# Contents

1 Introduction  
1.1 Relevance of research 5  
1.2 Chapter overview 6

2 Audience research model for communication training in virtual reality 8  
2.1 Communication skills 9  
2.1.1 Introduction 9  
2.1.2 Oral communication styles 10  
2.1.3 Communication skills definition 11  
2.1.4 Communication skills training 13  
2.1.5 Communication within and across disciplines 14  
2.1.6 Communication skills for state and trait apprehension 16  
2.1.7 Summary 17

2.2 Virtual environments and applications in communication training and treatment 18  
2.2.1 Introduction 18  
2.2.2 Immersive virtual environments 19  
2.2.3 Concepts and definitions 22  
2.2.4 The role of immersion and presence in virtual reality applications 28  
2.2.5 Speech anxiety treatment in virtual reality 33  
2.2.6 Virtual humans in speech anxiety treatment applications 36  
2.2.7 Summary 41
2.3 Communication training in virtual reality: Audience research model proposal

2.3.1 Audience centrality

2.3.2 Research model for a virtual audience

2.3.3 Summary

3 Audience characteristics research study

3.1 Introduction to audience characteristics

3.2 Theoretical background on real and virtual audiences

3.2.1 Audience customization

3.2.2 Interaction

3.2.3 Group dynamic

3.2.4 Summary

3.3 Methodology

3.3.1 Research questions

3.3.2 Expert interview guideline

3.3.3 Sample

3.3.4 Data collection and content analysis

3.3.5 Ethical considerations

3.4 Results

3.4.1 Audience customization - Familiarity

3.4.2 Interaction

3.4.3 Group dynamic

3.4.4 Real life training

3.4.5 Virtual audience characteristics

3.4.6 Virtual audience setup

3.4.7 Limitations and risks in virtual audience design

3.5 Conclusion

3.5.1 Summary of findings

3.5.2 Discussion

3.5.3 Limitations and outlook
# Audience behaviors research study

## 4.1 Introduction to audience behaviors

## 4.2 Theoretical background on nonverbal audience behaviors

- **4.2.1 Audience definition** ........................................... 141
- **4.2.2 Audience behaviors** ........................................... 142
- **4.2.3 Attentive audiences** .......................................... 144
- **4.2.4 Inattentive audiences** ........................................ 147
- **4.2.5 Neutral nonverbal behaviors** ................................. 150
- **4.2.6 Group dynamic** .................................................. 151
- **4.2.7 Body movements analysis** ..................................... 152
- **4.2.8 Nonverbal behavior multimodality** ......................... 154
- **4.2.9 Summary** .......................................................... 155

## 4.3 Methodology

- **4.3.1 Research questions** ............................................ 156
- **4.3.2 Codebook and code sheet development** ..................... 157
- **4.3.3 Sample** ............................................................ 161
- **4.3.4 Data collection** .................................................. 161
- **4.3.5 Coding interface** ................................................ 162
- **4.3.6 Coding rules** ..................................................... 163
- **4.3.7 Inter-rater agreement** ......................................... 164
- **4.3.8 Ethical considerations** ........................................ 165

## 4.4 Results

- **4.4.1 Attentiveness and inattentiveness** ......................... 167
- **4.4.2 Activation** ....................................................... 174
- **4.4.3 Group dynamic** .................................................. 175
- **4.4.4 Further characteristics of attentive and inattentive behaviors** ........................................ 176

## 4.5 Conclusion

- **4.5.1 Summary of findings** .......................................... 190
- **4.5.2 Discussion** ....................................................... 193
- **4.5.3 Limitations and outlook** ...................................... 195
