

Heinrich Arnold

**Robert Döpel and his
Model of Global Warming**

An Early Warning – and its Update

4., revised and translated Edition

Universitätsverlag Ilmenau

2013

Content

Preface to the 4th Edition.....	5
Preface to the 3rd Edition.....	7
Robert Döpel	9
Content	11
1 Introduction and Synopsis.....	13
2 Facts and Discussions on Global Warming.....	17
2.1 The Time from FOURIER to ARRHENIUS	17
2.2 The Time between ARRHENIUS and Formation of the IPCC ...	18
2.3 From Formation of the IPCC until Today.....	22
3 ROBERT DÖPEL, his Climate Model, and the Actualization.....	27
3.1 Important Life Stages and Works of DÖPEL.....	27
In the Soviet Union.....	30
The Years in Ilmenau	32
3.2 Döpel's Model Calculations and their Update.....	34
Updates	37
Terminology and Attribution Problems	38
Results until the Year 3000.....	40
Feedback Considerations	44
Prospects for Energy Production and Population Growth	46
More Recent Publications on Waste Heat Influences.....	50
Global Resources for Sustainable Energies	52

3.3 The Concept of Forcing and the Sun	58
Forcing reconsidered	58
The Sun.....	60
3.4 Inclusion of the Anthropogenic Greenhouse Effect	62
About IPCC Reports	62
Greenhouse Gases and their Effects	63
About Climate Models	67
Climate Sensitivity.....	68
CCS and Geo-Engineering / Climate Engineering	72
The 2-Degree Target	74
Global Stocks for Unsustainable Energies.....	76
About Weather Forecast.....	78
Simple Simulation Possibilities on Climate Issues.....	79
4. Final considerations	80
4.1 Nuclear Energy?	80
Nuclear Fusion	80
Nuclear Fission.....	82
4.2 Climate Change and the “Other Culture”	85
The Two Cultures	86
The cultural divide and the climate crisis	87
More about Culture and Ethics	89
5 Summary.....	92
6 Acknowledgements.....	95
7 References	96
