Programmable Logic Controllers

Industrial Control

Khaled Kamel, Ph.D.
Eman Kamel, Ph.D.
Preface ix

1 Introduction to PLC Control Systems and Automation 1

1.1 Control System Overview 2
  1.1.1 Process Overview 2
  1.1.2 Manual Control Operation 4
  1.1.3 Automated-System Building Blocks 5

1.2 Hardwired Systems Overview 7
  1.2.1 Conventional Relays 7
  1.2.2 Relay Logic System 9
  1.2.3 Control Relay Application 10
  1.2.4 Motor Magnetic Starters 12
  1.2.5 Latch and Unlatch Control Relay 14

1.3 PLC Overview 15
  1.3.1 What Is a PLC? 15
  1.3.2 History of PLCs 17
  1.3.3 PLC Architecture 18
  1.3.4 Hardwired System Replacement 23
  1.3.5 PLC Ladder Logic 24
  1.3.6 Manual/Auto Motor Control Operation 25
  1.3.7 S7-1200 Book Training Unit Setup 28
  1.3.8 Process-Control Choices 29

Homework Problems and Laboratory Projects 31

2 Fundamentals of PLC Logic Programming 43

2.1 PLC Hardware 44
  2.1.1 S7-1200 Processor 44
  2.1.2 Operating Modes of the CPU 45

2.2 Hardwired System Replacement 48
  2.2.1 Communication Modules 45
  2.2.2 Signal Boards 46
  2.2.3 Input-Output Modules 46

2.3 PLC Architecture 47
  2.3.1 Power Supply 47

2.4 Hardwired System Replacement 49
  2.4.1 S7-1200 PLC Memory Organization/Specifications 48

2.5 PLC Logic System 52
  2.5.1 Processor Memory Map and Program Organization 48

2.6 Hardwired System Replacement 53
  2.6.1 Ladder-Logic Diagrams 52

2.7 Hardwired System Replacement 54
  2.7.1 PLC Input/Output Terminal Connection 53

2.8 Hardwired System Replacement 55
  2.8.1 PLC Boolean Instructions 54

2.9 Hardwired System Replacement 56
  2.9.1 Shift and Rotate Instructions 56

2.10 Hardwired System Replacement 58
  2.10.1 Program-Control Instructions 58

2.11 Hardwired System Replacement 60
  2.11.1 Sequential and Combinational Logic Instructions 59

3 Timers and Counters Programming 93

3.1 Timer Fundamentals 94
  3.1.1 ON-DELAY Timers (TONs) 94
  3.1.2 OFF-DELAY Timers (TOFs) 97

3.2 Timer Fundamentals 98
  3.2.1 Retentive/Time-Accumulator Timers (TONRs) 100

3.3 Timer Fundamentals 101
  3.3.1 Implemented Timer Applications 101
7 Instrumentation and Process Control 259

7.1 Instrumentation Basics 260
7.1.1 Sensors Basics 260
7.1.2 Analog Sensors 260
7.1.3 Digital Sensors 261
7.2 Process-Control Elements 262
7.2.1 Basic Measurement System 262
7.2.2 Process-Control Variables 263
7.2.3 Signal Conditioning 265
7.2.4 Signal Transmitters 265
7.3 Signal Conversion 265
7.3.1 Analog-to-Digital Conversion 266
7.3.2 Digital-to-Analog Conversion 267
7.3.3 Quantification Errors and Resolution 269
7.4 Process-Control System 270
7.4.1 Control Process 271
7.4.2 Controlled Variables 271
7.4.3 Control Strategy and Types 272
7.4.4 Process-Control Loop 274
7.4.5 Control-System Error Quantification 275
7.4.6 Control-System Transient and Performance Evaluation 276
7.5 Closed-Loop Process-Control Types 278
7.5.1 ON/OFF Control Mode 278
7.5.2 Proportional Control Mode 279
7.5.3 Composite Control Mode 281
7.5.4 PLC/Distributed Computer Supervisory Control 281
Homework Problems and Laboratory Project 283

8 Analog Programming and Advanced Control 287

8.1 Analog I/O Configuration and Programming 288
8.1.1 Analog I/O Modules 288
8.1.2 Configuring Analog I/O Modules 289
8.1.3 Analog I/O Diagnostic Configuration 290
8.1.4 Analog Input Range and Scaling 292
8.1.5 Analog I/O Programming 295
8.2 PID Control Configuration and Programming 298
8.2.1 Closed-Loop Control System 298
8.2.2 Control-System Time Response 299
8.2.3 Control-System Types 301
8.2.4 Controller Behavior 304
8.2.5 Selection of the Suitable Controller Structures 304
8.3 PID Instruction 306
8.3.1 SIMATIC S7-1200 Tank-Level PID Control 307
Homework Problems and Laboratory Project 327

9 Comprehensive Case Studies 333

9.1 Irrigation-Canal Water-Level Control 334
9.1.1 System Input-Output (I/O) Map 335
9.1.2 Logic Diagrams 335
9.1.3 Automated-System Building Blocks 338
9.2 Irrigation-Canal Ladder Implementation 339
9.3 Irrigation-Canal HMI Implementation 351
9.4 Wet-Well Pump-Station Control 354
9.4.1 System I/O Map 355
9.4.2 Automated System Building Blocks 355
9.5 Pumping-Station Ladder Implementation 356
9.5.1 Pump Alarms 356
9.6 Pumping-Station HMI Implementation 362
Homework Problems and Laboratory Project 362
