1 Introduction 1

2 The core of Post Keynesian economics 4
   Six core propositions 4
   The “fundamentalist Keynesians” 9
   The Kaleckians 11
   Hyman Minsky and the financial instability hypothesis 13
   One school or three? 15

3 What Post Keynesian macroeconomics is not 18
   Pre-Keynesian macroeconomics 18
   Old Keynesian macroeconomics 19
   Monetarism 21
   New Classical economics 22
   New Keynesian macroeconomics 24
   The New Neoclassical Synthesis 26
   Some history 28

4 Some methodological issues 34
   Why bother with methodology? 34
   Questions of ontology 36
   Pluralism and the Post Keynesians 39
   Formalism: mathematics and econometrics 40
   The microfoundations delusion 42

5 Post Keynesian microeconomics 48
   A methodological prelude 48
   The Post Keynesian firm 49
   The labour market 52
   The consumer and the household 56
6 Economic growth, development and the world economy
   The Harrod growth model
   Some complications
   Economic development
   International economics
   Some methodological conclusions

7 Why it all matters: economic policy
   Post Keynesian politics
   Monetary policy
   Fiscal policy
   Prices and incomes policy
   International economic policy
   Environmental policy

8 A case study: the Global Financial Crisis
   Minsky revisited
   Financialization in practice and theory
   The Global Financial Crisis: “made in America”
   What have we learned? I: economists against austerity
   What have we learned? II: the need for de-financialization
   Three final lessons

9 Post Keynesians and other schools of thought
   Orthodoxy and heterodoxy
   Marxian and Sraffian political economy
   Institutionalism and evolutionary economics
   Feminists and ecological economics
   Behavioural economics, complexity and Austrian economics
   Pluralism reconsidered

10 Some final questions
