Circuit Components

3.1 Logic Gates  
3.2 Power Supplies  
3.3 Clocked Logic and Flip-Flops  
3.3.1 RS Flip-Flop  
3.3.2 Clocked Circuits  
3.3.3 D Flip-Flop  
3.3.4 Edge-Triggered D Flip-Flop  
3.3.5 Preset and Clear Signals  
3.3.6 D Flip-Flop Waveform Action  
3.3.7 Flip-Flop Applications  
3.4 Digital Clocks  
3.4.1 Clock Waveforms
3.4.2 TTL Clock
3.4.3 555 Timer
3.4.4 Microcontroller Clocks

3.5 Counters and Frequency Dividers
3.5.1 Frequency Dividers
3.5.2 JK Flip-Flop Counter
3.5.3 Ripple Counters
3.5.4 Decoding Gates
3.5.5 Synchronous Counters
3.5.6 Counter ICs
3.5.7 Shift Registers

3.6 Multiplexers and Demultiplexers
3.6.1 Multiplexers
3.6.2 Demultiplexers
3.6.3 Multiplexer and Demultiplexer ICs

Chapter 4 – Input and Output Devices
4.1 Obtaining Input
4.2 Switches
  4.2.1 Switch Contact Bounce
  4.2.2 Keypads
4.3 Output Devices
  4.3.1 Seven-Segment LED
  4.3.2 Liquid Crystal Displays
  4.3.3 LCD Technologies

Chapter 5 – From Circuit Schematics to PCB
5.1 Circuit Diagram
  5.1.1 Symbols
  5.1.2 Tools for Electronic Circuit Design
5.2 Circuit Board Design
  5.2.1 Board Design Standards
  5.2.2 Gerber File Format
5.3 Developing the Circuit Prototype
  5.3.1 Breadboard
    Limitations of Breadboards
    Breadboarding Tools and Techniques
  5.3.2 Wire-Wrapping
  5.3.3 Perfboards
5.4 Printed Circuit Boards
  5.4.1 PCB Layers
  5.4.2 PCB Connectors
5.5 Making Your Own PCB
  5.5.1 Drawing the CPB Circuit
  5.5.2 Printing the PCB
  5.5.3 Transferring the PCB Image
  5.5.4 Etching the Board
  5.5.5 Finishing the Board
  5.5.6 Backside Image
Table of Contents

9.5 I/O Demo Board 147
  9.5.1 TestDemo1 Program 148
9.6 Comparisons in PIC Programming 151
  9.6.1 PIC Carry Flag 152

Chapter 10 – PIC Interrupt System 153
  10.1 Interrupts 153
    10.1.1 16F84 Interrupts 153
    10.1.2 Interrupt Control Register 153
    10.1.3 OPTION Register 154
  10.2 Interrupt Sources 155
    10.2.1 Port B External Interrupt 156
    10.2.2 Timer0 Interrupt 156
    10.2.3 Port B Line Change Interrupt 157
    10.2.4 Multiple External Interrupts 159
    10.2.5 EEPROM Data Write Interrupt 159
  10.3 Developing the Interrupt Handler 159
    10.3.1 Context Saving Operations 160
      Saving W and STATUS Registers 160
  10.4 Interrupt Programming 161
    10.4.1 Programming the External Interrupt 161
      RB0 Interrupt Initialization 162
      RB0 ISR 163
    10.4.2 Wake-Up from SLEEP Using the RB0 Interrupt 164
      SleepDemo Program 165
    10.4.3 Port B Bits 4-7 Status Change Interrupt 166
      RB4-7 Interrupt Initialization 166
      RB4-7 Change ISR 168
  10.5 Sample Programs 170
  10.6 Demonstration Programs 171
    10.6.1 RB0Int Program 171
    10.6.2 SleepDemo Program 175
    10.6.3 RB4to7Int Program 177

Chapter 11 – Timers and Counters 183
  11.1 Controlling the Time Lapse 183
    11.1.1 16F84 Timer0 Module 183
    11.1.2 Timer0 Operation 184
      Timer0 Interrupt 185
      Timer0 Prescaler 185
  11.2 Delays Using Timer0 186
    11.2.1 Long Delay Loops 187
      How Accurate Is the Delay? 188
  11.3 Timer0 as a Counter 188
  11.4 Timer0 Programming 189
    11.4.1 Programming a Counter 190
      Timer/Counter Test Circuit 190
      TimerCounter Program 191
      Code Details 191
11.4.2 Timer0 as a Delay Timer 192
   Delay Timer Circuit 192
11.4.3 DelayTimer Program 193
   Code Details 193
11.4.4 Variable Time Lapse 194
11.4.5 Variable Lapse Timer Program 195
   Code Details 195
11.4.6 Interrupt-Driven Timer 198
11.4.7 TimerInt Program 198
   Code Details 198

11.5 Watchdog Timer 201
   11.5.1 Watchdog Timer Programming 202

11.6 Demonstration Programs 202
   11.6.1 Tmr0Counter program 202
   11.6.2 Timer0 Program 205
   11.6.3 LapseTimer Program 207
   11.6.4 LapseTmrInt Program 211

Chapter 12 – LCD Hardware and Programming 217

12.1 Liquid Crystal Display 217
   12.1.1 LCD Features and Architecture 217
   12.1.2 LCD Functions and Components 218
       Internal Registers 218
       Busy Flag 218
       Address Counter 218
       Display Data RAM (DDRAM) 218
       Character Generator ROM (CGROM) 218
       Character Generator RAM (CGRAM) 219
       Timing Generation Circuit 219
       Liquid Crystal Display Driver Circuit 220
       Cursor/Blink Control Circuit 220
   12.1.3 Connectivity and Pin-Out 220

12.2 Interfacing with the HD44780 221
   12.2.1 Busy Flag or Timed Delay Options 222
   12.2.2 Contrast Control 223
   12.2.3 Display Backlight 223
   12.2.4 Display Memory Mapping 223

12.3 HD44780 Instruction Set 225
   12.3.1 Instruction Set Overview 225
       Clearing the Display 225
       Return Home 226
       Entry Mode Set 226
       Display and Cursor ON/OFF 226
       Cursor/Display Shift 226
       Function Set 227
       Set CGRAM Address 227
       Set DDRAM Address 227
       Read Busy Flag and Address Register 227
       Write Data 227
       Read Data 228
   12.3.2 A 16F84 8-Bit Data Mode Circuit 228
12.4  LCD Programming

12.4.1  Defining Constants and Variables
Using MPLAB Data Directives

12.4.2  LCD Initialization
Function Set Command
Display Off
Display and Cursor On
Set Entry Mode
Cursor and Display Shift
Clear Display

12.4.3  Auxiliary Operations
Time Delay Routine
Pulsing the E Line
Reading the Busy Flag
Bit Merging Operations

12.4.4  Text Data Storage and Display
Generating and Storing a Text String
Displaying the Text String

12.4.5  Data Compression Techniques
4-Bit Data Transfer Mode
Master/Slave Systems

12.5  Sample Programs

Chapter 13 – Analog-to-Digital and Real-Time Clocks

13.1  Clocks and the Digital Revolution

13.2  A/D Converters

13.2.1  Converter Resolution

13.2.2  ADC Implementation

13.3  A/D Integrated Circuits

13.3.1  ADC0331 Sample Circuit and Program

13.4  PIC Onboard A/D Hardware

13.4.1  A/D Module on the 16F87x

13.4.2  A/D Module Sample Circuit and Program

13.5  Real-Time Clocks

13.5.1  NJU6355 Real-Time Clock

13.5.2  RTC Demonstration Circuit and Program

13.6  Demonstration Programs

Chapter 14 – Data EEPROM

14.1  EEPROM Programming

14.2  EEPROM Programming
14.2.1 Reading EEPROM Data 323
14.2.2 EEPROM Data Memory Write 323
14.3 EEPROM Programming Application 324
  14.3.1 EECounter Program 324
     Code Details 324
14.4 Demonstration Programs 329
  14.4.1 EECounter Program 329
  14.4.2 Ser2EEP Program 341
  14.4.3 I2CEEP Program 358

Chapter 15 – Stepper Motors 379

  15.1 Description and Operation 379
  15.1.1 Stepper Motor Types
         Variable Reluctance 381
         Permanent Magnet 381
         Hybrid 381
  15.1.2 Unipolar Stepper Motors 382
  15.1.3 Determining Unipolar and Bipolar Wiring
         Four-Wire Motor 383
         Six-Wire Unipolar Motor 383
         Five-Wire Unipolar 383
  15.1.4 Bipolar Stepper Motors 384

  15.2 Stepper Motor Controls 384
  15.2.1 Stepping Modes
         Wave Drive Mode 385
         Full Step Mode 386
         Half Step Mode 387
         Microstepping 387

Chapter 16 – Stepper Motor Circuit Components 389

  16.1 Circuit Elements 389
  16.1.1 Input, Output, and Feedback 390
  16.2 Translator 390
     16.2.1 PIC Microcontroller as a Translator 390
  16.3 Translator/Drivers 391
     16.3.1 UCN 5804 391
     16.3.2 L297 392
     16.3.3 EDE1204 394
     16.3.4 SLA7060 and SLA7024 394
  16.4 Power Driver 395
     16.4.1 Unipolar Drivers
          PIC Microcontroller as a Driver 395
          ULN2803A 395
          TIP 120 396
     16.4.2 Bipolar Drivers 397
     16.4.3 Transistorized H Bridge
          Snubber Diodes 398
     16.4.4 H Bridge ICs
          L293D 399
          L298 400
**Chapter 17 – Unipolar Motor Circuits and Programs**

17.1 Stepper Motor Control Circuits  
17.1.1 Stepper Motor Circuit Schematic Conventions  
17.2 Motor Speed Control  
17.2.1 Speed Control from Digital Input  
17.2.2 Analog Input Speed Control  
17.3 Unipolar Motor Control Circuits  
17.3.1 Matching Circuit to Motor Power  
17.3.2 16F84 Unipolar Circuit  
17.3.3 5804 Unipolar Circuit  
17.3.4 16F686 PIC Circuit  
17.3.5 16F686 Programming  
17.3.6 Stepper Motor Position Control  
17.4 Demonstration Programs  
17.5 Other Sources of Control

**Chapter 18 – Constant-Voltage Bipolar Motor Controls**

18.1 Unipolar versus Bipolar  
18.2 Simple, L293 Bipolar Circuit  
18.3 Demonstration Programs  
18.4 Other Sources of Control

**Chapter 19 – Advanced Motor Controls**

19.1 Choppers and Microstepping  
19.2 Chopper Circuit Fundamentals  
19.3 L297/298 Chopper Circuit  
19.4 Other Sources of Control
19.4 A Chopper-Based Demo Board
  19.4.1 Motor Circuit Power Requirements 492
  19.4.2 Chopper Demo Program 494

19.5 Microstepping 494
  19.5.1 Microstepping Fundamentals 497
  Microstepping Theory 497
  Pulse Width Modulation (PWM) 499

19.6 Programming PWM
  19.6.1 CCP Module 500
  19.6.2 PWM Circuit and Software 502
  19.6.3 Microstepping by PWM 505
  19.6.4 Microstepping Sample Program 506

19.7 Microstepping ICs 508
  19.7.1 Allegro 3955 IC 508
  19.7.2 3955-Based Circuit 510
  19.7.3 3955 Motor Driver Program 512

19.8 Demonstration Programs 514
  19.8.1 PWM_DEMO_873.asm 514
  19.8.2 PIC_Chopper.asm 518
  19.8.3 PWM_Micstep.asm 522
  19.8.4 PIC873_3955.asm 530

Chapter 20 – Communications 543

20.1 PIC Communications Overview 543

20.2 Serial Data Transmission 544
  20.2.1 Asynchronous Serial Transmission 544
  20.2.2 Synchronous Serial Transmission 546
  20.2.3 PIC Serial Communications 546
  20.2.4 RS-232-C Standard 547
    Essential Concepts 548
    Serial Bit Stream 549
    Parity Testing 549
    Connectors and Wiring 550
    Null Modem 550
    Null Modem Cable 551
  20.2.5 EIA-485 Standard 553
    EIA-485 in PIC-based Systems 554

20.3 Parallel Data Transmission 554
  20.3.1 PIC Parallel Slave Port (PSP) 555

20.4 PIC “Free-Style” Serial Programming 555
  20.4.1 PIC-to-PIC Serial Communications 556
    PIC-to-PIC Serial Communications Circuits 556
    PIC-to-PIC Serial Communications Programs 558
  20.4.2 Program Using Shift Register ICs 564
    74HC165 Parallel-to-Serial Shift Register 565
    74HC164 Serial-to-Parallel Shift Register 568

20.5 PIC Protocol-Based Serial Programming 570
  20.5.1 RS-232-C Communications on the 16F84 570
    RS-232-C Transceiver IC 571
    PIC-to-PC Communications 572
### Table of Contents

#### 20.5.2 RS-232-C Communications on the 16F87x
- 16F87x USART Module
- USART Baud Rate Generator
- 16F87x USART Asynchronous Transmitter
- 16F87x USART Asynchronous Receiver
- PIC-to-PC RS-232-C Communications Circuit
- 16F877 PIC Initialization Code
- USART Receive and Transmit Routines
- USART Receive Interrupt

#### 20.6 Demonstration Programs
- SerialSnd Program
- SerialRcv Program
- Serial6465 Program
- TTYUsart Program
- SerComLCD Program
- SerIntLCD Program

### Appendix A – Resistor Color Codes

### Appendix B – Essential Electronics

#### B.1 Atom

#### B.2 Isotopes and Ions

#### B.3 Static Electricity

#### B.4 Electrical Charge
- Voltage
- Current
- Power
- Ohm’s Law

#### B.5 Electrical Circuits
- Types of Circuits

#### B.6 Circuit Elements
- Resistors
- Revisiting Ohm's Law
- Resistors in Series and Parallel
- Capacitors
- Capacitors in Series and in Parallel
- Inductors
- Transformers

#### B.7 Semiconductors
- Integrated Circuits
- Semiconductor Electronics
- P-Type and N-Type Silicon
- Diode
## Appendix C – Numeric Data

C.1 Numbers in Computing
   C.1.1 Counting
   C.1.2 Tally System
   C.1.3 Roman Numerals

C.2 Origins of the Decimal System
   C.2.1 Number Systems for Digital-Electronics
   C.2.2 Positional Characteristics
   C.2.3 Radix or Base of a Number System

C.3 Types of Numbers
   C.3.1 Whole Numbers
   C.3.2 Signed Numbers
   C.3.3 Rational, Irrational, and Imaginary Numbers

C.4 Radix Representations
   C.4.1 Decimal versus Binary Numbers
   C.4.2 Hexadecimal and Octal

C.5 Number System Conversions
   C.5.1 Binary-to-ASCII-Decimal
   C.5.2 Binary-to-Hexadecimal Conversion
   C.5.3 Decimal-to-Binary Conversion

## Appendix D – Character Data

D.1 Character Representations
   D.1.1 Electronic-Digital Machines

D.2 Character Representations
   D.2.1 ASCII
   D.2.2 EBCDIC and IBM
   D.2.3 Unicode

D.3 Storage and Encoding of Integers
   D.3.1 Signed and Unsigned Representations
   D.3.2 Word Size
   D.3.3 Byte Ordering
   D.3.4 Sign-Magnitude Representation
   D.3.5 Radix Complement Representation

D.4 Encoding of Fractional Numbers
   D.4.1 Fixed-Point Representations
   D.4.2 Floating-Point Representations
   D.4.3 Standardized Floating-Point Representations
   D.4.4 IEEE 754 Single Format
   D.4.5 Encoding and Decoding Floating-Point Numbers

D.5 Binary-Coded Decimals (BCD)
   D.5.1 Floating-Point BCD

## Appendix E – Digital Arithmetic and Conversions

E.1 Microcontroller Arithmetic

E.2 Unsigned and Two’s Complement Arithmetic
   E.2.1 Operations on Decimal Numbers

E.3 Bit Manipulations and Auxiliary Operations
